Course Descriptions	270

Richmond Community College offers curricular programs leading to an associate degree, a diploma, or a certificate. Certificates may be awarded through certain curricula upon the satisfactory completion of prescribed courses selected and identified by the College. For more information, see your academic advisor.

The Academic Success Center, tutorial services, and developmental education courses are available for students who need to enhance or review basic skills prior to entering a curriculum. New programs and courses are added in response to student and community needs. All course syllabi are available on the college website. This general catalog represents the most accurate information available concerning Richmond Community College at the time of its publication. However, the College reserves the right to delete or change programs and courses as may be required.

The curricular programs are designed so all students who complete requirements for a degree or diploma will meet required competencies in reading, writing, oral communication, computing and general math skills.

Curricular programs are arranged in alphabetical order and described in detail on the following pages.

Degrees, Diplomas, and Certificates

The Board of Trustees of Richmond Community College, under the authority of the State Board of Community Colleges, is authorized to award the following degrees, diplomas, and certificates:

1. An Associate in Arts or Associate in Science degree is awarded for successful completion of the college transfer curriculum.
2. An Associate in Applied Science degree is awarded for successful completion of a 64-76 semester hour curriculum.
3. A diploma is awarded for successful completion of a 36-48 semester hour curriculum.
4. A certificate is awarded for successful completion of programs that are 12-18 semester hours credit in length. The courses will be determined by Richmond Community College.

Courses of Study

College Transfer Programs

These programs are offered through the Associate in Arts (AA) and Associate in Science (AS) degrees. The Associate in Arts and the Associate in Science programs are part of the Comprehensive Articulation Agreement (CAA). This agreement addresses the transfer of students between institutions in the North Carolina Community College System and the constituent institutions of the University of North Carolina.

Associate in Arts (A10100)

Associate in Arts-Teacher Preparation (A1010T)

Associate in General Education Nursing (A1030N)

Associate in Science (A10400)

Associate in Science – Pre-Medical Professional Pathway (A10400)

Associate in Science-Teacher Preparation (A1040T)

Associate in Applied Science Programs

These programs range from 64 to 76 semester hour credits. A full-time student can typically complete one of these programs within two years. In addition to major course work, associate in applied science degree programs require a minimum of 15 semester hour credits of general education. General education requirements include course work in communications, humanities/fine arts, social/behavioral sciences and natural sciences/mathematics. Certain courses in associate degree programs may be accepted by a four-year college or university for transfer credit in an associated field.

911 Communications & Operations (A55470)

Accounting and Finance (A25800)

Air Conditioning, Heating, and Refrigeration Technology (A35100)

Associate Degree Nursing (A45110)

Associate Degree Nursing LPN to ADN Transition Pathway (A45110A)

Associate Degree Nursing Paramedic to ADN Transition Pathway (A45110B)

Business Administration: General Business (A25120GB)

Business Administration: Marketing (A25120M)

Criminal Justice Technology (A55180)

Early Childhood Education: Career Track (A55220C)

Early Childhood Education: Licensure Transfer Track (A55220L)
 Early Childhood Education: Non-Licensure Transfer Track (A55220N)
 Electric Utility Substation and Relay Technology (A50510)
 Emergency Medical Science (A45340A)
 Emergency Medical Science Bridging Program (A45340B)
 Funeral Service Education – FTCC Pathway (A55260)
 Healthcare Management Technology (A25200)
 Information Technology: Cyber Security (A25590A)
 Information Technology: Information Technology Support (A25590B)
 Information Technology: Software and Web Development (A25590C)
 Mechatronics Engineering (A40350)
 Paralegal Technology – FTCC Pathway (A25380)
 Respiratory Therapy – FTCC Pathway (A45720)
 Social and Human Services Technology: Addiction and Recovery (A45380A)
 Social and Human Services Technology: Child Advocacy Studies (A45380B)
 Social and Human Services Technology: General Social and Human Services (A45380C)
 Social and Human Services Technology: Mental Health (A45380D)
 Social and Human Services Technology: Social Services (A45380E)
 Speech-Language Pathology Assistant – FTCC Pathway (A45730)

Note: Associate in Applied Science Degree students considering transfer to a senior institution should substitute a higher-level mathematics course for the required mathematics course listed in their curriculum.

Diploma Programs

These programs range from 36 to 48 semester hour credits and can usually be completed by a full-time student within two semesters and one summer term. Associate degree level courses within a diploma program may also be applied toward an Associate in Applied Science degree.

911 Communications & Operations (D55470)
 Air Conditioning, Heating, and Refrigeration Technology (D35100)
 Criminal Justice Technology (D55180)
 Electric Utility Transformer Test Specialist (D50510)
 Information Technology: Cyber Security (D25590A)
 Information Technology: Information Technology Support (D25590B)
 Information Technology: Software and Web Development (D25590C)
 Practical Nursing (D45660)

Certificate Programs

These programs range from 12 to 18 semester hour credits and can usually be completed within one semester by a full-time student. Associate degree level courses within a certificate program may also be applied toward a diploma or an associate in applied science degree.

Please Note: Certificate programs are eligible for Financial Aid unless otherwise indicated.

*911 Communications & Operations (C55470)

Accounting and Finance: Accounting Specialist (C25800A)
Accounting and Finance: Accounting/Bookkeeper (C25800B)

***This certificate program is not eligible for Financial Aid.**

Career and College Promise College Transfer Pathways

Richmond Community College provides educational pathways for qualified high school students to complete college credits or technical training, tuition-free, while they are in high school, allowing them to get a jump-start on their workplace and college preparation.

High school students in a CCP College Transfer Pathway must complete the entire pathway before taking additional courses in the degree.

Leading to the Associate in Arts (P1012C)
 Leading to the Associate in Arts-Teacher Preparation (P1012T)
 Career and College Promise Associate Degree Nursing Pathway (P1032C)
 Leading to the Associate in Science (P1042C)
 Leading to the Associate in Science-Teacher Preparation (P1042T)
 Leading to Either a CCP Transfer Pathway or CTE Pathway (P9099A)

Career and College Promise Certificates

 Healthcare Management Technology (C25200P)
 Infant/Toddler Care (C55290P)
 Information Technology: Cyber Security Technician (C25590CP)
 Information Technology: Security+ Prep (C25590SP)
 Information Technology: Entry Level Computer Technician (C25590BP)
 Mechatronics Engineering Technology (C40350P)
 Social and Human Services Technology: Mental Health (C45380DP)

Continuing Education Programs

Many careers do not require a college degree, which is why Richmond Community College continues to expand its short-term training classes offered through the Continuing Education division. In these classes, you will receive a workforce or state certification that is recognized by employers and qualifies you to work in a specific job field.

Emergency Medical Science

Medical Assisting

Nurse Aide Training

Pharmacy Technician Training

Phlebotomy Technician Training

Surgical Technology

Types of Instruction

Web-assisted courses: Web-assisted courses are delivered 100% face-to-face on campus. There may be up to 24% online course work using the college learning management system. The instructor will provide online resources that will be available to students throughout the entire duration of the course.

Asynchronous online courses: Asynchronous online courses are independent of time and location. Rather than gathering in a classroom, students meet online and communicate with the instructor and classmates using the college learning management system (LMS), e-mail and/or other web tools. Students are required to complete 100% of the course online. While there are no required on-campus class meetings, instructors may require a proctored exam.

Synchronous online courses: Synchronous online courses are delivered completely online but have set virtual meeting times. Students will have regularly scheduled online meeting times in addition to online assignments. While students are not required to physically come to campus, synchronous courses do require students to meet virtually with their classmates and instructor using web-conferencing tools, web-cam, and a microphone. The required virtual course meeting times will be designated on the course schedule.

Hybrid courses: Hybrid courses combine traditional face-to-face learning with online learning. Hybrid courses will require at least 25% but not more than 75% of the course work to be completed online using the college learning management system (LMS), e-mail and/or other web tools. The required traditional course meeting times will be designated on the course schedule.

Interactive television courses: Interactive television (ITV) courses are taught by an RCC instructor who teaches traditionally from one campus location and synchronously delivers the class to other campus location(s) using advanced web-conference tools and a large TV monitor. The instructor and students can interact with each other just as they would in a traditional classroom, and students are able to interact with their peers who are enrolled at other campus locations. ITV courses provide opportunities for students to take courses that mirror a traditional classroom setting but from a different more convenient campus location.

Section indicators on RCC Course Schedule

“W” = Online courses

- Asynchronous courses will NOT have any scheduled days and times listed

“H” = Hybrid courses

- Synchronous courses will have scheduled days and times listed for in class meetings and online virtual meetings

“V” = ITV courses

Associate Degree Curricula

UNIVERSITY TRANSFER

Associate in Arts (A10100)

Richmond Community College offers two associate degree programs designed to allow seamless transition to four-year institutions: Associate in Arts (AA) and Associate in Science (AS). These programs are designed to offer students the freshman and sophomore years of a baccalaureate-track program.

The Associate in Arts program is designed for students desiring a bachelor's degree and/or pre-professional training in areas other than fine arts and natural/biological/mathematical sciences. Students who plan to major in such disciplines as art, business, economics, history, humanities, liberal arts, liberal arts education, music, political science, psychology, and sociology should consult a counselor about enrolling in the AA program.

The Associate in Arts degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of college transfer courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and basic computer use.

The Comprehensive Articulation Agreement (CAA) and the Independent Comprehensive Articulation Agreement (ICAA) enables North Carolina community college graduates of two-year associate in arts programs who are admitted to constituent institutions of The University of North Carolina and to Signatory Institutions of North Carolina Independent Colleges and Universities to transfer with junior status.

Community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.0 on a 4.0 scale in order to transfer with a junior status. Courses may also transfer through bilateral agreements between institutions.

Transfer programs such as this require a "C" or better in all classes to graduate.

ACADEMIC PRE-MAJORS

Counselors and advisors can help students design a program of study. See <https://www.northcarolina.edu/Transfer-Student-Success/NC-Community-College-Transfer> for additional information.

A. UNIVERSAL GENERAL EDUCATION TRANSFER COMPONENT (45 SHC)

(All courses in this component are required and will transfer for equivalency credit.)

				Work/ Class	Lab	Clinical	Credit
1. English Composition (6 SHC)							
ENG	111	Writing & Inquiry		3	0	0	3
ENG	112	Writing/Research in the Disciplines		3	0	0	3
2. Communications and Humanities/Fine Arts (9 SHC)							
<i>Choose three (3) courses from the following from at least two (2) different disciplines:</i>							
ART	111	Art Appreciation		3	0	0	3
ART	115	Art History Survey II		3	0	0	3
COM	120	Intro to Interpersonal Communication		3	0	0	3
COM	231	Public Speaking		3	0	0	3
ENG	231	American Literature I		3	0	0	3
ENG	232	American Literature II		3	0	0	3

ENG	241	British Literature I	3	0	0	3
ENG	242	British Literature II	3	0	0	3
MUS	110	Music Appreciation	3	0	0	3
PHI	215	Philosophical Issues	3	0	0	3
PHI	240	Introduction to Ethics	3	0	0	3

3. Social/Behavioral Sciences (9 SHC)

Choose three (3) courses from the following from at least two (2) different disciplines.

ECO	251	Principles of Microeconomics	3	0	0	3
ECO	252	Principles of Macroeconomics	3	0	0	3
HIS	111	World Civilization I	3	0	0	3
HIS	112	World Civilization II	3	0	0	3
HIS	131	American History I	3	0	0	3
HIS	132	American History II	3	0	0	3
POL	120	American Government	3	0	0	3
PSY	150	General Psychology	3	0	0	3
SOC	210	Introduction to Sociology	3	0	0	3

4. Mathematics (3-4 SHC)

Note: If take 3 credit hour MAT must take 14 Additional General Education credit hours (see below). If take 4 credit hour MAT must take 13 Additional General Education credit hours (see below).

Select one course from the following:

MAT	143	Quantitative Literacy	2	2	0	3
MAT	152	Statistical Methods I	3	2	0	4
MAT	171	Precalculus Algebra	3	2	0	4

5. Natural Sciences (4 SHC)

Select from the following course(s):

AST	111	Descriptive Astronomy	3	0	0	3
and						
AST	111A	Descriptive Astronomy Lab	0	2	0	1
BIO	110	Principles of Biology	3	3	0	4
BIO	111	General Biology I	3	3	0	4
CHM	151	General Chemistry I	3	3	0	4
GEL	111	Geology	3	2	0	4
PHY	110	Conceptual Physics	3	0	0	3
and						
PHY	110A	Conceptual Physics Lab	0	2	0	1

6. Additional General Education hours (13-14 SHC)*

Note: If take 3 credit hour MAT must take 14 Additional General Education credit hours (see above). If take 4 credit hour MAT must take 13 Additional General Education credit hours (see above).

Select 13-14 semester hours of additional general education courses from the preceding Humanities/Fine Arts, Social/Behavioral Sciences, Mathematics, and Natural Sciences or any of the courses listed below. Students should select these courses based on their intended major and transfer university.

B. OTHER REQUIRED HOURS (15 SHC)

1. Academic Transition

ACA 122 Transfer & Career Success 0 2 0 1

2. Electives (14 SHC)**

Select a minimum of fourteen (14) semester hours. Students may take additional general education courses from the preceding general education sections or courses classified as a pre-major and/or elective course within the Comprehensive Articulation Agreement listed below. Students should select these courses based on their intended major and transfer university.

Students must meet the receiving university's foreign language and/or health and physical education requirements, if applicable, prior to or after transfer to the senior institution.

Total Credit Hours

60-61

*Courses approved to meet the General Education requirement under the Comprehensive Articulation Agreement.

B. OTHER REQUIRED HOURS (15 SHC)

1. Academic Transition

ACA	122	Transfer & Career Success	0	2	0	1
-----	-----	---------------------------	---	---	---	---

2. Electives (14 SHC)**

Select a minimum of fourteen (14) semester hours. Students may take additional general education courses from the preceding general education sections or courses classified as a pre-major and/or elective course within the Comprehensive Articulation Agreement listed below. Students should select these courses based on their intended major and transfer university.

ACC	120	Principles of Financial Accounting	3	2	0	4
ACC	121	Principles of Managerial Accounting	3	2	0	4
BUS	110	Introduction to Business	3	0	0	3
CJC	111	Introduction to Criminal Justice	3	0	0	3
PED	110	Fit and Well for Life	1	2	0	2

Students must meet the receiving university's foreign language and/or health and physical education requirements, if applicable, prior to or after transfer to the senior institution.

Total Credit Hours

60-61

The courses listed above are the courses currently offered online through Richmond Community College. Additional courses satisfy many of the requirements necessary to complete the Associate in Arts (A10100) degree at Richmond Community College. Please speak to your advisor if you have taken courses at another college or university. The North Carolina Comprehensive Articulation Agreement is a statewide agreement governing transfer credits from North Carolina community colleges to North Carolina public universities and participating private universities. RichmondCC cannot guarantee the transfer of courses to out-of-state universities.

UNIVERSITY TRANSFER

Associate in Arts-Teacher Preparation (A1010T)

Richmond Community College offers two associate degree programs designed to allow seamless transition to four-year institutions: Associate in Arts (AA) and Associate in Science (AS). These programs are designed to offer students the freshman and sophomore years of a baccalaureate-track program.

The Associate in Arts in Teacher Preparation degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of college transfer courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and basic computer use.

The Comprehensive Articulation Agreement (CAA) and the Independent Comprehensive Articulation Agreement (ICAA) enables North Carolina community college graduates of two-year associate in arts programs who are admitted to constituent institutions of The University of North Carolina and to Signatory Institutions of North Carolina Independent Colleges and Universities to transfer with junior status.

Community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.7 on a 4.0 scale in order to transfer with a junior status. Courses may also transfer through bilateral agreements between institutions.

If your intention is to transfer to a four-year institution, consult with a counselor to make sure you enroll in the correct college transfer track offered at RichmondCC. Additionally, counselors and advisors can help students design a program of study that best fits the student's career plan.

Transfer programs such as this require a "C" or better in all classes to graduate.

A. UNIVERSAL GENERAL EDUCATION TRANSFER COMPONENT (45 SHC)

Associate in General Education Nursing (A1030N)

The Associate in General Education (AGE)-Nursing is designed for students who wish to begin their study toward the Associate in Nursing degree and a Baccalaureate degree in Nursing as based on Blocks 1 through 3 of the *Uniform Articulation Agreement between the University of North Carolina's Registered Nurse (RN) to Bachelor of Science in Nursing (BSN) programs and the North Carolina Community College Associate Degree Nursing Programs* which was approved by the State Board of Community Colleges and the UNC Board of Governors in February 2015. The AGE-Nursing shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of courses.

A student who completes an Associate in Applied Science (AAS) in Nursing with a GPA of at least 2.0 and a grade of C or better in the AGE-Nursing courses listed below and who holds a current unrestricted license as a Registered Nurse in North Carolina will have fulfilled the UNC institutions lower-division general education requirements as well as nursing program entry requirements. However, because nursing program admissions are competitive, no student is *guaranteed* admission to the program of his or her choice.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

Work/
Class Lab Clinical Credit

To receive a degree, diploma or certificate from RCC, a student must have a grade of "C" or better in all curriculum courses and a "B" or better in all BIO courses for the program of study.

UNIVERSITY TRANSFER

Associate in Science (A10400)

Richmond Community College offers two associate degree programs designed to allow seamless transition to four-year institutions: Associate in Arts (AA) and Associate in Science (AS). These programs are designed to offer students the freshman and sophomore years of a baccalaureate-track program.

The Associate in Science program is designed for students desiring a bachelor's degree and/or pre-professional training in biological, mathematical, or natural science disciplines.

The Associate in Science degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of college transfer courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and the basic computer use.

The Comprehensive Articulation Agreement (CAA) and the Independent Comprehensive Articulation Agreement (ICAA) enables North Carolina community college graduates of two-year associate in science programs who are admitted to constituent institutions of The University of North Carolina and to Signatory Institutions of North Carolina Independent Colleges and Universities to transfer with junior status.

Community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.0 on a 4.0 scale in order to transfer with a junior status. Courses may also transfer through bilateral agreements between institutions.

Transfer programs such as this require a "C" or better in all classes to graduate.

ACADEMIC PRE-MAJORS

Counselors and advisors can help students design a program of study. See <https://www.northcarolina.edu/Transfer-Student-Success/NC-Community-College-Transfer> for additional information.

A. UNIVERSAL GENERAL EDUCATION TRANSFER COMPONENT (45 SHC)

(All courses in this component are required and will transfer for equivalency credit.)

The courses listed on this program guide are the courses currently offered online through Richmond Community College. Additional courses satisfy many of the requirements necessary to complete the Associate in Science (A10400) degree at Richmond Community College. Please speak to your advisor if you have taken courses at another college or university. The North Carolina Comprehensive Articulation Agreement is a statewide agreement governing transfer credits from North Carolina community colleges to North Carolina public universities and participating private universities. RichmondCC cannot guarantee the transfer of courses to out-of-state universities.

UNIVERSITY TRANSFER

Associate in Science-Teacher Preparation (A1040T)

Richmond Community College offers two associate degree programs designed to allow seamless transition to four-year institutions: Associate in Arts (AA) and Associate in Science (AS). These programs are designed to offer students the freshman and sophomore years of a baccalaureate-track program.

The Associate in Science in Teacher Preparation degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of college transfer courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and the basic computer use.

The Comprehensive Articulation Agreement (CAA) and the Independent Comprehensive Articulation Agreement (ICAA) enables North Carolina community college graduates of two-year associate in science programs who are admitted to constituent institutions of The University of North Carolina and to Signatory Institutions of North Carolina Independent Colleges and Universities to transfer with junior status.

Community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.7 on a 4.0 scale in order to transfer with a junior status. Courses may also transfer through bilateral agreements between institutions.

If your intention is to transfer to a four-year institution, consult with a counselor to make sure you enroll in the correct college transfer track offered at RichmondCC. Additionally, counselors and advisors can help students design a program of study that best fits the student's career plan.

Transfer programs such as this require a "C" or better in all classes to graduate.

A. UNIVERSAL GENERAL EDUCATION TRANSFER COMPONENT (45 SHC)

(All courses in this component are required and will transfer for equivalency credit.)

UNIVERSITY TRANSFER

Associate in Science – Pre-Medical Professional Pathway (A10400)

RichmondCC has created a Pre-Medical Professional Pathway in an effort to outline a specific pathway for students to obtain an Associate in Science degree that also meets a majority of the prerequisite coursework requirements for admission to most US Medical Schools. Students can major in anything they like to prepare for medical school. Medical schools do not require, or even prefer, a certain undergraduate major. It is recommended that you check with specific schools to see if they require any additional coursework to be eligible for admission.

Some schools are not yet specifically requiring Biochemistry and Statistics. However, students will need to take these courses to be successful on the MCAT because it contains material from those courses.

Students seeking entry into Medical School will meet a majority of prerequisite course requirements for application by completing this Associate in Science Degree—Pre-Medical Professional Pathway. Additionally, this curriculum adheres to the North Carolina Community College System guidelines for an Associate in Science degree. Admission into a US Medical School requires a bachelor degree, the Associate of Science degree can be used to transfer to a bachelor degree program.

911 Communications and Operations (A55470)

The 911 Communications and Operations curriculum is designed to provide new students, as well as current practitioners, with knowledge and skills in the areas necessary for entrance or advancement within emergency communications.

Emphasis is placed on the development of concepts and theories of public safety communication systems, basic office software skills, technical writing, business math and statistics, cybersecurity fundamentals, public and interpersonal relations, understand local government finance systems, basics of GIS, personnel management and supervision, project coordination, time management, and organizational skills, grant writing, introduction to computers and networks, mental health awareness, and adaptation to technology within emergency communication organizations.

Employment opportunities exist in a variety of areas, including: local government emergency communication organizations, county sheriff's departments, 911 emergency dispatch organizations, law enforcement, fire and EMS agencies, private communication centers, and emergency management.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

A criminal background check may be required as a condition of employment in the 911 Emergency Communication field.

The courses listed on this program guide are the courses currently offered online through Richmond Community College. Please speak to your advisor if you have taken courses at another college or university.

The following courses are part of the North Carolina Articulation Agreement: ACA 122, BUS 137, COM 120, ENG 111, GIS 111, HUM 115, MAT 152, POL 120, PSY 150, SOC 210, SOC 220, and SOC 225. The North Carolina Comprehensive Articulation Agreement is a statewide agreement governing transfer credits from North Carolina community colleges to North Carolina public universities and participating private universities. RichmondCC cannot guarantee the transfer of courses to out-of-state universities.

ACCOUNTING SPECIALIST

Accounting and Finance (A25800)

The Accounting and Finance curriculum is designed to provide students with the knowledge and the skills necessary for employment and growth in the accounting and finance profession. Accounting and finance professionals assemble and analyze, process, and communicate essential information about financial operations.

Course work may include accounting, finance, ethics, business law, computer applications, financial planning, insurance, marketing, real estate, selling, and taxation. Related skills are developed through the study of communications, computer applications, financial analysis, critical thinking skills, and ethics.

Graduates should qualify for entry-level accounting and finance positions in many types of organizations including accounting firms, small businesses, manufacturing firms, banks, hospitals, school systems, and governmental agencies.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

BUS	125	Personal Finance	2	2	0	3
CIS	110	Introduction to Computers	2	2	0	3

Total Credit Hours**16**

Students enrolled in WBL 111 and WBL 115, who reside outside of Richmond County and Scotland County North Carolina will need to work under an active, licensed CPA or at an instructor approved location.

The courses listed on this program guide are the courses currently offered online through Richmond Community College. Please speak to your advisor if you have taken courses at another college or university.

The following courses are part of the North Carolina Articulation Agreement: ACC 120, ACC 121, ART 111, BUS 110, BUS 115, BUS 137, CIS 110, COM 231, ENG 111, ENG 112, ENG 231, ENG 232, MAT 143, MUS 110, PHI 240, and SPA 111. The North Carolina Comprehensive Articulation Agreement is a statewide agreement governing transfer credits from North Carolina community colleges to North Carolina public universities and participating private universities. RichmondCC cannot guarantee the transfer of courses to out-of-state universities.

HEATING AND AC TECHNICIAN

Air Conditioning, Heating, and Refrigeration Technology (A35100)

The Air Conditioning, Heating, and Refrigeration Technology curriculum provides the basic knowledge to develop skills necessary to work with residential and light commercial systems.

Topics include mechanical refrigeration, heating and cooling theory, electricity, controls, and safety. The diploma program covers air conditioning, furnaces, heat pumps, tools and instruments. In addition, the A.A.S. degree covers residential building codes, residential system sizing, and advanced comfort systems.

Diploma graduates should be able to assist in the start-up, preventive maintenance, service, repair, and/or installation of residential and light commercial systems. A.A.S. degree graduates should be able to demonstrate an understanding of system selection and balance and advanced systems.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

Associate Degree Nursing (A45110)

The Associate Degree Nursing curriculum provides knowledge, skills, and strategies to integrate safety and quality into nursing care, to practice in a dynamic environment, and to meet individual needs which impact health, quality of life, and achievement of potential.

Course work includes and builds upon the domains of healthcare, nursing practice, and the holistic individual. Content emphasizes the nurse as a member of the interdisciplinary team providing safe, individualized care while employing evidence-based practice, quality improvement, and informatics.

Graduates of this program are eligible to apply to take the National Council Licensure Examination (NCLEX-RN). Employment opportunities are vast within the global health care system and may include positions within acute, chronic, extended, industrial, and community health care facilities.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

The Associate Degree Nursing program is approved by the North Carolina Board of Nursing.

ASSOCIATE DEGREE NURSING—LPN TO ADN TRANSITION PATHWAY (A45110A)

The Associate Degree Nursing program aims to equip students with the knowledge, skills, and strategies necessary for safe, quality, and individualized nursing care in a dynamic healthcare environment. It emphasizes interdisciplinary collaboration, evidence-based practice, and holistic patient care. Graduates are eligible to take the NCLEX-RN exam and pursue diverse employment opportunities in various healthcare settings. The LPN to ADN track offers licensed practical nurses a pathway to advance their education and join the traditional associate degree program after completing the initial transition course.

ADMISSION REQUIREMENTS

- The following elective courses must be completed prior to acceptance into LPN to ADN transition pathway. These include BIO 165 and BIO 166, ENG 111, and PSY 150. BIO 165 and BIO 166 must have a grade of “B” or higher and were completed in the last 5 years.
- Must have completed at least high school diploma or GED.
- Current BLS CPR card.
- Current LPN License (must be maintained throughout the program) Obtained within the last 5 years.
- LPN verification attestation form. Minimum of 1 year of experience as an LPN.
- Completed health form and current required immunizations.
- Score of 250 on the Math and Reading Accuplacer Exam, two attempts only within a year.
- Please note that BIO 275, ENG 112, HUM 115, MAT 143, PSY 241, and SOC 210 must be successfully completed to enter NUR 113 in the Summer Semester.

These credentials/certifications provide 18 credit hours of advanced placement for students who are accepted into the program. Students will receive articulated credit for NUR 111, NUR 112, and NUR 114. To receive this articulation credit, the student must receive the recommendation of the Program Coordinator.

Work/ Class Lab Clinical Credit

To receive a degree, diploma or certificate from RCC, a student must have a grade of “C” or better in all curriculum courses and a “B” or better in all NUR and BIO courses for the program of study.

A. General Education Courses

1. Required Courses

ENG 111	Writing and Inquiry	3	0	0	3

Birth Through Kindergarten Residency Licensure (Certificate) (C55500)

The Birth Through Kindergarten Residency Certificate curriculum provides a course of study leading to the development of the pedagogical competencies needed to become certified to teach Birth Through Kindergarten by the North Carolina Department of Public Instruction.

Course work includes learning theory, instructional technology, school policies and procedures, expectations and responsibilities of educators, teaching strategies/methods for specific content/specialty areas, formative/summative assessment, data informed practice, and classroom organization/management to enhance learning for a wide range of student learning needs.

Graduates should meet pedagogical competencies and demonstrate effective teaching practices. Additional requirements, such as pre-service training, passing the state required assessments, and the criteria included in the North Carolina Teacher Evaluation System, are required for licensure.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

The Residency Certificate and its associated courses (EDU 246, EDU 255, EDU 260, EDU 266, EDU 267, and EDU 283) are available only to individuals who have already earned a bachelor's degree and are currently employed as the official teacher of record, or have received a written offer of employment, in a North Carolina public school.

Business Administration (A25120)

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy.

Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making.

Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

BUSINESS ADMINISTRATION: GENERAL BUSINESS (A25120GB) COURSE REQUIREMENTS

				Class	Lab	Work/ Clinical	Credit
A. General Education Courses							
1. Required Courses

The courses listed on this program guide are the courses currently offered online through Richmond Community College. Please speak to your advisor if you have taken courses at another college or university.

The following courses are part of the North Carolina Articulation Agreement: ACC 120, ACC 121, ANT 220, ART 111, BUS 110, BUS 115, BUS 137, CIS 110, DRA 111, ECO 251, ECO 252, ENG 111, ENG 112, ENG 231, ENG 232, HIS 111, HIS 112, HIS 131, HIS 132, MAT 143, MUS 110, PHI 240, PSY 150, PSY 241, REL 211, REL 212, SOC 210, SOC 213, and SPA 111. The North Carolina Comprehensive Articulation Agreement is a statewide agreement governing transfer credits from North Carolina community colleges to North Carolina public universities and participating private universities. RichmondCC cannot guarantee the transfer of courses to out-of-state universities.

LAW ENFORCEMENT, COURTS, AND CORRECTIONS

Criminal Justice Technology (A55180)

The Criminal Justice Technology curriculum is designed to provide knowledge of criminal justice systems and operations. Study will focus on local, state, and federal law enforcement, judicial processes, corrections and security services. The criminal justice system's role within society will be explored.

Emphasis is on criminal justice systems, criminology, juvenile justice, criminal and constitutional law, investigative principles, ethics and community relations. Additional study may include issues and concepts of government, counseling, communications, computers and technology.

Employment opportunities exist in a variety of local, state, and federal law enforcement, corrections, and security fields. Examples include police officer, deputy sheriff, county detention officer, state trooper, intensive probation/parole surveillance officer, correctional officer, and loss prevention specialist.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

The Criminal Justice A.A.S. Degree Program at Richmond Community College is certified as meeting the educational and program requirements of the North Carolina Criminal Justice Education and Training Standards Commission.

Course CJC 131 Criminal Law focuses on North Carolina law.

A criminal background check may be required as a condition of employment in the criminal justice field.

The courses listed on this program guide are the courses currently offered online through Richmond Community College. Please speak to your advisor if you have taken courses at another college or university.

The following courses are part of the North Carolina Articulation Agreement: ART 111, CIS 110, CJC 111, CJC 113, CJC 121, CJC 141, CJC 212, ENG 111, ENG 112, ENG 231, HIS 131, HSE 225, MAT 143, MAT 152, MAT 171, MUS 110, PHI 240, POL 120, PSY 150, REL 211, REL 212, SOC 210, and SPA 111. The North Carolina Comprehensive Articulation Agreement is a statewide agreement governing transfer credits from North Carolina community colleges to North Carolina public universities and participating private universities. RichmondCC cannot guarantee the transfer of courses to out-of-state universities.

Early Childhood Administration (Certificate) (C55850)

This curriculum prepares individuals pursuing administrating roles in diverse child care settings to effectively work with children, families and teachers. The certificate is composed of learning opportunities in developmental theories, competency and evidence-based professional knowledge, administrative skills and leadership qualities.

Course work includes foundations in early childhood education, physical/nutritional needs of young children, safety issues in the care of young children; communication and leadership skills with teachers, families and children; programming and staffing, budgeting/financial management and marketing, and rules and regulations of early childhood programs.

Employment opportunities include entrepreneurship and/or management of child development and child care programs, preschools, public and private schools, recreational centers, Early Head Start and Head Start programs, and other programs.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

EDU 114 and EDU 119 have components of the course using the North Carolina Foundations for Early Learning and Development, which is a free resource.

The courses listed on this program guide are the courses currently offered online through Richmond Community College. Please speak to your advisor if you have taken courses at another college or university. Please see the Student Handbook for the courses, which are part of the North Carolina Articulation Agreement. The North Carolina Comprehensive Articulation Agreement is a statewide agreement governing transfer credits from North Carolina community colleges to North Carolina public universities and participating private universities. RichmondCC cannot guarantee the transfer of courses to out-of-state universities.

EARLY CHILDHOOD SPECIALIST

Early Childhood Education (A55220)

The Early Childhood Education curriculum prepares individuals to work with children from birth through eight in diverse learning environments. Students will combine learned theories with practice in actual settings with young children under the supervision of qualified teachers.

Course work includes child growth and development; physical/nutritional needs of children; care and guidance of children; and communication skills with families and children. Students will foster the cognitive/language, physical/motor, social/emotional, and creative development of young children.

Graduates are prepared to plan and implement developmentally appropriate programs in early childhood settings. Employment opportunities include child development and child care programs, preschools, public and private schools, recreational centers, Head Start Programs, and school-age programs.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

Students enrolled in EDU 284, wishing to complete hours outside of Richmond county and Scotland county North Carolina must complete practicum hours at a location meeting one of the following criteria: NAEYC accredited; a Public School Pre-K-3rd grade; Head Start or Early Head Start; or NACCRA accredited. The student must be directly supervised by an individual holding an associate degree or higher in Early Childhood Education or related program.

EDU 114 and EDU 119 have components of the course using the North Carolina Foundations for Early Learning and Development, which is a free resource.

The courses listed on this program guide are the courses currently offered online through Richmond Community College. Please speak to your advisor if you have taken courses at another college or university. Please see the Student Handbook for the courses, which are part of the North Carolina Articulation Agreement. The North Carolina Comprehensive Articulation Agreement is a statewide agreement governing transfer credits from North Carolina community colleges to North Carolina public universities and participating private universities. RichmondCC cannot guarantee the transfer of courses to out-of-state universities.

Early Childhood Preschool (Certificate) (C55860)

This curriculum prepares individuals to work with preschool aged children (3-5) in diverse learning environments. Students will combine learned theories, competency-based knowledge, and practice in actual settings with preschool children.

Course work includes child growth and development, physical/nutritional needs of preschool children, safety issues in the care of preschool children; care and guidance; communication skills with families and children; design and implementation of appropriate curriculum; and other related topics.

Graduates should be prepared to plan and implement developmentally appropriate preschool programs in early childhood settings. Employment opportunities include child development and childcare programs, preschools, public and private schools, recreational centers, Head Start Programs, and other preschool programs.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

Electric Utility Substation and Relay Technology (A50510)

The Electric Utility Substation and Relay Technology curriculum provides the skills to maintain high voltage equipment and protective systems for the electric utility transmission system. Training in operation and maintenance of critical infrastructure associated with the transmission grid is included.

Courses are designed to develop student understanding of maintenance and troubleshooting on transmission equipment, including three phase power theory, protective relaying, power transformers, voltage regulators, capacitors, and power circuit breakers common to electric utility and numerous other industries.

Graduates should qualify for entry-level employment in electric utility, renewable energy, and industrial facilities as technicians who diagnose and service equipment and components used for electrical power transmission.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Elementary Education Residency Licensure (Certificate) (C55490)

The Elementary Education Residency Certificate curriculum provides a course of study leading to the development of the general pedagogical competencies needed to become certified to teach by the North Carolina Department of Public Instruction.

Course work includes learning theory, instructional/educational technology, diverse learners, school policies and procedures, expectations and responsibilities of educators, teaching strategies/methods for specific content/specialty areas, formative/summative assessment, data informed practice, and classroom organization/management to enhance learning.

Graduates should meet general pedagogical competencies and demonstrate effective teaching practices. Additional requirements, such as pre-service training, passing the state required assessments, and the criteria included in the North Carolina Teacher Evaluation System, are required for licensure.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

*The Residency Certificate and courses (EDU 270, EDU 272, EDU 277, EDU 278, EDU 279, and EDU 283) are only available to individuals who **already** have earned a Bachelor's degree in a non-education field **and** are employed in an elementary school as a teacher or have received a written offer of employment from an elementary school.*

Emergency Medical Science (A45340)

The Emergency Medical Science curriculum provides individuals with the knowledge, skills and attributes to provide advanced emergency medical care as a paramedic for critical and emergent patients who access the emergency medical system and prepares graduates to enter the workforce.

Students will gain complex knowledge, competency, and experience while employing evidence-based practice under medical oversight and serve as a link from the scene into the healthcare system.

Graduates of this program may be eligible to take state and/or national certification examinations. Employment opportunities include providers of emergency medical services, fire departments, rescue agencies, hospital specialty areas, industry, educational and government agencies.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

EMERGENCY MEDICAL SCIENCE BRIDGING PROGRAM (A45340B)

The Emergency Medical Science Bridging program is designed to allow a currently credentialed non-degreed Paramedic to earn a two-year Associate of Applied Science degree in Emergency Medical Science in two semesters.

The prerequisites for admission to the EMS Bridging program include current credential/certification in all of the following:

- North Carolina or National Registry Paramedic Credential
- American Heart Association Advanced Cardiac Life Support Certification
- American Heart Association Pediatric Advanced Life Support Certification (or NREMT equivalent)
- American Heart Association Basic Life Support Certification (or PHTLS)

These credentials/certifications provide 45 credit hours of advanced placement for students who are accepted into the program. Students will receive articulated credit for EMS 110, EMS 122, EMS 130, EMS 131, EMS 160, EMS 220, EMS 221, EMS 231, EMS 240, EMS 241, EMS 250, EMS 260, EMS 270, and EMS 285. To receive this articulation credit, the student must receive the recommendation of the EMS Program Coordinator.

Funeral Service Education - FTCC Pathway (A55260)

The Funeral Service Education curriculum provides students with the opportunity to become proficient in basic funeral service skills.

In addition to the general education courses required in the curriculum, students will complete technical courses such as human anatomy, microbiology, embalming theory and practice, embalming chemistry, restorative arts, funeral law, and funeral home operations.

Graduates of the curriculum, upon passing the state and national exams, completing an internship in a funeral home, and satisfying all state board of funeral service requirements, will be qualified for employment as embalmers and/or funeral directors.

Richmond Community College students can earn a degree in Funeral Service Education from **Fayetteville Technical Community College** after completing two semesters of study at RichmondCC and transferring to FTCC.

FTCC's Funeral Service Education program provides students with the opportunity to become proficient in basic funeral service skills. Students will study human anatomy, embalming theory and practice, embalming chemistry, restorative arts, funeral law, and funeral home operations.

Your studies begin at RichmondCC. Complete two semesters at RichmondCC and transfer 27 credits into FTCC's Funeral Service Education program for a seamless pathway to earning this degree. See a Student Advisor for more information.

HEALTHCARE MANAGER

Healthcare Management Technology (A25200)

The Healthcare Management Technology curriculum prepares individuals for employment in healthcare business and financial operations in areas such as general healthcare management, entrepreneurship, and long-term care.

Course work includes medical office management, financial management, legal aspects of healthcare, medical insurance and billing analysis, and other topics depending on the subject area selected within this curriculum.

Graduates should qualify for employment opportunities in a variety of healthcare settings including hospitals, medical offices, outpatient clinics, long-term care facilities, and insurance companies. Industry recognized certifications may be available for graduates with work experience.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

High School Math Residency Licensure (Certificate) (C55510)

The High School Math Residency Certificate curriculum provides a course of study leading to the development of the pedagogical competencies needed to become certified to teach math by the North Carolina Department of Public Instruction.

Course work includes learning theory, instructional technology, school policies and procedures, expectations and responsibilities of educators, teaching strategies/methods for specific content/specialty areas, formative/summative assessment, data informed practice, and classroom organization/management to enhance learning for a wide range of student learning needs.

Graduates should meet pedagogical competencies and demonstrate effective teaching practices. Additional requirements, such as pre-service training, passing the state required assessments, and the criteria included in the North Carolina Teacher Evaluation System, are required for licensure.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

The Residency Certificate and its associated courses (EDU 230, EDU 268, EDU 269, EDU 270, EDU 272, and EDU 283) are available only to individuals who have already earned a bachelor's degree and are currently employed as the official teacher of record, or have received a written offer of employment, in a North Carolina public school.

Infant/Toddler Care (Certificate) (C55290)

The curriculum prepares individuals to work with children from infancy to three years of age in diverse learning environments. Students will combine learned theories, competency-based knowledge, and practice in actual settings with infants and toddlers.

Course work includes infant/toddler growth and development: physical/nutritional needs of infants and toddlers; safety issues in the care of infants and toddlers; care and guidance; communication skills with families and children; design an implementation of appropriate curriculum; and other related topics.

Graduates should be prepared to plan and implement developmentally appropriate infant/toddler programs in early childhood settings. Employment opportunities include child development and child care programs, preschools, public and private schools, recreational centers, Early Head Start Programs, and other infant/toddler programs.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

EDU 114 and EDU 119 have components of the course using the North Carolina Foundations for Early Learning and Development, which is a free resource.

The courses listed on this program guide are the courses currently offered online through Richmond Community College. Please speak to your advisor if you have taken courses at another college or university. Please see the Student Handbook for the courses, which are part of the North Carolina Articulation Agreement. The North Carolina Comprehensive Articulation Agreement is a statewide agreement governing transfer credits from North Carolina community colleges to North Carolina public universities and participating private universities. RichmondCC cannot guarantee the transfer of courses to out-of-state universities.

Information Technology (A25590)

The Information Technology (IT) curriculum prepares graduates for employment in the technology sector as designers, testers, support technicians, system administrators, developers, or programmers who use computer software and/or hardware to design, process, implement and manage information systems in specialties such as database services, security, business intelligence, healthcare informatics and others depending on the technical path selected within this curriculum.

Course work includes development of a student's ability to create, store, communicate, exchange and use information to solve technical issues related to information support and services, interactive media, network systems, programming and software development, information security and other emerging technologies based on the selected area of study.

Graduates should qualify for employment in entry-level positions with businesses, educational systems, and governmental agencies which rely on computer systems to design and manage information. The program will incorporate the competencies of industry-recognized certification exams.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

The courses listed on this program guide are the courses currently offered online through Richmond Community College. Please speak to your advisor if you have taken courses at another college or university.

The following courses are part of the North Carolina Articulation Agreement: ACC 120, ART 111, BUS 110, BUS 115, BUS 137, CIS 110, CIS 115, COM 231, CSC 151, ECO 251, ECO 252, ENG 111, ENG 112, ENG 231, ENG 232, MAT 143, MUS 110, PHI 240, and SPA 111. The North Carolina Comprehensive Articulation Agreement is a statewide agreement governing transfer credits from North Carolina community colleges to North Carolina public universities and participating private universities. RichmondCC cannot guarantee the transfer of courses to out-of-state universities.

AUTOMATION & ROBOTICS ENGINEERING TECHNICIAN

Mechatronics Engineering Technology (A40350)

ENGINEERING AND TECHNOLOGY PATHWAYS

These curriculums are designed to prepare students through the study and application of principles from mathematics, natural sciences, and technology and applied processes based on these subjects.

Course work includes mathematics, natural sciences, engineering sciences and technology.

Graduates should qualify to obtain occupations such as technical service providers, materials and technologies testing services, process improvement technicians, engineering technicians, industrial and technology managers, or research technicians.

PROGRAM DESCRIPTION

A course of study that prepares the students to use basic engineering principles and technical skills in developing and testing automated, servomechanical, and other electromechanical systems. Includes instruction in prototype testing, manufacturing and operational testing, systems analysis and maintenance procedures. Graduates should be qualified for employment in industrial maintenance and manufacturing including assembly, testing, startup, troubleshooting, repair, process improvement, and control systems, and should qualify to sit for Packaging Machinery Manufacturers Institute (PMMI) mechatronics or similar industry examinations.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

Middle School Math Residency Licensure (Certificate) (C55530)

The Middle School Math Residency Certificate curriculum provides a course of study leading to the development of the pedagogical competencies needed to become certified to teach math by the North Carolina Department of Public Instruction.

Course work includes learning theory, instructional technology, school policies and procedures, expectations and responsibilities of educators, teaching strategies/methods for specific content/specialty areas, formative/summative assessment, data informed practice, and classroom organization/management to enhance learning for a wide range of student learning needs.

Graduates should meet pedagogical competencies and demonstrate effective teaching practices. Additional requirements, such as pre-service training, passing the state required assessments, and the criteria included in the North Carolina Teacher Evaluation System, are required for licensure.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

The Residency Certificate and its associated courses (EDU 230, EDU 231, EDU 232, EDU 270, EDU 272, and EDU 283) are available only to individuals who have already earned a bachelor's degree and are currently employed as the official teacher of record, or have received a written offer of employment, in a North Carolina public school.

Paralegal Technology - FTCC Pathway (A25380)

The Paralegal Technology curriculum prepares individuals to work under the supervision of attorneys by performing routine legal tasks and assisting with substantive legal work. A paralegal/legal assistant may not practice law, give legal advice, or represent clients in a court of law.

Course work includes substantive and procedural legal knowledge in the areas of civil litigation, legal research and writing, real estate, family law, wills, estates, trusts, and commercial law. Required courses also include subjects such as English, mathematics, and computer utilization.

Graduates are trained to assist attorneys in probate work, investigations, public records search, drafting and filing legal documents, research, and office management. Employment opportunities are available in private law firms, governmental agencies, banks, insurance agencies, and other business organizations.

Richmond Community College students can earn a degree in Paralegal Technology from **Fayetteville Technical Community College** after completing two semesters of study at RichmondCC and transferring to FTCC.

FTCC's Paralegal Technology prepares individuals to work under the supervision of attorneys by performing routine legal tasks and assisting with substantive legal work. A paralegal/legal assistant may not practice law, give legal advice, or represent clients in a court of law. Graduates are trained to assist attorneys in drafting and filing legal documents, investigations, office management, probate work, public records search, and research.

Your studies begin at RichmondCC. Complete two semesters at RichmondCC and transfer 25 credits into FTCC's Paralegal Technology program for a seamless pathway to earning this degree.

See a Student Advisor for more information.

Practical Nursing (Diploma) (D45660)

The Practical Nursing curriculum provides knowledge and skills to integrate safety and quality into nursing care to meet the needs of the holistic individual which impact health, quality of life, and achievement of potential.

Course work includes and builds upon the domains of healthcare, nursing practice, and the holistic individual. Content emphasizes safe, individualized nursing care and participation in the interdisciplinary team while employing evidence-based practice, quality improvement, and informatics.

Graduates are eligible to apply to take the National Council Licensure Examination (NCLEX-PN) which is required for practice as a Licensed Practical Nurse. Employment opportunities include hospitals, rehabilitation/long term care/home health facilities, clinics, and physicians' offices.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

Respiratory Therapy – FTCC Pathway (A45720)

The Respiratory Therapy curriculum prepares individuals to function as respiratory therapists through demonstrated competence in the cognitive, psychomotor, and affective learning domains of respiratory care practice. Graduates perform diagnostic and therapeutic procedures with exposure to current and emerging practice settings.

The curriculum prepares graduates to operate within inter-professional teams and effectively communicate with clients/patients of various ages, ethnicities, and cultures. Application of problem solving strategies, applying ethical decision making, and understanding professional responsibilities are emphasized.

Graduates are eligible to complete the credentialing process through the National Board for Respiratory Care, which will qualify them for a license to practice in a variety of healthcare settings with responsibilities for assessment, treatment, management and education of patients with cardiopulmonary diseases.

Richmond Community College students can earn a degree in Respiratory Therapy from **Fayetteville Technical Community College** after completing two semesters of study at RichmondCC and transferring to FTCC.

FTCC's Respiratory Therapy program prepares individuals to perform the duties of a licensed Registered Respiratory Therapist (RRT). RRTs are a vital member of the healthcare team whose primary focus is maintaining and/or improving a patient's respiratory effort. Respiratory therapists are found in all areas of the hospital, including emergency departments, intensive care units and general care floors. They work with all age groups.

Your studies begin at RichmondCC. Complete two semesters at RichmondCC and transfer 21 credits into FTCC's Respiratory Therapy program for a seamless pathway to earning this degree.

This is a competitive program. Entrance into this program is not guaranteed upon completion of Richmondcc courses. See a Student Advisor for more information.

SOCIAL SERVICES SUPPORT

Social and Human Services (A45380)

The Social and Human Services curriculum prepares students for entry-level positions in institutions and agencies which provide social, community, and behavioral health services. Along with core courses, students take courses which prepare them for specialization in specific human service areas.

Coursework includes the development of professional knowledge, skills, and values in human services. Opportunities for experiential learning allow students to apply knowledge and skills learned in the classroom.

Graduates should qualify for positions in government, private, and nonprofit social and human services agencies. Graduates may choose to transfer and continue their education at a variety of colleges and universities.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

Students must meet eligibility to take college-level coursework through placement tests or other measures. Please see the Student Handbook for further information.

The courses listed on this program guide are the courses currently offered online through Richmond Community College. Please speak to your advisor if you have taken courses at another college or university.

The following courses are part of the North Carolina Articulation Agreement: ACC 120, ACC 121, ANT 220, ART 111, BUS 110, BUS 115, BUS 137, CIS 110, DRA 111, ECO 251, ECO 252, ENG 111, ENG 112, ENG 231, ENG 232, HIS 111, HIS 112, HIS 131, HIS 132, MAT 143, MUS 110, PHI 240, PSY 150, PSY 241, REL 211, REL 212, SOC 210, SOC 213, and SPA 111. The North Carolina Comprehensive Articulation Agreement is a statewide agreement governing transfer credits from North Carolina community colleges to North Carolina public universities and participating private universities. RichmondCC cannot guarantee the transfer of courses to out-of-state universities.

The courses listed on this program guide are the courses currently offered online through Richmond Community College. Please speak to your advisor if you have taken courses at another college or university.

The following courses are part of the North Carolina Articulation Agreement: ACC 120, ACC 121, ANT 220, ART 111, BUS 110, BUS 115, BUS 137, CIS 110, DRA 111, ECO 251, ECO 252, ENG 111, ENG 112, ENG 231, ENG 232, HIS 111, HIS 112, HIS 131, HIS 132, MAT 143, MUS 110, PHI 240, PSY 150, PSY 241, REL 211, REL 212, SOC 210, SOC 213, and SPA 111. The North Carolina Comprehensive Articulation Agreement is a statewide agreement governing transfer credits from North Carolina community colleges to North Carolina public universities and participating private universities. RichmondCC cannot guarantee the transfer of courses to out-of-state universities.

Special Education Residency Licensure (Certificate) (C55550)

The Special ED Residency Certificate curriculum provides a course of study leading to the development of the pedagogical competencies needed to become certified to teach Special Education by the North Carolina Department of Public Instruction.

Course work includes learning theory, instructional technology, school policies and procedures, expectations and responsibilities of educators, teaching strategies/methods for specific content/specialty areas, formative/summative assessment, data informed practice, and classroom organization/management to enhance learning for a wide range of student learning needs.

Graduates should meet pedagogical competencies and demonstrate effective teaching practices. Additional requirements, such as pre-service training, passing the state required assessments, and the criteria included in the North Carolina Teacher Evaluation System, are required for licensure.

COURSE REQUIREMENTS

Richmond Community College provides day and evening course sequences for selected programs to enable students to better plan what courses to take to reach their educational goals. However, given the continued increase in the use of technology in instruction and increasing student demand for distance learning courses, the College may offer hybrid, online, web-based and information highway courses in place of traditional courses in any course sequence that is listed. Therefore, students should be aware of this possibility and prepare themselves to successfully function in a hybrid, online, web-based, or information highway course.

The Residency Certificate and its associated courses (EDU 224, EDU 225, EDU 264, EDU 265, EDU 272, and EDU 283) are available only to individuals who have already earned a bachelor's degree and are currently employed as the official teacher of record, or have received a written offer of employment, in a North Carolina public school.

Speech-Language Pathology Assistant – FTCC Pathway (A45730)

The Speech-Language Pathology Assistant curriculum prepares graduates to work under the supervision of a licensed Speech-Language Pathologist, who evaluates, diagnoses, and treats individuals with various communication disorders.

Courses provide instruction in methods of screening for speech, language, and hearing disorders and in following written protocols designed to remedial individual communication problems. Supervised field experiences include working with patients of various ages and with various disorders.

Graduates may be eligible for registration with the North Carolina Board of Examiners for Speech-Language Pathologists and Audiologists and must be supervised by a licensed Speech-Language Pathologist. They may be employed in healthcare or education settings.

Richmond Community College students can earn a Speech-Language Pathology Assistant degree from **Fayetteville Technical Community College** after completing two semesters of study at RichmondCC and transferring to FTCC.

FTCC's Speech-Language Pathology Assistant prepares individuals to work under the supervision of a licensed Speech-Language Pathologist, who evaluates, diagnosis, and treats individuals with various communication disorders. Courses provide instruction in methods of screening for speech, language, and hearing disorders and in following written protocols designed to remediate individual communication disorders.

Your studies begin at RichmondCC. Complete two semesters at RichmondCC and transfer 29 credits into FTCC's Speech-Language Pathology Assistant program for a seamless pathway to earning this degree.

This is a competitive program. Entrance into this program is not guaranteed upon completion of Richmondcc courses. See a Student Advisor for more information.

CAREER AND COLLEGE PROMISE COLLEGE TRANSFER PATHWAY

Career and College Promise Associate Degree Nursing (ADN) Pathway (P1032C)

The Career and College Promise (CCP) ADN Pathway is designed for high school students who wish to begin their educational studies toward the Associate in Nursing degree and a Baccalaureate degree in Nursing. The Pathway is based on Block 1 of the *Uniform Articulation Agreement between the University of North Carolina's Registered Nurse to Bachelor of Science in Nursing programs and the North Carolina Community College Associate Degree Nursing Programs* which was approved by the State Board of Community Colleges and the UNC Board of Governors in February 2015.

A student who completes an Associate in Applied Science (AAS) in Nursing, which includes the courses listed below, with a GPA of at least 2.0 and a grade of C or better and completes the courses in Blocks 2-3 of the *Uniform Articulation Agreement between the University of North Carolina's Registered Nurse to Bachelor of Science in Nursing programs and the North Carolina Community College Associate Degree Nursing Programs* with a GPA of at least 2.0 and a grade of C or better, and who holds a current unrestricted license as a Registered Nurse in North Carolina will have fulfilled the UNC institutions lower-division general education requirements as well as nursing program entry requirements. However, because nursing program admissions are competitive, no student is guaranteed admission to the program of his or her choice.

High school students in the CCP Associate Degree Nursing Pathway to the Associate in General Education Nursing (A1030N) program must complete the entire pathway before taking additional courses in the Associate in General Education Nursing (A1030N) program.

CAREER AND COLLEGE PROMISE COLLEGE TRANSFER PATHWAY Leading to the Associate in Science in Teacher Preparation (P1042T)

The CCP College Transfer Pathway Leading to the Associate in Science in Teacher Preparation is designed for high school students who wish to begin study toward the Associate in Science in Teacher Preparation degree and a baccalaureate degree in teaching in a STEM or technical major.

High school students in the CCP College Transfer Pathway Leading to the Associate in Science in Teacher Preparation must complete the entire pathway before taking additional courses in the Associate in Science in Teacher Preparation degree with the exception of mathematics courses in the Associate in Science in Teacher Preparation.

CAREER AND COLLEGE PROMISE
CAREER AND COLLEGE READY PATHWAY
Leading to Either a CCP Transfer Pathway or CTE Pathway (P9099A)

The CCP Career and College Ready Pathway offers high school students career exploration and college preparatory coursework, facilitating their transition to college or the workforce. Students who complete the required supplemental coursework may qualify for any approved CCP Pathway available at participating colleges.

High school students in a CCP College Transfer Pathway must complete the entire pathway before taking additional courses in the degree.

Continuing Education Programs

Emergency Medical Science

PROGRAM DESCRIPTION

The Emergency Medical Science curriculum provides individuals with the knowledge, skills and attributes to provide advanced emergency medical care as a paramedic for critical and emergent patients who access the emergency medical system. Students who complete this program will be ready to enter the workforce. Students will gain complex knowledge, competency, and experience while employing evidence-based practice under medical oversight and serve as a link from the scene into the healthcare system.

ADMISSION REQUIREMENTS

Applicants for the EMS program must:

- Have an official high school diploma or equivalent transcript (must be at least 17 on or before the official end date of class), OR official college transcript OR Accuplacer Next Generation Reading test and score at least a 237 or higher.
- Have a valid driver's license or state-issued photo ID.
- Provide copy of most recent immunization records (Hep Bx3; MMR x2; Varicella x2; TDAP (within the last 10 years); tuberculosis (TB) skin test or TB gold test within the last 12 months; COVID and flu will depend on clinical location).

COURSE REQUIREMENTS

EMS 4200 EMT Basic Training

Prerequisite: None

The EMT Basic Training course will prepare you for a career as an emergency medical technician (EMT). You will learn life support, basic patient care, and emergency response methods. Upon successful completion of the class, you will earn your EMT certification.

EMS 4400 Paramedic Training

The Paramedic certification course provides you with the knowledge, skills and attributes to provide advanced emergency medical care for critical and emergent patients and prepares you to enter the workforce as a certified paramedic. This program meets the NCOEMS and National EMS Education Standards and AHA guidelines.

Prerequisites:

- ENG-111 with a C or better OR Accuplacer Next Generation Reading with a score of 250 or higher.
- Accuplacer Next Generation Quantitative Reasoning score of 250 or higher.
- MAT-110 with C or better or Accuplacer Math with a score of 250 or higher.
- BIO-163 with a B or better or BIO-165 & BIO-166 or BIO-168 & BIO-169.
- Valid and current EMT certification.

Medical Assisting

PROGRAM DESCRIPTION

Medical Assistants are multiskilled members of the health care team who perform administrative and clinical procedures under the supervision of licensed health care providers. Medical Assistants perform delegated clinical administrative duties within the supervising physician's scope of practice consistent with the MA's education, training, and experience. Such duties shall not constitute the practice of medicine. Physician supervision shall be active and continuous but shall not be construed as necessarily requiring the physical presence of the supervising physician at the time and place that services are rendered.

ADMISSION REQUIREMENTS

Applicants for the Medical Assisting program must:

- Be a high school graduate/equivalent or obtaining within 6 months of completing course.
- Obtain an Accuplacer Next Generation cut score, reading and math, 250, or provide a transcript showing successful completion of college level English and college level Math course.
- Have physical and emotional status compatible with the ability to provide safe Medical Assisting care.

COURSE REQUIREMENTS

MED 3300 Medical Assisting Part I

This course prepares students for a broad range of skills that make medical assistants versatile and valuable to any healthcare team. Students will learn skills to perform duties from the front office to the back office. Core topics include principles of allied health, anatomy and physiology, medical terminology, medical assistant office procedures, and pharmacology. Upon completion, the student will have the knowledge to sit for industry-recognized certifications.

Prerequisite: Accuplacer Next Generation cut score, for reading and math of 250, or provide a transcript showing successful completion of college level English and college level Math course.

MED 3300 Medical Assisting Part II

This course prepares students for a broad range of skills that make medical assistants versatile and valuable to any healthcare team. Students will learn skills to perform duties from the back office. Core topics include anatomy and physiology, medical terminology, phlebotomy, clinical procedures, advanced laboratory procedures and minor medical office surgeries. This course requires students to participate in a clinical externship. Upon completion, the student will have the knowledge to sit for industry-recognized certifications.

Prerequisites: Successful completion of MED 3300 Part I with a grade of B or higher or Program Coordinator Approval (through special admissions considerations) with any of the following:

- 1 year or more of previous relatable work experience
- Proof of successful completion of a current medical administrative certification
- Successful completion of MED-130, MED-131, MED-232 or OST-3000 or OST-3150

Nurse Aide Training

PROGRAM DESCRIPTION

This course will prepare you to successfully complete a state of North Carolina approved competency evaluation examination that allows the nurse aide to be listed on the N.C. Nurse Aide I Registry or listed on the North Carolina Board of Nursing Nurse Aide II Registry. The course includes instructor lectures, videos, role playing methods and hands-on learning.

ADMISSION REQUIREMENTS

Applicants for the Nurse Aide Training program must have:

- Valid driver's license or a state issued picture ID
- Valid Social Security card
- High school diploma or equivalent
- Immunization records
- Current Physical
- Current TB results
- Copy of current NAI certification
- Accuplacer Next Generation Reading score of 250 or higher. A transcript showing successful completion of a college level English course is a substitute for the test score.

COURSE REQUIREMENTS

NAS 3240 Nurse Aide Level I

Prerequisite: None

This course is designed to prepare graduates to provide personal care and perform basic nursing skills for the elderly and other adults. Emphasis on aging process including mental, social and physical needs of the elderly, patient's rights, nutrition management, elimination procedures, safe environment, restorative services, personal and special care procedures and activities, human body structure and function and related common disease/disorders, communication and documentation, death and dying, and roles of the nursing assistant and health team members. A skill/competency evaluation is required. The course includes class, laboratory and clinical learning experiences. Upon satisfactory completion of the course and skill/competency evaluation, the graduate is eligible to apply for listing as a Nurse Aide I by the N.C. Division of Facility Services.

NAS 3242 Nurse Aide Level II

Prerequisite: High School Diploma or GED and listed on the NC Nurse Aide I Registry

This course is designed to prepare graduates to perform more complex skills for patients or residents regardless of the setting. A skill/competency evaluation is required for documenting student competency. The course includes class, laboratory and clinical learning experiences. Upon satisfactory completion of the course and skill/competency evaluation, the graduate is eligible to apply for listing as a Nurse Aide II by the North Carolina Board of Nursing Nurse Aide Registry. In all employment settings, the listed Nursing Assistant II will work under the direction and supervision of licensed personnel.

Pharmacy Technician Training

PROGRAM DESCRIPTION

This course provides students with the training and education required to pass the Pharmacy Technician Certification Board's national exam to become a Certified Pharmacy Technician.

ADMISSION REQUIREMENTS

Applicants for the Pharmacy Technician Training program must:

- Have a high school diploma or GED/high school equivalency or are scheduled to earn a high school diploma or GED/high school equivalency in the next 60 days.
- Score of 250 on RichmondCC's Accuplacer OR have passed MAT-143 or higher.
- Have reliable Internet and computer access is required.
- Have a valid driver's license or ID card with picture and Social Security card.

COURSE REQUIREMENTS

PHM 3250 Pharmacy Technician Training

Prerequisite: None

This course is designed to provide instruction in the technical procedures for preparing and dispensing drugs in the hospital and retail settings under supervision of a registered pharmacist. Topics include drug packaging and labeling, out-patient dispensing, hospital dispensing procedures, controlled substance procedures, inventory control, and non-sterile compounding. Upon completion, students should be able to perform basic supervised dispensing techniques in a variety of pharmacy settings.

Phlebotomy Technician Training

PROGRAM DESCRIPTION

Learn the skills necessary to draw blood specimens in healthcare settings and blood donation centers. Phlebotomists may assist in preparing specimens in the laboratory. They are employed by hospitals, doctor offices and labs. Course topics include venipuncture, specimen handling, record-keeping and the healthcare profession.

ADMISSION REQUIREMENTS

Applicants for the Phlebotomy Technician Training program must have:

- High school diploma or high school equivalency diploma (GED or HiSET) or are scheduled to earn a high school diploma or GED/high school equivalency in the next 12 months.
- Accuplacer Next Generation Reading score of 250 or higher OR must have taken ENG 111 and earned a C or better.
- Valid U.S. government issued Social Security Card
- Valid driver's license or state issued picture ID
- Current TB skin test, flu shot and immunization records
- Health Form

COURSE REQUIREMENTS

PBT 3022 Phlebotomy Experience

Prerequisite: None

This course provides theory and clinical experiences needed for the proper collection of blood and other specimens used for diagnostic testing. Emphasis is placed on ethics, legalities, medical terminology, safety and universal precautions, health care delivery systems, patient relations, anatomy and physiology, and specimen collection. Upon completion, students should be able to safely perform procedures necessary for specimen collections on patients in various health care settings and may be eligible for national certification as phlebotomy technicians. Course may include a clinical component.

Surgical Technology

PROGRAM DESCRIPTION

The surgical technology program is an integral part of the College and offers educational opportunities to qualified individuals who seek a career as a certified surgical technologist. Students pursue a planned course of study, which will help him/her develop the knowledge and skills required to enter the field of surgical technology in accordance with the American Medical Association. The primary goal of surgical technology education is the student's acquisition of knowledge and abilities commensurate with entry-level professional practice as a surgical technologist.

This course is designed to prepare students to achieve the status of Tech in Surgery – Certified. Emphasis is placed on preoperative, intraoperative, and postoperative duties and knowledge. This program includes topics related to infection control, use of personal protective equipment, sterile techniques, decontamination and sterilization standards, and surgical instrumentation and equipment. It also addresses surgical pharmacology, aspects of medical law related to the healthcare setting, support of the operative patient, and safety in the operating room. Upon completion, students should possess the clinical skills to maintain asepsis during surgery, anticipate surgeon needs, and remain attentive to all aspects of the surgical procedure to ensure a safe environment.

ADMISSION REQUIREMENTS

Students will need to have successfully completed these courses to enroll in the program:

- ENG-111 (or equivalent)
- ENG-112 (or equivalent)
- MAT-143 or higher (or equivalent)
- BIO-163 or combination of BIO-165 & BIO-166 (or equivalent)
- College level humanities or sociology or psychology course
- Exhibit computer literacy or completion of college-level computer course

COURSE REQUIREMENTS

The program includes two levels. In addition to classroom hours, the student will participate in skills and clinical experiences. Prospective students need to be aware that clinical, skills and computer laboratory experiences may be taught during day, evening, night, or weekend hours and at different locations based on the availability of appropriate learning experiences for each course. Certain hours for skills or clinical experiences cannot be guaranteed. Transportation to clinical sites is the responsibility of the student.

Because of the academically demanding program of study in the surgical technology program, it is required that a student who anticipates enrolling in the surgical technology program completes several required general education courses prior to admission.

Upon completion, the student receives the Surgical Technology Certificate and is eligible to apply to take the examination for certification as a Tech in Surgery – Certified, TS-C.

SUR 3020 Surgical Technology Level I

Prerequisites: ENG-111, ENG-112, BIO-163 or BIO-165 & BIO-166, SOC-210 or PSY-150

SUR 3020 Surgical Technology Level II

Prerequisites: SUR 3020-Surgical Technology Level I (grade B or higher)

Approved Electives for Curriculum Programs

***APPROVED HUMANITIES/FINE ARTS ELECTIVES**

Students in A.A.S. programs may select a humanities elective from any of the following courses: ART 111, ART 114, ART 115, ART 121, ART 131, ART 171, ART 240, ART 241, ART 281, ART 283, DRA 111, ENG 125, ENG 231, ENG 232, ENG 241, ENG 242, HUM 115, HUM 120, MUS 110, MUS 112, MUS 210, PHI 215, PHI 240, REL 110, REL 211, REL 212.

The above list of courses are currently offered at RichmondCC. Transfer students, please see a counselor for more courses that could satisfy this requirement.

*Associate Degree Nursing Majors who plan to obtain a BSN should take one of the following Humanities/Fine Arts electives: ART 111, MUS 110, or PHI 240.

***APPROVED SOCIAL/BEHAVIORAL SCIENCES ELECTIVES**

Students in A.A.S. programs may select a social/behavioral sciences elective from any of the following courses: ANT 220, ECO 251+, ECO 252+, HIS 111, HIS 112, HIS 121, HIS 131, HIS 132, POL 120, PSY 150, PSY 241, PSY 281, SOC 210, SOC 213, SOC 220, SOC 225, SOC 240.

The above list of courses are currently offered at RichmondCC. Transfer students, please see a counselor for more courses that could satisfy this requirement.

+Some business and accounting curricula require economics and do not accept ECO courses as fulfillment of the social/behavioral sciences elective requirement.

A.A.S. programs do not allow the use of COM courses as a humanities elective.

Course Descriptions

COURSE NUMBERING SYSTEM

Course designations consist of a three-letter course prefix followed by a three-digit number. The course number is followed by the title of the course. Course titles are followed by a sequence of four numbers: (1) class lecture hours per week; (2) lab hours per week; (3) clinical or shop or work experience hours per week; and (4) semester-hour credits (SHC) earned when the course is successfully completed.

Developmental education courses have numbers between 010-099. Examples: DRE 096, DMA 010.

Courses that can only be used for diploma and certificate curriculum have numbers between 100-109 and 200-209. Examples: ENG 102, PSY 101.

All associate degree, diploma, and certificate curriculum courses have numbers between 110-199 and 210-299. Examples: ENG 112, SOC 210.

College Transfer courses are identified in course descriptions with the statements: "This course has been approved to satisfy the Comprehensive Articulation agreement general education core requirement." or "This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement." These courses are approved for transfer to the 16 universities of The University of North Carolina System.

PREREQUISITES AND COREQUISITES

Many courses have prerequisites--other courses that must be completed prior to enrollment. For example, a student must complete PSY 150 before enrolling in PSY 241.

Many courses have developmental English, mathematics, or reading course Prerequisites: for example, DMA 010-050 and DRE 098 must be completed before taking MAT 143. To gain admission to the curriculum courses, students must either pass the appropriate developmental prerequisites or make appropriate scores on the Accuplacer® tests that measure skills in English, mathematics, and reading.

Corequisites are courses that are generally taken at the same time as other related courses: for example, BIO 140 with BIO 140A. In many cases, corequisites may be taken at the same time or earlier. For example, DRE 098 is a corequisite for BUS 110. Students may either complete DRE 098 before taking BUS 110 or they may take DRE 098 at the same time as BUS 110.

REQUIRED ACA COURSES

Students enrolled in programs of study requiring an ACA course will be required to enroll in that course during the first semester enrolled at Richmond Community College. Exceptions from this requirement will be given only upon written approval by the Vice President for Instruction/Chief Academic Officer or the Vice President of Student Services.

	Work/ Class Lab Clinical Credit			
ACA 115 Success & Study Skills	0	2	0	1
Prerequisites: None				
Corequisites: None				
This course provides an orientation to the campus resources and academic skills necessary to achieve educational objectives. Emphasis is placed on an exploration of facilities and services, study skills, library skills, self-assessment, wellness, goal-setting, and critical thinking. Upon completion, students should be able to manage their learning experiences to successfully meet educational goals.				
ACA 122 Transfer & Career Success	0	2	0	1
Prerequisites: None				
Corequisites: None				
This course provides information and strategies necessary to develop clear academic and professional goals beyond the community college experience. Topics include the CAA, college policies and culture, career exploration, gathering information on senior institutions, strategic planning, critical thinking, and communications skills for a successful academic transition. Upon completion, students should be able to develop an academic plan to transition successfully to senior institutions.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>				
ACA 115, ACA 118, and ACA 122 are interchangeable. ACA 118 or ACA 122 may be substituted for ACA 115. Only one ACA course can be used to fulfill graduation requirements.				
ACC 115 College Accounting	3	2	0	4
Prerequisites: None				
Corequisites: None				
This course introduces basic accounting principles for a business. Topics include the complete accounting cycle with end-of-period statements, bank reconciliation, payrolls, and petty cash. Upon completion, students should be able to demonstrate an understanding of accounting principles and apply those skills to a business organization. This course is not intended as a substitute for ACC 120.				
ACC 120 Principles of Financial Accounting	3	2	0	4
Prerequisites: None				
Corequisites: None				
This course introduces business decision-making using accounting information systems. Emphasis is placed on analyzing, summarizing, reporting, and interpreting financial information. Upon completion, students should be able to prepare financial statements, understand the role of financial information in decision-making and address ethical considerations.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>				

		Work/ Class Lab Clinical Credit			
ACC 121	Principles of Managerial Accounting	3	2	0	4
Prerequisites: ACC 120 with minimum grade of "C"					
Corequisites: None					
This course includes a greater emphasis on managerial and cost accounting skills. Emphasis is placed on managerial accounting concepts for external and internal analysis, reporting and decision-making. Upon completion, students should be able to analyze and interpret transactions relating to managerial concepts including product-costing systems.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>					
ACC 122	Principles of Financial Acct II	3	0	0	3
Prerequisites: ACC 120 with minimum grade of "C"					
Corequisites: None					
This course provides additional instruction in the financial accounting concepts and procedures introduced in ACC 120. Emphasis is placed on the analysis of specific balance sheet accounts, with in-depth instruction of the accounting principles applied to these accounts. Upon completion, students should be able to analyze data, prepare journal entries, and prepare reports in compliance with generally accepted accounting principles.					
ACC 129	Individual Income Taxes	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the relevant laws governing individual income taxation. Topics include tax law, electronic research and methodologies, and the use of technology for preparation of individual tax returns. Upon completion, students should be able to analyze basic tax scenarios, research applicable tax law, and complete various individual tax forms.					
ACC 130	Business Income Taxes	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the relevant laws governing business and fiduciary income taxes. Topics include tax law relating to business organizations, electronic research and methodologies, and the use of technology for the preparation of business tax returns. Upon completion, students should be able to analyze basic tax scenarios, research applicable tax law, and complete various business tax forms.					
ACC 140	Payroll Accounting	1	3	0	2
Prerequisites: ACC 115 or ACC 120					
Corequisites: None					
This course covers federal and state laws pertaining to wages, payroll taxes, payroll tax forms, and journal and general ledger transactions. Emphasis is placed on computing wages; calculating social security, income, and unemployment taxes; preparing appropriate payroll tax forms; and journalizing/posting transactions. Upon completion, students should be able to analyze data, make appropriate computations, complete forms, and prepare accounting entries using appropriate technology.					

		Work/ Class Lab Clinical Credit			
ACC 150	Accounting Software Applications	1	3	0	2
Prerequisites: ACC 115 or ACC 120					
Corequisites: None					
This course introduces microcomputer applications related to accounting systems. Topics include general ledger, accounts receivable, accounts payable, inventory, payroll, and correcting, adjusting, and closing entries. Upon completion, students should be able to use a computer accounting package to accurately solve accounting problems.					
ACC 180	Practices in Bookkeeping	3	0	0	3
Prerequisites: ACC 120					
Corequisites: None					
This course provides advanced instruction in bookkeeping and record-keeping functions. Emphasis is placed on mastering adjusting entries, correction of errors, depreciation, payroll, and inventory. Upon completion, students should be able to conduct all key bookkeeping functions for small businesses.					
ACC 220	Intermediate Accounting I	3	2	0	4
Prerequisites: ACC 120 with minimum grade of "C"					
Corequisites: None					
This course is a continuation of the study of accounting principles with in-depth coverage of theoretical concepts and financial statements. Topics include generally accepted accounting principles and extensive analysis of balance sheet components. Upon completion, students should be able to demonstrate competence in the conceptual framework underlying financial accounting, including the application of financial standards.					
ACC 221	Intermediate Accounting II	3	2	0	4
Prerequisites: ACC 220 with a minimum grade of "C"					
Corequisites: None					
This course is a continuation of ACC 220. Emphasis is placed on special problems which may include leases, bonds, investments, ratio analyses, present value applications, accounting changes, and corrections. Upon completion, students should be able to demonstrate an understanding of the principles involved and display an analytical problem-solving ability for the topics covered.					
ACC 225	Cost Accounting	3	0	0	3
Prerequisites: ACC 121 with a minimum grade of "C"					
Corequisites: None					
This course introduces the nature and purposes of cost accounting as an information system for planning and control. Topics include direct materials, direct labor, factory overhead, process, job order, and standard cost systems. Upon completion, students should be able to demonstrate an understanding of the principles involved and display an analytical problem-solving ability for the topics covered.					

	Work/ Class Lab Clinical Credit			
AHR 110 Introduction to Refrigeration	2	6	0	5
Prerequisites: None				
Corequisites: None				
This course introduces the basic refrigeration process used in mechanical refrigeration and air conditioning systems. Topics include terminology, safety, and identification and function of components; refrigeration cycle; and tools and instrumentation used in mechanical refrigeration systems. Upon completion, students should be able to identify refrigeration systems and components, explain the refrigeration process, and use the tools and instrumentation of the trade.				
AHR 111 HVACR Electricity	2	2	0	3
Prerequisites: None				
Corequisites: None				
This course introduces electricity as it applies to HVACR equipment. Emphasis is placed on power sources, interaction of electrical components, wiring of simple circuits, and the use of electrical test equipment. Upon completion, students should be able to demonstrate good wiring practices and the ability to read simple wiring diagrams.				
AHR 112 Heating Technology	2	4	0	4
Prerequisites: None				
Corequisites: None				
This course covers the fundamentals of heating systems. Topics include safety, instrumentation, system operating, efficiency testing, electrical power, and control systems. Upon completion, students should be able to perform maintenance, service, and testing for major components of a heating system.				
AHR 113 Comfort Cooling	2	4	0	4
Prerequisites: None				
Corequisites: None				
This course covers the installation procedures, system operations, and maintenance of residential and light commercial comfort cooling systems. Topics include terminology, component operation, and testing and repair of equipment used to control and produce assured comfort levels. Upon completion, students should be able to use psychometrics, manufacturer specifications, and test instruments to determine proper system operation.				
AHR 114 Heat Pump Technology	2	4	0	4
Prerequisites: AHR 110 or AHR 113				
Corequisites: None				
This course covers the principles of air source and water source heat pumps. Emphasis is placed on safety, modes of operation, defrost systems, refrigerant charging, and system performance. Upon completion, students should be able to understand and analyze system performance and perform routine service procedures.				

	Work/			
	Class	Lab	Clinical	Credit
AHR 115 Refrigeration Systems	2	4	0	4
Prerequisites: AHR 110				
Corequisites: None				
This course introduces refrigeration systems and applications. Topics include defrost methods, safety and operational control, refrigerant piping, refrigerant recovery and charging, and leak testing. Upon completion, students should be able to assist in installing and testing refrigeration systems and perform simple repairs.				
AHR 120 HVACR Maintenance	1	3	0	2
Prerequisites: None				
Corequisites: None				
This course introduces the basic principles of industrial air conditioning and heating systems. Emphasis is placed on preventive maintenance procedures for heating and cooling equipment and related components. Upon completion, students should be able to perform routine preventive maintenance tasks, maintain records, and assist in routine equipment repairs.				
AHR 130 HVAC Controls	2	2	0	3
Prerequisites: AHR 111 or ELC 111 or ELC 112				
Corequisites: None				
This course covers the types of controls found in residential and commercial comfort systems. Topics include electrical and electronic controls, control schematics and diagrams, test instruments, and analysis and troubleshooting of electrical systems. Upon completion, students should be able to diagnose and repair common residential and commercial comfort system controls.				
AHR 151 HVAC Duct Systems I	1	3	0	2
Prerequisites: None				
Corequisites: None				
This course introduces the techniques used to lay out and fabricate duct work commonly found in HVAC systems. Emphasis is placed on the skills required to fabricate duct work. Upon completion, students should be able to layout and fabricate simple duct work.				
AHR 160 Refrigerant Certification	1	0	0	1
Prerequisites: None				
Corequisites: AHR 110, AHR 113, or AHR 120				
This course covers the requirements for the EPA certification examinations. Topics include small appliances, high pressure systems, and low pressure systems. Upon completion, students should be able to demonstrate knowledge of refrigerants and be prepared for the EPA certification examinations.				
AHR 180 HVACR Customer Relations	1	0	0	1
Prerequisites: None				
Corequisites: None				
This course introduces common business and customer relation practices that may be encountered in HVACR. Topics include business practices, appearance of self and vehicle, ways of handling				

customer complaints, invoices, telephone communications, and warranties. Upon completion, students should be able to present themselves to customers in a professional manner, understand how the business operates, complete invoices, and handle complaints.

	Work/ Class Lab Clinical Credit			
AHR 211 Residential System Design	2	2	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the principles and concepts of conventional residential heating and cooling system design. Emphasis is placed on using tables, worksheets, and/or appropriate software to calculate a residential load based on Air Conditioning Contractors of America (ACCA) standards. Upon completion of the course students should be able to calculate a heating and cooling residential load.				
AHR 212 Advanced Comfort Systems	2	6	0	4
Prerequisites: AHR 114				
Corequisites: None				
This course covers advanced comfort systems for residential and commercial applications. Emphasis is placed on the application, maintenance, and servicing of residential and commercial advanced comfort systems. Upon completion, students should be able to test, analyze, troubleshoot, and service multiple types of residential and commercial advanced comfort systems.				
AHR 213 HVACR Building Code	1	2	0	2
Prerequisites: None				
Corequisites: None				
This course covers the North Carolina codes that are applicable to the design of HVACR systems. Topics include current North Carolina codes as applied to HVACR design and service industries. Upon completion, students should be able to demonstrate the correct usage of North Carolina codes that apply to specific areas of the HVACR trade.				
AHR 235 Refrigeration Design	2	2	0	3
Prerequisites: AHR 110				
Corequisites: None				
This course covers the principles of commercial refrigeration system operation and design. Topics include walk-in coolers, walk-in freezers, system components, load calculations, equipment selection, defrost systems, refrigerant line sizing, and electric controls. Upon completion, students should be able to design, adjust, and perform routine service procedures on a commercial refrigeration system.				
ANT 220 Cultural Anthropology	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the nature of human culture. Emphasis is placed on cultural theory, methods of fieldwork, and cross-cultural comparisons in the areas of ethnology, language, and the cultural past. Upon completion, students should be able to demonstrate an understanding of basic cultural processes and how cultural data are collected and analyzed.				

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for social/behavioral sciences in A.A. and A.S. degree programs. This course has been approved to meet the social/behavioral sciences requirement for A.A.S. degree programs.

	Work/ Class Lab Clinical Credit			
ART 111 Art Appreciation	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the origins and historical development of art. Emphasis is placed on the relationship of design principles to various art forms including but not limited to sculpture, painting, and architecture. Upon completion, students should be able to identify and analyze a variety of artistic styles, periods, and media.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for humanities/fine arts in A.A. and A.S. degree programs. This course has been approved to meet the humanities/fine arts requirement for A.A.S. degree programs.</i>				
ART 114 Art History Survey I	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course covers the development of art forms from ancient times to the Renaissance. Emphasis is placed on content, terminology, design, and style. Upon completion, students should be able to demonstrate an historical understanding of art as a product reflective of human social development.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
ART 115 Art History Survey II	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course covers the development of art forms from the Renaissance to the present. Emphasis is placed on content, terminology, design, and style. Upon completion, students should be able to demonstrate an historical understanding of art as a product reflective of human social development.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for humanities/fine arts in A.A. and A.S. degree programs. This course has been approved to meet the humanities/fine arts requirement for A.A.S. degree programs.</i>				
ART 121 Two-Dimensional Design	0	6	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the elements and principles of design as applied to two-dimensional art. Emphasis is placed on the structural elements, the principles of visual organization, and the theories of color mixing and interaction. Upon completion, students should be able to understand and use critical and analytical approaches as they apply to two-dimensional visual art.				

Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.

	Work/ Class Lab Clinical Credit			
ART 122 Three-Dimensional Design	0	6	0	3
Prerequisites: None				
Corequisites: None				
This course introduces basic studio problems in three-dimensional visual design. Emphasis is placed on the structural elements and organizational principles as applied to mass and space. Upon completion, students should be able to apply three-dimensional design concepts.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
ART 131 Drawing I	0	6	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the language of drawing and the use of various drawing materials. Emphasis is placed on drawing techniques, media, and graphic principles. Upon completion, students should be able to demonstrate competence in the use of graphic form and various drawing processes.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs. This course has been approved to meet the humanities/fine arts requirement in A.A.S. degree programs.</i>				
ART 171 Digital Design I	0	6	0	3
Prerequisites: None				
Corequisites: None				
This course is designed to introduce students to the elements and principles of design through the use of digital software. Emphasis is placed on developing composition and design skills using vector, raster, and time-based media. Upon completion, students should be able to identify and use tools in digital software, understand and utilize digital and artistic vocabulary, and employ the principles and elements of design to create artwork using digital means.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
ART 240 Painting I	0	6	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the language of painting and the use of various painting materials. Emphasis is placed on the understanding and use of various painting techniques, media, and color principles. Upon completion, students should be able to demonstrate competence in the use of creative processes directed toward the development of expressive form.				

Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.

	Work/ Class Lab Clinical Credit			
ART 241 Painting II	0	6	0	3
Prerequisites: ART 240				
Corequisites: None				
This course provides a continuing investigation of the materials, processes, and techniques of painting. Emphasis is placed on the exploration of expressive content using a variety of creative processes. Upon completion, students should be able to demonstrate competence in the expanded use of form and variety.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
ART 264 Digital Photography I	0	6	0	3
Prerequisites: None				
Corequisites: None				
This course introduces digital photographic equipment, theory and processes. Emphasis is placed on camera operation, composition, computer photo manipulation and creative expression. Upon completion, students should be able to successfully expose, digitally manipulate, and print a well-conceived composition.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
ART 275 Introduction to Graphic Design	0	6	0	3
Prerequisites: None				
Corequisites: None				
This course introduces students to the field of graphic design. Emphasis is placed on the basic concepts of visual communication, the design process and the ability to evaluate and discuss design issues in a critical manner. Upon completion, students should be able to use contemporary design software and visual language techniques as they apply to creative visual problem-solving involving typography, image manipulation, symbolic representation and page management while being responsive to the relationship between client, designer and audience.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
ART 281 Sculpture I	0	6	0	3
Prerequisites: None				
Corequisites: None				
This course provides an exploration of the creative and technical methods of sculpture with focus on the traditional processes. Emphasis is placed on developing basic skills as they pertain to three-				

dimensional expression in various media. Upon completion, students should be able to show competence in variety of sculptural approaches.

Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.

	Work/ Class Lab Clinical Credit			
ART 283 Ceramics I	0	6	0	3
Prerequisites: None				
Corequisites: None				
This course provides an introduction to three-dimensional design principles using the medium of clay. Emphasis is placed on fundamentals of forming, surface design, glaze application, and firing. Upon completion, students should be able to demonstrate skills in slab and coil construction, simple wheel forms, glaze technique, and creative expression.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
ART 284 Ceramics II	0	6	0	3
Prerequisites: ART 283				
Corequisites: None				
This course covers advanced hand building and wheel techniques. Emphasis is placed on creative expression, surface design, sculptural quality, and glaze effect. Upon completion, students should be able to demonstrate a high level of technical competence in forming and glazing with a development of three-dimensional awareness.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
ART 285 Ceramics III	0	6	0	3
Prerequisites: ART 284				
Corequisites: None				
This course provides the opportunity for advanced self-determined work in sculptural and functional ceramics. Emphasis is placed on developing the technical awareness of clay bodies, slips, engobes, and firing procedures necessary to fulfill the student's artistic goals. Upon completion, students should be able to demonstrate a knowledge of materials and techniques necessary to successfully create original projects in the clay medium.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
ASL 111 Elementary American Sign Language I	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the fundamental elements of American Sign Language within a cultural context. Emphasis is placed on the development of basic expressive and receptive skills, as well				

as practical application through field experience and community engagement. Upon completion, students will be able to comprehend and respond with grammatical accuracy in expressive American Sign Language, demonstrate cultural awareness, and apply foundational ASL skills in real-world settings.

Note: This course has been approved for transfer under the CAA as a general education course in Humanities/Fine Arts. This course has been approved for transfer under the ICAA as a general education course in Humanities/Fine Arts.

		Work/ Class Lab Clinical Credit			
ASL 112	Elementary American Sign Language II	3	0	0	3
Prerequisites: ASL 111					
Corequisites: None					
This course is designed to be a continuation of ASL 111 focusing on the fundamental elements of American Sign Language in a cultural context. Emphasis is placed on the progressive development of expressive and receptive skills, along with practical application through field experience. Upon completion, students should be able to comprehend and respond with increasing accuracy to expressive American Sign Language, demonstrate cultural awareness, and apply their skills in real-world communication settings.					
<i>Note: This course has been approved for transfer under the CAA as a general education course in Humanities/Fine Arts. This course has been approved for transfer under the ICAA as a general education course in Humanities/Fine Arts.</i>					
ASL 211	Intermediate ASL I	3	0	0	3
Prerequisites: ASL 112					
Corequisites: None					
This course provides a review and expansion of the essential skills of American Sign Language. Emphasis is placed on the progressive development of expressive and receptive skills, study of authentic and representative literacy and cultural texts, and practical application through field experience. Upon completion, students should be able to communicate effectively, accurately, and creatively using American Sign Language about the past, present, and future, and apply their skills in real-world settings.					
<i>Note: This course has been approved for transfer under the CAA as a general education course in Humanities/Fine Arts. This course has been approved for transfer under the ICAA as a general education course in Humanities/Fine Arts.</i>					
ASL 212	Intermediate ASL II	3	0	0	3
Prerequisites: ASL 211					
Corequisites: None					
This course provides a continuation of ASL 211. Emphasis is placed on the continued development of expressive and receptive skills, the study of authentic and representative literary and cultural texts, and the practical application of skills through field experience. Upon completion, students should be able to communicate spontaneously and accurately in American Sign Language with increasing complexity, sophistication, and cultural fluency in real-world contexts.					
<i>Note: This course has been approved for transfer under the CAA as a general education course in Humanities/Fine Arts. This course has been approved for transfer under the ICAA as a general education course in Humanities/Fine Arts.</i>					

		Work/ Class Lab Clinical Credit			
AST 111 Descriptive Astronomy		3	0	0	3
Prerequisites: None					
Corequisites: AST 111A					
This course introduces an overall view of modern astronomy. Topics include an overview of the solar system, the sun, stars, galaxies, and the larger universe. Upon completion, students should be able to demonstrate an understanding of the universe around them.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in the A.A. degree program. This course has been approved to meet the natural sciences requirement in A.A.S. degree programs.</i>					
AST 111A Descriptive Astronomy Lab		0	2	0	1
Prerequisites: None					
Corequisites: AST 111					
The course is a laboratory to accompany AST 111. Emphasis is placed on laboratory experiences which enhance the materials presented in AST 111 and which provide practical experience. Upon completion, students should be able to demonstrate an understanding of the universe around them.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in the A.A. degree program. This course has been approved to meet the natural sciences requirement in A.A.S. degree programs.</i>					
ATR 112 Introduction to Automation		2	3	0	3
Prerequisites: ELN 260					
Corequisites: None					
This course introduces the basic principles of automated systems and describes the tasks that technicians perform on the job. Topics include the history, development, and current applications of robots and automated systems including their configuration, operation, components, and controls. Upon completion, students should be able to understand the basic concepts of automation and robotic systems.					
ATR 120 Introduction to Autonomous Vehicles		2	2	0	3
Prerequisites: ELC 128 or ELN 260					
Corequisites: None					
This course introduces trends, control technologies, and applications of piloted and autonomous vehicles. Topics include the current and future trends in technology, design constraints, control systems, data transmission, programming, and the remote or autonomous piloting of vehicles. Upon completion, students should be able to identify and explain common functionality of autonomous vehicle systems, designs, programming, control systems, data transmission requirements, and remote operation.					

		Work/ Class Lab Clinical Credit			
ATR 211	Robot Programming	2	3	0	3
Prerequisites: ELN 260					
Corequisites: None					
This course provides the operational characteristics of robots and programming in their respective languages. Topics include robot programming, teach pendants, PLC integration, operator interfaces, the interaction of external sensors, machine vision, network systems, and other related devices. Upon completion, students should be able to program and demonstrate the operation of various robots.					
BIO 110	Principles of Biology	3	3	0	4
Prerequisites: None					
Corequisites: None					
This course provides a survey of fundamental biological principles for non-science majors. Emphasis is placed on basic chemistry, cell biology, metabolism, genetics, evolution, ecology, diversity, and other related topics. Upon completion, students should be able to demonstrate increased knowledge and better understanding of biology as it applies to everyday life.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in A.A. and A.S. degree programs. This course has been approved to meet the natural sciences requirement in A.A.S. degree programs.</i>					
BIO 111	General Biology I	3	3	0	4
Prerequisites: None					
Corequisites: None					
This course introduces the principles and concepts of biology. Emphasis is placed on basic biological chemistry, molecular and cellular biology, metabolism and energy transformation, genetics, evolution, and other related topics. Upon completion, students should be able to demonstrate understanding of life at the molecular and cellular levels.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in A.A. and A.S. degree programs. This course has been approved to meet the natural sciences requirement in A.A.S. degree programs.</i>					
BIO 112	General Biology II	3	3	0	4
Prerequisites: BIO 111					
Corequisites: None					
This course is a continuation of BIO 111. Emphasis is placed on organisms, evolution, biodiversity, plant and animal systems, ecology, and other related topics. Upon completion, students should be able to demonstrate comprehension of life at the organismal and ecological levels.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in the A.S. degree program. This course has been approved to meet the natural sciences requirement in A.A.S. degree programs.</i>					

		Work/ Class Lab Clinical Credit			
BIO 140	Environmental Biology	3	0	0	3
Prerequisites: None					
Corequisites: BIO 140A					
This course introduces environmental processes and the influence of human activities upon them. Topics include ecological concepts, population growth, natural resources, and a focus on current environmental problems from scientific, social, political, and economic perspectives. Upon completion, students should be able to demonstrate an understanding of environmental interrelationships and of contemporary environmental issues.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for natural sciences in A.A., A.S., and A.A.S. degree programs.</i>					
BIO 140A	Environmental Biology Lab	0	3	0	1
Prerequisites: None					
Corequisites: BIO 140					
This course provides a laboratory component to complement BIO 140. Emphasis is placed on laboratory and field experience. Upon completion, students should be able to demonstrate a practical understanding of environmental interrelationships and of contemporary environmental issues.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for natural sciences in A.A., A.S., and A.A.S. degree programs.</i>					
BIO 163	Basic Anatomy and Physiology	4	2	0	5
Prerequisites: None					
Corequisites: None					
This course provides a basic study of the structure and function of the human body. Topics include a basic study of the body systems as well as an introduction to homeostasis, cells, tissues, nutrition, acid-base balance, and electrolytes. Upon completion, students should be able to demonstrate a basic understanding of the fundamental principles of anatomy and physiology and their interrelationships.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs. This course has been approved to meet the natural sciences requirement in A.A.S. degree programs.</i>					
BIO 165	Anatomy and Physiology I	3	3	0	4
Prerequisites: None					
Corequisites: None					
This course is the first of a two-course sequence which provides a comprehensive study of the anatomy and physiology of the human body. Topics include the structure, function, and interrelationship of organ systems with emphasis on the processes which maintain homeostasis. Upon completion, students should be able to demonstrate an in-depth understanding of principles of anatomy and physiology and their interrelationships.					

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs. This course has been approved to meet the natural sciences requirement in A.A.S. degree programs.

		Work/			
		Class	Lab	Clinical	Credit
BIO 166	Anatomy and Physiology II	3	3	0	4
Prerequisites: BIO 165					
Corequisites: None					
This course is the second in a two-course sequence which provides a comprehensive study of the anatomy and physiology of the human body. Topics include the structure, function, and interrelationship of organ systems with emphasis on the processes which maintain homeostasis. Upon completion, students should be able to demonstrate an in-depth understanding of principles of anatomy and physiology and the interrelationships of all body systems.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs. This course has been approved to meet the natural sciences requirement in A.A.S. degree programs.</i>					
BIO 275	Microbiology	3	3	0	4
Prerequisites: BIO 111, or BIO 163, or BIO 165					
Corequisites: None					
This course covers principles of microbiology and the impact these organisms have on man and the environment. Topics include the various groups of microorganisms, their structure, physiology, genetics, microbial pathogenicity, infectious diseases, immunology, and selected practical applications. Upon completion, students should be able to demonstrate knowledge and skills including microscopy, aseptic technique, staining, culture methods, and identification of microorganisms.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs. This course has been approved to meet the natural sciences requirement in A.A.S. degree programs.</i>					
BUS 110	Introduction to Business	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides a survey of the business world. Topics include the basic principles and practices of contemporary business. Upon completion, students should be able to demonstrate an understanding of business concepts as a foundation for studying other business subjects.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>					
BUS 115	Business Law I	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the student to the legal and ethical framework of business. Contracts, negotiable instruments, the law of sales, torts, crimes, constitutional law, the Uniform Commercial Code, and the court systems are examined. Upon completion the student should be able to identify legal and ethical issues that arise in business decisions and the laws that apply to them.					

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.

	Work/ Class Lab Clinical Credit			
BUS 121 Business Mathematics	2	2	0	3
Prerequisites: None				
Corequisites: None				
This course covers fundamental mathematical operations and their application to business problems. Topics include payroll, pricing, interest and discount, commission, taxes, and other pertinent uses of mathematics in the field of business. Upon completion, students should be able to apply mathematical concepts to business.				
BUS 125 Personal Finance	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course provides a study of individual and family financial decisions. Emphasis is placed on building useful skills in buying, managing finances, increasing resources, and coping with current economic conditions. Upon completion, students should be able to develop a personal financial plan.				
BUS 137 Principles of Management	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course is designed to be an overview of the major functions of management. Emphasis is placed on planning, organizing, controlling, directing, and communicating. Upon completion, students should be able to work as contributing members of a team utilizing these functions of management.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>				
BUS 139 Entrepreneurship I	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course provides an introduction to the principles of entrepreneurship. Topics include self-analysis of entrepreneurship readiness, the role of entrepreneur in economic development, legal problems, organizational structure, sources of financing, budgeting, and cash flow. Upon completion, students should have an understanding of the entrepreneurial process and issues faced by entrepreneurs.				
BUS 153 Human Resource Management	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the functions of personnel/human resource management within an organization. Topics include equal opportunity and the legal environment, recruitment and selection, performance appraisal, employee development, compensation planning, and employee				

relations. Upon completion, students should be able to anticipate and resolve human resource concerns.

		Work/ Class Lab Clinical Credit			
BUS 217	Employment Law and Regulations	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the principle laws and regulations affecting public and private organizations and their employees or prospective employees. Topics include fair employment practices, EEO, affirmative action, and employee rights and protections. Upon completion, students should be able to evaluate organization policy for compliance and assure that decisions are not contrary to law.					
BUS 230	Small Business Management	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the challenges of entrepreneurship including the startup and operation of a small business. Topics include market research techniques, feasibility studies, site analysis, financing alternatives, and managerial decision making. Upon completion, students should be able to develop a small business plan.					
BUS 234	Training & Development	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers developing, conducting, and evaluating employee training with attention to adult learning principles. Emphasis is placed on conducting a needs assessment, using various instructional approaches, designing the learning environment, and locating learning resources. Upon completion, students should be able to design, conduct, and evaluate a training program.					
BUS 239	Business Applications Capstone	2	2	0	3
Prerequisites: ACC 120, BUS 115, BUS 137, MKT 120, and either ECO 151, ECO 251, or ECO 252					
Corequisites: None					
This course is designed as a capstone course for Business Administration majors. Emphasis is placed on decision making in the areas of management, marketing, production, purchasing, and finance. Upon completion, students should be able to apply the techniques, processes, and vital professional skills needed in the work place.					
BUS 256	Recruit Select & Personal Planning	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the basic principles involved in managing the employment process. Topics include personnel planning, recruiting, interviewing and screening techniques, maintaining employee records; and voluntary and involuntary separations. Upon completion, students should be able to acquire and retain employees who match position requirements and fulfill organizational objectives.					

		Work/ Class Lab Clinical Credit			
BUS 260	Business Communication	3	0	0	3
Prerequisites: ENG 111					
Corequisites: None					
This course is designed to develop skills in writing business communications. Emphasis is placed on business reports, correspondence, and professional presentations. Upon completion, students should be able to communicate effectively in the workplace.					
CAS 110	Perspectives on Child Maltreatment & Advocacy	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers the critical examination of child maltreatment and advocacy. Emphasis is placed on the history, comparative perspectives, legal framework, responses to child maltreatment, pertinent issues in maltreatment and advocacy. Upon completion, students should be able to apply the knowledge and skills necessary for recognition and advocacy on behalf of child victims.					
CAS 120	Cultural Awareness in Child Maltreatment & Advocacy	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course is designed to deepen students' understanding of the intersection between cultural dynamics and child maltreatment, emphasizing the significance of cultural awareness in effective advocacy. Emphasis is placed on an exploration of diverse cultural contexts, promoting cultural competence as an integral aspect of advocating for the rights and well-being of children. Upon completion, students should be able to navigate the complexities of child maltreatment while respecting and valuing the diverse backgrounds of children and families.					
CAS 210	Professional & System Responses to Child Maltreatment	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course is designed to focus on the responses of professionals to allegations of child maltreatment. Emphasis is placed on the multifaceted nature of child abuse and neglect and explores evidence-based strategies for intervention, prevention, and collaboration across diverse professional settings. Upon completion, student should be able to identify the knowledge, skills, and ethical considerations essential for responding effectively to child maltreatment within various systems.					
CAS 220	Responding to the Survivor of Child Abuse	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course is designed to equip students with the knowledge, skills, and compassion necessary to effectively recognize and respond to the effects of child maltreatment. Emphasis is placed on intervention strategies for children and their families, exploring the multifaceted dimensions of child abuse, emphasizing trauma-informed approaches, and the cultivation of a supportive environment for survivors. Upon completion, students should be able to demonstrate the practical					

skills and compassionate mindset needed to effectively recognize, respond to, and support survivors of child maltreatment.

	Work/ Class Lab Clinical Credit			
CHM 131 Introduction to Chemistry	3	0	0	3
Prerequisites: None				
Corequisites: CHM 131A				
This course introduces the fundamental concepts of inorganic chemistry. Topics include measurement, matter and energy, atomic and molecular structure, nuclear chemistry, stoichiometry, chemical formulas and reactions, chemical bonding, gas laws, solutions, and acids and bases. Upon completion, students should be able to demonstrate a basic understanding of chemistry as it applies to other fields.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for natural sciences in A.A., A.S., and A.A.S. degree programs.</i>				
CHM 131A Introduction to Chemistry Lab	0	3	0	1
Prerequisites: None				
Corequisites: CHM 131				
This course is a laboratory to accompany CHM 131. Emphasis is placed on laboratory experiences that enhance materials presented in CHM 131. Upon completion, students should be able to utilize basic laboratory procedures and apply them to chemical principles presented in CHM 131.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for natural sciences in A.A., A.S., and A.A.S. degree programs.</i>				
CHM 151 General Chemistry I	3	3	0	4
Prerequisites: None				
Corequisites: MAT 143 or MAT 152 or MAT 171 or MAT 271				
This course covers fundamental principles and laws of chemistry. Topics include measurement, atomic and molecular structure, periodicity, chemical reactions, chemical bonding, stoichiometry, thermochemistry, gas laws, and solutions. Upon completion, students should be able to demonstrate an understanding of fundamental chemical laws and concepts as needed in CHM 152.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in A.A. and A.S. degree programs. This course has been approved to meet the natural sciences requirement in A.A.S. degree programs.</i>				
CHM 152 General Chemistry II	3	3	0	4
Prerequisites: CHM 151				
Corequisites: None				
This course provides a continuation of the study of the fundamental principles and laws of chemistry. Topics include kinetics, equilibrium, ionic and redox equations, acid-base theory, electrochemistry, thermodynamics, introduction to nuclear and organic chemistry, and complex ions. Upon completion, students should be able to demonstrate an understanding of chemical concepts as needed to pursue further study in chemistry and related professional fields.				

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in the A.S. degree program. This course has been approved to meet the natural sciences requirement in A.A.S. degree programs.

	Work/ Class Lab Clinical Credit			
CHM 251 Organic Chemistry I	3	3	0	4
Prerequisites: CHM 152				
Corequisites: None				
This course provides a systematic study of the theories, principles, and techniques of organic chemistry. Topics include nomenclature, structure, properties, reactions, and mechanisms of hydrocarbons, alkyl halides, alcohols, and ethers; further topics include isomerization, stereochemistry, and spectroscopy. Upon completion, students should be able to demonstrate an understanding of the fundamental concepts of covered organic topics as needed in CHM 252.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>				
CHM 252 Organic Chemistry II	3	3	0	4
Prerequisites: CHM 251				
Corequisites: None				
This course provides continuation of the systematic study of the theories, principles, and techniques of organic chemistry. Topics include nomenclature, structure, properties, reactions, and mechanisms of aromatics, aldehydes, ketones, carboxylic acids and derivatives, amines and heterocyclics; multi-step synthesis will be emphasized. Upon completion, students should be able to demonstrate an understanding of organic concepts as needed to pursue further study in chemistry and related professional fields.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>				
CIS 110 Introduction to Computers	2	2	0	3
Prerequisites: None				
Corequisites: None				
This course introduces computer concepts, including fundamental functions and operations of the computer. Topics include identification of hardware components, basic computer operations, security issues, and use of software applications. Upon completion, students should be able to demonstrate an understanding of the role and function of computers and use the computer to solve problems.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for mathematics in A.A. and A.S. degree programs.</i>				
CIS 115 Introduction to Programming & Logic	2	3	0	3
Prerequisites: MAT 025				
Corequisites: None				
This course introduces computer programming and problem solving in a structured program logic environment. Topics include language syntax, data types, program organization, problem solving				

methods, algorithm design, and logic control structures. Upon completion, students should be able to manage files with operating system commands, use top-down algorithm design, and implement algorithmic solutions in a programming language.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for mathematics in A.A. and A.S. degree programs.

		Work/			
		Class	Lab	Clinical	Credit
CJC 111	Introduction to Criminal Justice	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the components and processes of the criminal justice system. Topics include history, structure, functions, and philosophy of the criminal justice system and their relationship to life in our society. Upon completion, students should be able to define and describe the major system components and their interrelationships and evaluate career options.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>					
CJC 112	Criminology	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces deviant behavior as it relates to criminal activity. Topics include theories of crime causation; statistical analysis of criminal behavior; past, present, and future social control initiatives; and other related topics. Upon completion, students should be able to explain and discuss various theories of crime causation and societal response.					
CJC 113	Juvenile Justice	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers the juvenile justice system and related juvenile issues. Topics include an overview of the juvenile justice system, treatment and prevention programs, special areas and laws unique to juveniles, and other related topics. Upon completion, students should be able to identify/discuss juvenile court structure/procedures, function and jurisdiction of juvenile agencies, processing/detention of juveniles, and case disposition.					
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>					
CJC 121	Law Enforcement Operations	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces fundamental law enforcement operations. Topics include the contemporary evolution of law enforcement operations and related issues. Upon completion, students should be able to explain theories, practices, and issues related to law enforcement operations.					

Please Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.

		Work/ Class Lab Clinical Credit			
CJC 131 Criminal Law		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers the history/evolution/principles and contemporary applications of criminal law. Topics include sources of substantive law, classification of crimes, parties to crime, elements of crimes, matters of criminal responsibility, and other related topics. Upon completion, students should be able to discuss the sources of law and identify, interpret, and apply the appropriate statutes/elements.					
CJC 132 Court Procedure & Evidence		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers judicial structure/process/procedure from incident to disposition, kinds and degrees of evidence, and the rules governing admissibility of evidence in court. Topics include consideration of state and federal courts, arrest, search and seizure laws, exclusionary and statutory rules of evidence, and other related issues. Upon completion, students should be able to identify and discuss procedures necessary to establish a lawful arrest/search, proper judicial procedures, and the admissibility of evidence.					
CJC 141 Corrections		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers the history, major philosophies, components, and current practices and problems of the field of corrections. Topics include historical evolution, functions of the various components, alternatives to incarceration, treatment programs, inmate control, and other related topics. Upon completion, students should be able to explain the various components, processes, and functions of the correctional system.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>					
CJC 160 Terrorism: Underlying Issues		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course identifies the fundamental reasons why America is a target for terrorists, covering various domestic/international terrorist groups and ideologies from a historical aspect. Emphasis is placed upon recognition of terrorist crime scene; weapons of mass destruction; chemical, biological, and nuclear terrorism; and planning considerations involving threat assessments. Upon completion, students should be able to identify and discuss the methods used in terrorists' activities and complete a threat assessment for terrorists' incidents.					

		Work/ Class Lab Clinical Credit			
CJC 212	Ethics & Community Relations	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers ethical considerations and accepted standards applicable to criminal justice organizations and professionals. Topics include ethical systems; social change, values, and norms; cultural diversity; citizen involvement in criminal justice issues; and other related topics. Upon completion, students should be able to apply ethical considerations to the decision-making process in identifiable criminal justice situations.					
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>					
CJC 215	Organization & Administration	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the components and functions of organization and administration as it applies to the agencies of the criminal justice system. Topics include operations/functions of organizations; recruiting, training, and retention of personnel; funding and budgeting; communications; span of control and discretion; and other related topics. Upon completion, students should be able to identify and discuss the basic components and functions of a criminal justice organization and its administrative operations.					
CJC 221	Investigative Principles	3	2	0	4
Prerequisites: None					
Corequisites: None					
This course introduces the theories and fundamentals of the investigative process. Topics include crime scene/incident processing, information gathering techniques, collection/preservation of evidence, preparation of appropriate reports, court presentations, and other related topics. Upon completion, students should be able to identify, explain, and demonstrate the techniques of the investigative process, report preparation, and courtroom presentation.					
CJC 222	Criminalistics	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers the functions of the forensic laboratory and its relationship to successful criminal investigations and prosecutions. Topics include advanced crime scene processing, investigative techniques, current forensic technologies, and other related topics. Upon completion, students should be able to identify and collect relevant evidence at simulated crime scenes and request appropriate laboratory analysis of submitted evidence.					
CJC 231	Constitutional Law	3	0	0	3
Prerequisites: None					
Corequisites: None					
The course covers the impact of the Constitution of the United States and its amendments on the criminal justice system. Topics include the structure of the Constitution and its amendments, court					

decisions pertinent to contemporary criminal justice issues, and other related topics. Upon completion, students should be able to identify/discuss the basic structure of the United States Constitution and the rights/procedures as interpreted by the courts.

		Work/			
		Class	Lab	Clinical	Credit
CJC 233	Correctional Law	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces statutory/case law pertinent to correctional concepts, facilities, and related practices. Topics include examination of major legal issues encompassing incarceration, probation, parole, restitution, pardon, restoration of rights, and other related topics. Upon completion, students should be able to identify/discuss legal issues which directly affect correctional systems and personnel.					
COM 120	Intro to Interpersonal Communication	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the practices and principles of interpersonal communication in both dyadic and group settings. Emphasis is placed on the communication process, perception, listening, self-disclosure, speech apprehension, ethics, nonverbal communication, conflict, power, and dysfunctional communication relationships. Upon completion, students should be able to demonstrate interpersonal communication skills, apply basic principles of group discussion, and manage conflict in interpersonal communication situations.					
<i>Note: This course has been approved for transfer under the CAA as a general education course in Communication. This course has been approved for transfer under the ICAA as a general education course in Communication.</i>					
COM 231	Public Speaking	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides instruction and experience in preparation and delivery of speeches within a public setting and group discussion. Emphasis is placed on research, preparation, delivery, and evaluation of informative, persuasive, and special occasion public speaking. Upon completion, students should be able to prepare and deliver well-organized speeches and participate in group discussions with appropriate audiovisual support.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for communications in A.A. and A.S. degree programs. This course has been approved to meet the communications requirement in A.A.S. degree programs.</i>					
CSC 151	JAVA Programming	2	3	0	3
Prerequisites: MAT 025					
Corequisites: None					
This course introduces computer programming using the JAVA programming language with object-oriented programming principles. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such					

as the class debugger. Upon completion students should be able to design, code, test, debug JAVA language programs.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.

		Work/ Class Lab Clinical Credit			
CSC 153 C# Programming		2	3	0	3
Prerequisites: CIS 115					
Corequisites: None					
This course introduces computer programming using the C# programming language with object-oriented programming principles. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such as the class debugger. Upon completion, students should be able to design, code, test, debug, and implement objects using the appropriate environment at the beginning level.					
CSC 251 Advanced JAVA Programming		2	3	0	3
Prerequisites: CSC 151					
Corequisites: None					
This course is a continuation of CSC 151 using the JAVA programming language with object-oriented programming principles. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such as the class debugger. Upon completion, students should be able to design, code, test, debug, and implement objects using the appropriate environment.					
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>					
CTI 110 IT Foundations		2	2	0	3
Prerequisites: ENG 025					
Corequisites: None					
This course provides an introduction to technology concepts and current trends in IT. Topics include foundational concepts across various IT domains such as, but not limited to, artificial intelligence, database fundamentals, programming principles, and web development. Upon completion, students should be able to demonstrate knowledge in core IT areas and apply skills critical for their academic and professional success.					
CTI 120 Network & Security Foundations		2	2	0	3
Prerequisites: MAT 025					
Corequisites: None					
This course introduces students to the Network concepts, including networking terminology and protocols, local and wide area networks, and network standards. Emphasis is placed on securing information systems and the various implementation policies. Upon completion, students should be able to perform basic tasks related to networking mathematics, terminology, media and protocols.					

		Work/ Class Lab Clinical Credit			
CTS 115	Info Systems Business Concepts	3	0	0	3
Prerequisites: None					
Corequisites: None					
The course introduces the role of IT in managing business processes and the need for business processes and IT alignment. Emphasis is placed on industry need for understanding business challenges and developing/managing information systems to contribute to the decision-making process based on these challenges. Upon completion, students should be able to demonstrate knowledge of the 'hybrid business manager' and the potential offered by new technology and systems.					
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>					
CTS 120	Hardware/Software Support	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course covers the basic hardware of a personal computer, including installation, operations and interactions with software. Topics include component identification, memory-system, peripheral installation and configuration, preventive maintenance, hardware diagnostics/repair, installation and optimization of system software, commercial programs, system configuration, and device-drivers. Upon completion, students should be able to select appropriate computer equipment and software, upgrade/maintain existing equipment and software, and troubleshoot/repair non-functioning personal computers.					
CTS 130	Spreadsheet	2	2	0	3
Prerequisites: ENG 025, MAT 025					
Corequisites: None					
This course introduces basic spreadsheet design and development. Topics include writing formulas, using functions, enhancing spreadsheets, creating charts, and printing. Upon completion, students should be able to design and print basic spreadsheets and charts.					
CTS 155	Tech Support Functions	2	2	0	3
Prerequisites: CTI 120					
Corequisites: None					
This course introduces a variety of diagnostic and instructional tools that are used to evaluate the performance of technical support technologies. Emphasis is placed on technical support management techniques and support technologies. Upon completion, students should be able to determine the best technologies to support and solve actual technical support problems.					
CTS 220	Advanced Hard/Software Support	2	3	0	3
Prerequisites: CTS 120					
Corequisites: None					
This course provides advanced knowledge and competencies in hardware and operating system technologies for computer technicians to support personal computers. Emphasis is placed on: configuring and upgrading; diagnosis and troubleshooting; as well as preventive maintenance of					

hardware and system software. Upon completion, students should be able to install, configure, diagnose, perform preventive maintenance, and maintain basic networking on personal computers.

		Work/ Class Lab Clinical Credit			
CTS 289	System Support Project	1	4	0	3
Prerequisites: CTI 110, CTI 120, CTS 115, and permission of IT lead instructor					
Corequisites: None					
This course provides an opportunity to complete a significant support project with minimal instructor assistance. Emphasis is placed on written and oral communication skills, project definition, documentation, installation, testing, presentation, and user training. Upon completion, students should be able to complete a project from the definition phase through implementation.					
DBA 110	Database Concepts	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course introduces database design and creation using a DBMS product. Emphasis is placed on data dictionaries, normalization, data integrity, data modeling, and creation of simple tables, queries, reports, and forms. Upon completion, students should be able to design and implement normalized database structures by creating simple database tables, queries, reports, and forms.					
DBA 120	Database Programming I	2	2	0	3
Prerequisites: CTI 110					
Corequisites: None					
This course is designed to develop SQL programming proficiency. Emphasis is placed on data definition, data manipulation, and data control statements as well as on report generation. Upon completion, students should be able to write programs which create, update, and produce reports.					
DFT 151	Computer-Aided Drafting I	2	3	0	3
Prerequisites: ENG 025, MAT 035					
Corequisites: None					
This course introduces CAD software as a drawing tool. Topics include drawing, editing, file management, and plotting. Upon completion, students should be able to produce and plot a CAD drawing.					
DRA 111	Theatre Appreciation	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides a study of the art, craft, and business of the theatre. Emphasis is placed on the audience's appreciation of the work of the playwright, director, actor, designer, producer, and critic. Upon completion, students should be able to demonstrate a vocabulary of theatre terms and to recognize the contributions of various theatre artists.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for humanities/fine arts in A.A., A.S., and A.A.S. degree programs.</i>					

**Work/
Class Lab Clinical Credit**

ECO 251 Principles of Microeconomics**3 0 0 3**

Prerequisites: None

Corequisites: None

This course introduces economic analysis of individual, business, and industry choices in the market economy. Topics include the price mechanism, supply and demand, optimizing economic behavior, costs and revenue, market structures, factor markets, income distribution, market failure, and government intervention. Upon completion, students should be able to identify and evaluate consumer and business alternatives in order to efficiently achieve economic objectives.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for social/behavioral sciences in A.A. and A.S. degree programs. This course has been approved to meet the social/behavioral sciences requirement in A.A.S. degree programs.

ECO 252 Principles of Macroeconomics**3 0 0 3**

Prerequisites: None

Corequisites: None

This course introduces economic analysis of aggregate employment, income, and prices. Topics include major schools of economic thought; aggregate supply and demand; economic measures, fluctuations, and growth; money and banking; stabilization techniques; and international trade. Upon completion, students should be able to evaluate national economic components, conditions, and alternatives for achieving socioeconomic goals.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for social/behavioral science in A.A. and A.S. degree programs. This course has been approved to meet the social/behavioral sciences requirement in A.A.S. degree programs.

EDU 114 Intro to Family Childcare**4 0 0 4**

Prerequisites: None

Corequisites: None

The course introduces the foundational principles, strategies, and best practices for planning and implementing meaningful, developmentally appropriate learning experiences while managing a professional and sustainable family child care setting. Emphasis is placed on addressing the unique challenges of mixed-age group care, supporting diverse developmental needs, building positive family and community partnerships, maintaining professionalism, integrating sound business practices, and promoting self-care for providers to sustain long-term success. Upon completion, students should be able to design, adapt, and implement inclusive activities for infants, toddlers, preschoolers, and school-age children while effectively managing a sustainable family child care business with a focus on professionalism, self-care, and strong family-community collaboration.

EDU 119 Intro to Early Childhood Education**4 0 0 4**

Prerequisites: None

Corequisites: None

This course introduces the foundations of culturally responsive, equitable and inclusive early childhood education, planning intentional developmentally appropriate experiences, learning activities, and teaching strategies for indoor and outdoor environments for all young children,

guidance techniques, and professionalism. Topics include theoretical foundations, national early learning standards, NC Foundations for Early Learning and Development, state regulations, program types, career options, professionalism, ethical conduct, quality inclusive environments, guidance techniques, and curriculum responsive to the needs of each child/family. Upon completion, students should be able to implement developmentally appropriate environments, guidance techniques, schedules, and teaching strategies across developmental domains to support culturally, linguistically, and ability diverse children and their families in inclusive settings, and design a personal career/professional development plan.

	Work/			
	Class	Lab	Clinical	Credit
EDU 120 Intro to School Age Care	4	0	0	4
Prerequisites: None				
Corequisites: None				
This course introduces the foundations of responsive and accessible school-age care and education including planning intentional, developmentally appropriate experiences, learning activities, and teaching strategies for children ages five to twelve. Topics include theoretical foundations, child and school-age development, national and state regulations, program types, career options, professionalism, ethical conduct, quality inclusive environments, guidance strategies, and curriculum responsive to the needs of each child and family. Upon completion, students should be able to implement developmentally appropriate environments, guidance strategies, engaging curriculum and effective teaching strategies across developmental domains while supporting children and families with diverse backgrounds and needs.				
EDU 130 Social Environments for Children	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the impact of social environments on young children's development and the importance of developing supportive, reciprocal relationships across children's various social environments and family circumstances. Topics include recognizing the impact of family/community relationships on child development, respect for family differences, strategies for building/sustaining respectful, reciprocal relationships, resilience, strength-based strategies for working with families and identifying community resources to support children, families, and the classroom. Upon completion, students should be able to demonstrate an understanding of how various family structures, environmental conditions, relationships, stressors, supports, and cultural values create the context for young children's lives by implementing strength-based strategies to support classroom interactions, and communications with families and communities.				
EDU 131 Child, Family, & Community	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course covers the development of partnerships among culturally, linguistically and ability diverse families, children, schools and communities through the use of evidence-based strategies. Emphasis is placed on developing skills and identifying benefits for establishing, and supporting respectful relationships between diverse families, programs/schools, and community agencies/resources reflective of the NAEYC Code of Ethical Conduct and the Code of Ethics for North Carolina Educators. Upon completion, students should be able to identify appropriate relationship				

building strategies between diverse families, children birth through adolescence, schools, and communities and demonstrate a variety of communication skills including appropriate use of technology to support every child.

Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.

	Work/ Class Lab Clinical Credit			
EDU 144 Child Development I	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course includes the theories of child development, observation and assessment, milestones, and factors that influence development, from conception through approximately 36 months. Emphasis is placed on knowledge, observation and assessment of developmental sequences in approaches to play/learning, emotional/social, health/physical, language/communication and cognitive domains. Upon completion, students should be able to compare/contrast typical/atypical developmental characteristics, explain biological and environmental factors that impact development, and identify evidence-based strategies for enhancing development for children that are culturally, linguistically, and ability diverse.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
EDU 145 Child Development II	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course includes the theories of child development, observation and assessment, milestones, and factors that influence development, from preschool through middle childhood. Emphasis is placed on knowledge, observation and assessment of developmental sequences in approaches to play/learning, emotional/social, health/physical, language/communication and cognitive domains. Upon completion, students should be able to compare/contrast typical/atypical developmental characteristics, explain biological and environmental factors that impact development, and identify evidence-based strategies for enhancing development for children that are culturally, linguistically, and ability diverse.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
EDU 146 Child Guidance	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces evidence-based strategies to build nurturing relationships with each child by applying principles and practical techniques to facilitate developmentally appropriate guidance. Topics include designing responsive/supportive learning environments, cultural, linguistic and socio-economic influences on behavior, appropriate expectations, the importance of communication with children/families including using technology and the use of formative				

assessments in establishing intentional strategies for children with unique needs. Upon completion, students should be able to demonstrate direct/indirect strategies to encourage social skills, self-regulation, emotional expression and positive behaviors while recognizing the relationship between children's social, emotional and cognitive development.

		Work/ Class Lab Clinical Credit			
EDU 150	Building an Inclusive Classroom	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides a comprehensive introduction of best strategies for creating and planning an inclusive and diverse environment to meet the individual needs of children using research-based practices. Topics include adaptations and accommodations to the indoor/outdoor classroom environments, materials, schedules, learning experiences, and assistive technologies. Upon completion, students should be able to make adaptations to environments, materials, schedules, learning experiences, and assistive technologies to create inclusive classroom settings.					
EDU 151	Creative Activities	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces developmentally supportive, diverse, equitable, and inclusive creative learning environments with attention to divergent thinking, creative problem-solving, evidence-based teaching practices, and open-ended learning materials and activities that align with the NC Foundations for Early Learning and Development. Emphasis is placed on best practices providing process-driven culturally diverse, learning experiences in art, music, creative movement, dance, and dramatic play integrated across all domains and academic content in indoor/outdoor environments for every young child age birth through age eight. Upon completion, students should be able to observe, examine, create, adapt, and advocate for developmentally appropriate creative learning materials, experiences, and environments for children that are culturally, linguistically, and ability diverse.					
EDU 153	Health, Safety & Nutrition	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers promoting and maintaining the health and well-being of every child. Topics include health and nutritional guidelines, common childhood illnesses, maintaining safe and healthy learning environments, health benefits of active play, recognition and reporting of abuse/neglect, and state regulations. Upon completion, students should be able to apply knowledge of NC Foundations for Early Learning and Development for health, safety, nutritional needs and safe learning environments.					
EDU 154	Social/Emotional/Behavioral Development	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers the emotional/social development of young children and the varied causes, expressions, prevention methods and management strategies of challenging behaviors. Emphasis is placed on culturally responsive and supportive caregiver/family/child relationships, positive					

emotional/social environments, developmental concerns, risk factors, and planning culturally responsive, equitable, developmentally appropriate intervention strategies. Upon completion, students should be able to identify factors that influence emotional/social development, utilize screening measures, and design positive behavioral supports for children and the environment, as well as effective teaching strategies.

		Work/			
		Class	Lab	Clinical	Credit
EDU 157 Active Play		2	2	0	3
Prerequisites: None					
Corequisites: None					
This course introduces physical activities to promote the development of children with diverse abilities, birth through middle childhood. Topics include active play, outdoor learning, design of the environment, development of play skills, loose parts play, nature play, risk/benefit assessment, advocacy, and family/community connection. Upon completion, students should be able to discuss the stages of play, the role of teachers in play, active play environments, advocate for the child's right to play, and plan and assess culturally responsive, equitable and developmentally appropriate experiences using NC Foundations for Early Learning and Development.					
EDU 158 Healthy Lifestyles–Youth		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers maintaining the health and well-being of all school-age children. Topics include health, safety, nutrition, physical activities and environments that promote development, fitness, and healthy lifestyles. Upon completion, students should be able to plan developmentally appropriate, safe/healthy physical activities that support the healthy development of school-age children, be able to plan and identify healthy eating choices that support healthy development as well as design safety policies and procedures and environments that promote healthy lifestyles.					
EDU 159 Health & Safety for Early Childhood		2	0	0	2
Prerequisites: None					
Corequisites: None					
This course covers maintaining the health and safety of young children in licensed child care facilities. Topics include universal precautions, emergency preparedness, early childhood mental health, safety regulations, child maltreatment, shaken baby syndrome, CPR/First Aid, ITS-SIDS, playground safety, medication administration, communicable diseases, immunizations, and transportation. Upon completion, students should be able to safely prevent/manage infectious diseases, medications, food/allergic reactions, transporting children, response to natural disasters, universal precautions, CPR/First Aid, child maltreatment, safety regulations from licensing and sanitation, and foster resilient environments.					
EDU 161 Intro to Exceptional Children		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers children with exceptionalities as life long learners within the context of the community, school and family. Emphasis is placed on inclusion, legal, social/political, environmental, and cultural issues relating to the teaching of children with exceptionalities. Upon					

completion, students should be able to demonstrate knowledge of identification processes, inclusive techniques, and professional practices and attitudes.

	Work/ Class Lab Clinical Credit			
EDU 162 Observation & Assessment in ECE	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the research, benefits, goals, and ethical considerations associated with observation and formative assessment in early childhood education. Emphasis is placed on the implementation of multiple observation/assessment strategies including anecdotal records, event samples, rating scales, and portfolios to identify specific needs of individual children with diverse abilities and to create appropriate learning experiences. Upon completion, students should be able to practice responsible assessment and effectively use tools to assess the child, teacher practices and indoor and outdoor environments to enhance programming; and explain the importance of assessment partnerships with families and other professionals.				
EDU 163 Classroom Management & Instruction	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course examines classroom management and evidence-based instructional strategies that create supportive learning environments to provide culturally, linguistically and developmentally appropriate guidance for school-age populations. Topics include classroom management and organization, teaching strategies, individual student differences and learning styles, ongoing systematic observation, and developmentally appropriate classroom guidance techniques. Upon completion, student should be able to utilize developmentally appropriate behavior management, utilize high-quality instructional strategies that enhance the teaching/learning process and promote students' academic success.				
EDU 173 Becoming a Professional in ECE	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course is an introduction to the early childhood profession. Emphasis is placed on the NAEYC Code of Ethical Conduct, personal growth through involvement in professional organizations, advocacy for children and the profession, and the importance of a professional portfolio. Upon completion, students should be able to identify professional resources and community partners and demonstrate essential advocacy skills while involving oneself in the early childhood field.				
EDU 184 Early Childhood Introductory Practicum	1	3	0	2
Prerequisites: EDU 119				
Corequisites: None				
This course introduces students to early childhood settings and applying skills in a three star (minimum) or NAEYC accredited or equivalent, quality early childhood environment. Emphasis is placed on observing children, assisting in the implementation of developmentally appropriate, culturally responsive, equitable, and ability diverse activities in indoor/outdoor environments for young children, supporting/engaging families, and modeling reflective/professional practices based on national/state guidelines. Upon completion, students should be able to implement				

respectful/reciprocal relationships with children and families, design, implement, and adapt developmentally appropriate activities, plans, and daily routines that align with NC Foundations for Early Learning and Development and demonstrate ethical/professional behaviors as indicated by assignments and onsite/virtual faculty assessments.

	Work/ Class Lab Clinical Credit			
EDU 187 Teaching & Learning for All	3	3	0	4
Prerequisites: None				
Corequisites: None				
This course introduces students to knowledge, concepts, and best practices needed to provide developmentally appropriate, effective, inclusive, and culturally responsive educational experiences in the classroom. Topics include growth and development, learning theory, student motivation, teaching diverse learners, classroom management, inclusive environments, student-centered practices, instructional strategies, teaching methodologies, observation/assessment techniques, educational planning, reflective practice, collaboration, cultural competence, ethics, professionalism, and leadership. Upon completion, students should be able to identify the knowledge, skills, roles, and responsibilities of an effective educator as defined by state and national professional teaching standards.				
EDU 188 Trends/Policies in Early Childhood	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course covers current topics and policies in the diverse and inclusive field of early childhood education that affect young children, families, communities, and professionals. Emphasis is placed on but not limited to advocacy, equity, bias and social justice, emerging research, professionalism, reflective practice, and legal/ethical concerns. Upon completion, student should be able to list, discuss, and explain current trends/policies in early childhood education as well as develop an advocacy plan based on course content.				
EDU 216 Foundations of Education	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the examination of the American educational systems and the teaching profession. Topics include the historical and philosophical influences on education, various perspectives on educational issues, and experiences in birth through grade 12 classrooms. Upon completion, students should be able to reflect on classroom observations, analyze the different educational approaches, including classical/traditional and progressive, and have knowledge of the various roles of educational systems at the federal, state and local level.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
EDU 221 Children with Exceptionalities	3	0	0	3
Prerequisites: EDU 144, EDU 145				
Corequisites: None				

This course covers atypical patterns of child development, inclusive/diverse settings, evidenced-based educational/family plans, differentiated instruction, adaptive materials, and assistive technology. Emphasis is placed on the characteristics of exceptionalities and delays, early intervention/special education, transitions, observation, developmental screening, formative assessment of children, and collaborating with families and community partners. Upon completion, students should be able to recognize diverse abilities, describe the referral process, identify community resources, explain the importance of collaboration with families/professionals, and develop appropriate strategies/adaptations to support children in all environments with best practices as defined by laws, policies and the NC Foundations for Early Learning and Development.

Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.

		Work/ Class Lab Clinical Credit			
EDU 223	Specific Learning Disabilities	3	0	0	3
Prerequisites: EDU 144, EDU 145					
Corequisites: None					
This course provides a comprehensive study of characteristics, alternative assessments, teaching strategies, placement options, inclusion, and family intervention for children with specific learning disabilities. Topics include causes, assessment instruments, learning strategies, and collaborative/inclusion methods for children with specific learning disabilities. Upon completion, students should be able to assist in identifying, assessing, and providing educational interventions for children with specific learning disabilities and their families.					
EDU 224	Foundations, Policies, & Practices in Special Education	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides an overview of federal and state legislation, policies, and procedures guiding K-12 special education programs, emphasizing ethical responsibilities, referral and placement processes, and collaboration among educators, families, and agencies. Emphasis is placed on understanding service delivery models, family and community partnerships, and the impact of research, trends, and legal mandates on programs for children and youth with disabilities. Upon completion, students should be able to explain key policies and procedural safeguards, identify roles in special education service delivery, and apply foundational knowledge to ensure compliance, advocacy, and equitable access for students with exceptional learning needs.					
EDU 225	Instructional & Behavioral Strategies for Inclusive Classrooms	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course covers instructional and behavioral strategies that support diverse students with disabilities in inclusive K-12 settings, focusing on evidence-based practices that promote engagement, achievement, and positive learning outcomes. Topics include differentiation, Universal Design for Learning (UDL), Positive Behavioral Interventions and Supports (PBIS), and					

individualized supports aligned with IEP and 504 requirements to create equitable, responsive learning environments. Upon completion, students should be able to design and implement inclusive instructional plans, adapt materials, procedures, and environments to meet varied learning needs, apply effective behavioral supports, and use data to inform decisions that enhance academic and social-emotional development.

		Work/ Class Lab Clinical Credit			
EDU 230	Development, Diversity, & Resilience in Youth & Secondary Students	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course provides an overview of youth development with an emphasis on understanding how individual, cultural, and contextual factors influence learning, well-being, and resilience in middle and high school settings. Emphasis is placed on applying research-based knowledge of cognitive, social, emotional, and physical development to meet the needs of diverse students, foster motivation and engagement, and support healthy identity formation during the secondary years. Upon completion, students should be able to design learning environments and instructional practices that promote well-being, self-efficacy, and resilience; apply inclusive and developmentally appropriate strategies; and build positive relationships that enhance learning and growth among diverse youth.					
EDU 231	Instructional Methods for Middle Grades Mathematics	3	3	0	4
Prerequisites: None					
Corequisites: None					
This course provides an overview of instructional methods, learning theories, and content knowledge essential for teaching mathematics in the middle grades, emphasizing conceptual understanding, procedural fluency, and mathematical reasoning aligned with the North Carolina Standard Course of Study. Emphasis is placed on designing equitable, student-centered instruction that integrates number systems, algebraic reasoning, geometry, and data analysis with real-world problem-solving, technology use, and culturally responsive teaching practices. Upon completion, students should be able to plan and implement standards-based mathematics lessons, promote critical thinking and problem-solving, address student misconceptions, and adapt instruction to meet the diverse developmental and learning needs of all middle grades students.					
EDU 232	Designing Responsive Mathematics Instruction for Middle Grades	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course introduces assessment strategies, differentiation methods, and applications of mathematical content knowledge to support effective, inclusive teaching in middle grades mathematics classrooms. Topics include formative and summative assessments, data-informed decision-making, Universal Design for Learning (UDL), Positive Behavioral Interventions and Supports (PBIS), and evidence-based strategies for engaging diverse students in mathematical reasoning and inquiry. Upon completion, students should be able to design and apply assessment tools, analyze student data to guide instruction, differentiate lessons to promote equity and access,					

and demonstrate a deep understanding of mathematical concepts that support conceptual growth and achievement for all students.

	Work/			
	Class	Lab	Clinical	Credit
EDU 234 Infants, Toddlers, & Twos	3	0	0	3
Prerequisites: EDU 144				
Corequisites: None				
This course covers the development of high-quality, individualized, responsive/engaging relationships and experiences for infants, toddlers, and twos. Emphasis is placed on typical and atypical child development, working with diverse families to provide positive, supportive, and engaging early learning activities and interactions through field experiences and the application of the NC Foundations for Early Learning and Development. Upon completion, students should be able to demonstrate responsive curriculum planning, respectful relationships and exposure to a variety of developmentally appropriate experiences/materials that support a foundation for healthy development and growth of culturally, linguistically and ability diverse children birth to 36 months.				
EDU 235 School-Age Activities	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces developmentally supportive, inclusive, and creative learning environments for school-age programs, focusing on diverse, equitable, and engaging experiences in art, music, movement, and dramatic play. Emphasis is placed on fostering divergent thinking, creative problem-solving, and integrating process-driven activities across academic subjects in both indoor and outdoor settings. Upon completion, students should be able to observe, analyze, design, adapt, and advocate for creative learning opportunities that reflect the cultural, linguistic, and ability diversity of school-age children, ensuring accessibility and meaningful engagement in developmentally appropriate and inclusive educational experiences.				
EDU 236 School-Age Administration I	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces principles and practices essential to preparing and supporting administrators of programs serving school-age children in before and after school programs, summer care, and intersession care. Topics include program philosophy, policies and procedures, state licensing and regulations, business planning, fiscal and staff management, and fund development. Upon completion, students should be able to articulate a developmentally appropriate program philosophy, ensure compliance with state regulations, develop comprehensive business plans, and explore career development opportunities.				
EDU 237 School-Age Administration II	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course builds on the foundational principles introduced in School Age Administration I, focusing on advanced topics essential for administrators of programs serving school-age children. Topics include advocacy and leadership, public relations, community outreach and partnerships,				

program quality and evaluation, and ethical conduct. Upon completion, students should be able to evaluate program quality, develop advocacy strategies, and integrate community resources into school-age programs.

		Work/			
		Class	Lab	Clinical	Credit
EDU 238	Instructional Methods for Middle Grades Science	3	3	0	4
Prerequisites: None					
Corequisites: None					
This course provides an overview of instructional methods, learning theories, and content knowledge essential for teaching science in the middle grades, emphasizing inquiry, scientific reasoning, and conceptual understanding aligned with the North Carolina Standard Course of Study. Emphasis is placed on designing student-centered, hands-on instruction that integrates life, physical, and earth sciences with real-world applications, technology, and engineering design practices that encourage curiosity and critical thinking. Upon completion, students should be able to plan and implement standards-based science lessons that promote inquiry, data analysis, problem-solving, and evidence-based reasoning while adapting instruction to meet the diverse developmental and learning needs of middle grades students.					
EDU 239	Applying Scientific Inquiry in Middle Grades	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course introduces assessment strategies, differentiation methods, and applications of scientific content knowledge to support effective, inclusive science teaching in the middle grades classroom. Topics include formative and summative assessments, inquiry-based investigations, Universal Design for Learning (UDL), safety and lab management, and evidence-based strategies for engaging all students in scientific exploration and critical thinking. Upon completion, students should be able to design and use assessment tools to measure conceptual understanding, analyze student data to guide instruction, differentiate lessons to promote access and equity, and apply scientific inquiry skills to foster curiosity and achievement among diverse students.					
EDU 246	Early Development, Well-Being, & Resilient Classrooms	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the developmental foundations of young children from birth through kindergarten, emphasizing emotional well-being, resilience, and the creation of nurturing learning environments that promote healthy growth and school readiness. Emphasis is placed on understanding the cognitive, social, emotional, and physical stages of early development; recognizing the impact of relationships, environment, and stress; and applying responsive strategies that support secure attachment and adaptive coping in young children. Upon completion, students should be able to design supportive routines and learning experiences that promote self-regulation, confidence, and resilience; build positive relationships with children and families; and create inclusive, developmentally appropriate environments that strengthen early learning and well-being.					

		Work/ Class Lab Clinical Credit			
EDU 247	Sensory & Physical Disabilities	3	0	0	3
Prerequisites: EDU 144, EDU 145					
Corequisites: None					
This course covers characteristics, intervention strategies, assistive technologies, and inclusive practices for children with sensory and physical disabilities. Topics include inclusive placement options, utilization of support services, other health impairments and family involvement for children with sensory and physical disabilities. Upon completion, students should be able to identify and utilize intervention strategies and service delivery options for those specific disabilities.					
EDU 248	Developmental Delays	3	0	0	3
Prerequisites: EDU 144, EDU 145					
Corequisites: None					
This course covers the causes and assessment of developmental delays and individualized instruction and curriculum for children with developmental delays. Emphasis is placed on definition, characteristics, assessment, educational strategies, inclusion, family involvement, and services for children with developmental delays. Upon completion, students should be able to identify, assess, and plan educational intervention strategies for children with developmental delays and their families.					
EDU 250	Teacher Licensure Preparation	3	0	0	3
Prerequisites: None					
Corequisites: ENG 111 and MAT 143, or MAT 152, or MAT 171					
This course provides information and strategies necessary for transfer to a teacher licensure program at a senior institution. Topics include entry level teacher licensure exam preparation, performance based assessment systems, requirements for entry into teacher education programs, the process to become a licensed teacher in North Carolina, and professionalism including expectations within the field of education. Upon completion, students should be able to utilize educational terminology and demonstrate knowledge of teacher licensure processes including exam preparation, technology based portfolio assessment, and secondary admissions processes to the school of education at a senior institution.					
EDU 255	Curriculum Strategies & Learning Experiences Birth Through Kindergarten	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course provides an overview of developmentally appropriate curriculum strategies and learning experiences for children from birth to age five, focusing on designing, implementing, and evaluating inclusive, responsive, and equitable learning opportunities across diverse early childhood settings. Emphasis is placed on integrating early childhood content domains, aligning curriculum with the NC Foundations for Early Learning and Development, and applying best practices for observation, assessment, and instructional design in culturally and linguistically diverse environments. Upon completion, students should be able to design and implement developmentally appropriate, inclusive, and culturally responsive curriculum plans that reflect best					

practices in early education, support individual and group learning needs, and promote holistic growth across multiple domains of child development.

		Work/			
		Class	Lab	Clinical	Credit
EDU 259 Curriculum Planning		3	0	0	3
Prerequisites: EDU 119					
Corequisites: None					
This course is designed to focus on using content knowledge to build effective developmentally appropriate approaches that are culturally responsive, equitable, and ability diverse for young children. Topics include components of curriculum, a variety of curriculum models, authentic observation and assessment, and planning developmentally appropriate experiences and indoor/outdoor environments aligned with the NC Foundations for Early Learning and Development. Upon completion, students should be able to understand, evaluate, and use developmentally appropriate curriculum to plan for the individual/group needs of young children.					
EDU 260 Birth Through Kindergarten: Assessment & Family Collaboration		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides an overview of assessment practices and family collaboration strategies for children from birth through kindergarten, emphasizing the use of authentic, developmentally appropriate methods to support growth, learning, and equitable outcomes across diverse early childhood settings. Emphasis is placed on observation, documentation, and assessment techniques that respect cultural, linguistic, and ability diversity, as well as strategies for engaging families as active partners in understanding and supporting children's development. Upon completion, students should be able to implement effective assessment practices, analyze and use data to inform curriculum decisions, and collaborate with families to create inclusive, responsive learning environments that promote each child's developmental progress and success.					
EDU 261 Early Childhood Administration I		3	0	0	3
Prerequisites: None					
Corequisites: EDU 119					
This course provides an overview of essential administrative components for managing early childhood programs, including child development, program frameworks, North Carolina child care rules and regulations, effective leadership practices, reflective supervision, and the NAEYC Code of Ethical Conduct. Emphasis is placed on personnel management, financial planning, reflective supervision strategies, child development principles, ethical decision-making, and ensuring compliance with state regulations to maintain high-quality learning environments. Upon completion, students should be able to apply program standards, manage staffing and budgets, implement reflective supervision to support professional growth, integrate child development knowledge into program planning, uphold ethical responsibilities following the NAEYC Code of Ethical Conduct, and navigate regulatory requirements to support successful early childhood program operations.					

		Work/ Class Lab Clinical Credit			
EDU 262	Early Childhood Administration II	3	0	0	3
Prerequisites: EDU 261					
Corequisites: EDU 119					
This course is designed to prepare students for leadership roles in licensed child care facilities in North Carolina by focusing on curriculum development, program assessment, and resource management for centers and families. Emphasis is place on best practices in early childhood curriculum, quality improvement strategies, advocacy, and leadership in early learning environments. Upon completion, students should be able to implement developmentally appropriate curriculum, assess program effectiveness, support families with relevant resources, and advocate for policies that enhance early childhood education and program quality.					
EDU 263	School-Age Program Administration	2	0	0	2
Prerequisites: None					
Corequisites: None					
This course introduces the methods and procedures for development and administration of school-age programs in the public or proprietary setting. Emphasis is placed on the construction and organization of the physical environment. Upon completion, student should be able to plan, develop and administer a quality school-age program.					
EDU 264	Strategies for Adaptive Math Instruction	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course provides a comprehensive introduction of strategies, best practices, and skills to effectively teach math in K-12 special education settings while aligning instruction with NC DPI curriculum standards and the InTASC Model Core Teaching Standards. Topics include number sense and operations; data analysis and probability; mathematical problem solving, communication, and reasoning; technology in math; and algebraic and geometric concepts individualized and tailored to each students' needs across various educational settings. Upon completion, students should be able to assess learning needs, implement and evaluate curriculum, ensure comprehensive and adaptive math instruction to support diverse, equitable and inclusive learning requirements.					
EDU 265	Strategies for Adaptive Literacy Instruction	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course provides a comprehensive introduction to evidence-based strategies, best practices, and instructional skills for teaching reading and writing in K-12 special education settings while aligning with NC DPI curriculum standards and the InTASC Model Core Teaching Standards. Topics include phonological awareness, phonics, fluency, vocabulary, and comprehension; written expression; literacy assessment and progress monitoring; assistive and adaptive technologies; and differentiated instruction for diverse students across general and specialized settings. Upon completion, students should be able to design, implement, and evaluate individualized literacy instruction that fosters language development, reading proficiency, and equitable access to literacy for students with a wide range of learning needs and exceptionalities.					

		Work/ Class Lab Clinical Credit			
EDU 266	Language & Literacy Development Birth Through Kindergarten	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the foundations of language and literacy development in children from birth through age five, emphasizing evidence-based strategies and developmentally appropriate practices that foster communication, comprehension, and early literacy skills across diverse early learning environments. Emphasis is placed on the developmental stages of emergent literacy, including receptive and expressive language, print awareness, and early writing, as well as the influence of cultural, linguistic, and family factors on literacy growth. Upon completion, students should be able to plan, implement, and evaluate inclusive, literacy-rich experiences that promote language and literacy development, select diverse and developmentally appropriate materials, and design integrated activities aligned with the NC Foundations for Early Learning and Development.					
EDU 267	Mathematical Foundations: Birth Through Kindergarten	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the fundamental concepts, developmental progressions, and instructional approaches that support early mathematical learning from birth through kindergarten. Emphasis is placed on understanding how young children construct number sense, spatial reasoning, and problem-solving skills through play, exploration, and meaningful everyday experiences aligned with the North Carolina Foundations for Early Learning and Development. Upon completion, students should be able to design and implement developmentally appropriate learning experiences that foster curiosity, mathematical thinking, and early numeracy; integrate math into daily routines and play; and adapt instruction to meet the diverse needs of young students.					
EDU 268	Instructional Methods for High School Mathematics	3	3	0	4
Prerequisites: None					
Corequisites: None					
This course provides an overview of instructional methods, learning theories, and content knowledge essential for teaching mathematics in high school, emphasizing conceptual understanding, procedural fluency, and mathematical reasoning aligned with the North Carolina Standard Course of Study. Emphasis is placed on designing rigorous, student-centered instruction that integrates algebra, functions, geometry, statistics, and calculus with real-world applications, inquiry-based learning, and the effective use of technology and mathematical modeling. Upon completion, students should be able to plan and implement standards-based mathematics lessons that foster critical thinking, problem-solving, and communication; address student misconceptions; and adapt instruction to meet the diverse developmental and learning needs of secondary students.					

		Work/			
		Class	Lab	Clinical	Credit
EDU 269	Designing Responsive Mathematics Instruction for High School	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course introduces assessment strategies, differentiation methods, and applications of mathematical content knowledge to support effective, data-driven instruction in high school mathematics classrooms. Topics include formative and summative assessments, data analysis for instructional planning, Universal Design for Learning (UDL), Positive Behavioral Interventions and Supports (PBIS), and evidence-based strategies that promote engagement, persistence, and achievement among diverse students. Upon completion, students should be able to design and use varied assessment tools, analyze student performance data to guide instruction, differentiate lessons to enhance access and equity, and apply advanced mathematical concepts in authentic, problem-based learning contexts.					
EDU 270	Effective Instructional Environments	2	0	0	2
Prerequisites: None					
Corequisites: None					
This course is designed to provide learners with the knowledge and skills to create, manage, and assess effective instructional environments, learning attitudes, and behaviors for today's diverse learning population. Topics include organizing the learning environment, fostering positive learning attitudes, supporting healthy stakeholder partnerships, engaging students using effective differentiated instruction, guiding, and managing student behaviors, and assessing student progress. Upon completion of this course, learners will demonstrate effective dispositions of the professional educator that include managing schedules, spaces, and resources, promoting supportive learning mindsets, engaging students with diverse instructional strategies, guiding student behaviors to maximize both the instructional and social climate, and analyzing and effectively responding to student progress.					
EDU 271	Educational Technology	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the appropriate and ethical use of technology that is inclusive of digital and analog materials/tools to enhance teaching and learning in all educational settings. Emphasis is placed on the developmentally appropriate use of technology with children, ethical issues, digital citizenship, instructional strategies, assistive technology, and the use of technology for professional development and communication with families. Upon completion, student should be able to demonstrate professional and ethical implementation of various modes of technology in culturally responsive and equitable ways to support diverse children, families and communities.					
EDU 272	Technology, Data, & Assess	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course is designed to provide students with the knowledge and skills to utilize digital instructional technologies and technology-based assessments to plan and implement appropriate educational experiences and interventions in the classroom. Topics include educational technology					

to enhance instruction, instructional technologies for teaching, technology-based assessment, formative and summative assessments, data to inform practice, and ethical practices for technology and assessment. Upon completion, students will be able to demonstrate effective integration of educational technology into classroom practice, appropriate use of technology-based assessments, and practical application of data to inform educational planning and interventions.

		Work/ Class Lab Clinical Credit			
EDU 273	Instructional Methods for High School Science	3	3	0	4
Prerequisites: None					
Corequisites: None					
This course provides an overview of instructional methods, learning theories, and content knowledge essential for teaching science in high school, emphasizing inquiry, scientific reasoning, and conceptual understanding aligned with the North Carolina Standard Course of Study. Emphasis is placed on designing rigorous, student-centered instruction that integrates biology, chemistry, physics, and earth/environmental science with real-world applications, engineering design, and technology-enhanced investigations that develop critical and analytical thinking. Upon completion, students should be able to plan and implement standards-based science lessons that promote inquiry, data analysis, and scientific communication; address misconceptions; and adapt instruction to meet the developmental and learning needs of diverse secondary students.					
EDU 274	Applying Scientific Inquiry in High School Science	2	3	0	3
Prerequisites: None					
Corequisites: None					
This course introduces assessment strategies, differentiation methods, and applications of scientific content knowledge to support effective, inclusive, and data-driven instruction in high school science classrooms. Topics include formative and summative assessments, data interpretation, Universal Design for Learning (UDL), safety and ethics in laboratory instruction, and evidence-based strategies for engaging diverse students in scientific reasoning and inquiry. Upon completion, students should be able to design and implement varied assessment tools, analyze student data to guide instruction, differentiate science instruction to enhance access and equity, and apply advanced content knowledge to real-world scientific problem solving.					
EDU 275	Effective Teacher Training	2	0	0	2
Prerequisites: None					
Corequisites: None					
This course provides specialized training using an experienced-based approach to learning. Topics include instructional preparation and presentation, student interaction, time management, learning expectations, evaluation, and curriculum principles and planning. Upon completion, students should be able to prepare and present a six-step lesson plan and demonstrate ways to improve students' time-on-task.					
EDU 277	Integrated Curriculum Instr: Math/Science	2	3	0	3
Prerequisites: None					
Corequisites: None					

This course is designed to provide learners with the content knowledge, instructional methods/materials, and assessment techniques needed to provide research-based math and science K - 12 instruction. Topics include essential math and science concepts and skills, developmentally appropriate pedagogy, culturally responsive instruction, standards-based outcomes, technology enhanced lesson planning, formative/summative assessments, research-based interventions, authentic learning experiences, and reflective practice. Upon completion, learners will be able to plan, implement, assess, and reflect on developmentally appropriate math and science instruction aligned to the NC Standard Course of Study, other professional and national standards.

**Work/
Class Lab Clinical Credit**

EDU 278 Integrated Curriculum Instr: Soc Stud/ELA 2 3 0 3

Prerequisites: None

Corequisites: None

This course is designed to provide learners with the content knowledge, instructional methods/materials, and assessment techniques needed to provide research-based social studies and ELA K -12 instruction. Topics include essential social studies and ELA concepts and skills, developmentally appropriate pedagogy, culturally responsive instruction, standards-based outcomes, technology enhanced lesson planning, formative/summative assessments, research-based interventions, authentic learning experiences, and reflective practice. Upon completion, learners will be able to plan, implement, assess, and reflect on developmentally appropriate social studies and ELA instruction aligned to the NC Standard Course of Study, other professional and national standards.

EDU 279 Literacy Development & Instruction 3 3 0 4

Prerequisites: None

Corequisites: None

This course is designed to provide students with concepts and skills of literacy development, instructional methods/materials and assessment techniques needed to provide scientifically-based, systematic reading and writing instruction into educational practice. Topics include literacy concepts, reading and writing development, developmentally appropriate pedagogy, culturally-responsive instruction, standards-based outcomes, lesson planning, formative/summative assessment, recognizing reading difficulties, research-based interventions, authentic learning experiences, classroom implementation, and reflective practice. Upon completion, students should be able to plan, implement, assess, evaluate, and demonstrate developmentally appropriate literacy instruction aligned to the NC Standard Course of Study and other state and national standards.

EDU 280 Language & Literacy Experiences 3 0 0 3

Prerequisites: None

Corequisites: None

This course provides evidence-based strategies for enhancing language and literacy experiences that align with NC Foundations for Early Learning and Development. Topics include developmental sequences for children's emergent receptive and expressive language, print concepts, appropriate observations/assessments, literacy enriched environments, quality selection of diverse literature, interactive media, and inclusive practices. Upon completion, students should be able to select, plan, implement and evaluate developmentally appropriate language and literacy experiences for children who are culturally, linguistically and ability diverse.

	Work/				
	Class	Lab	Clinical	Credit	

EDU 283 Educator Preparation Practicum

2	3	0	3
---	---	---	---

Prerequisites: None

Corequisites: None

This course is designed to allow learners to demonstrate acquired skills and competencies in a developmentally appropriate learning environment. Topics include dispositions of effective teachers, portfolio assessment development, reflective practice, teaching methods, assessment strategies, and professional practices based on state and national Teaching Standards. Upon completion, learners should be able to provide a portfolio assessment with evidence of ethical/professional standards, respect for a diverse population in learning environments, content knowledge, appropriate guidance intervention, and grade-level technology enhanced lesson planning/assessments through practices in the classroom environment.

EDU 284 Early Child Capstone Practicum

1	9	0	4
---	---	---	---

Prerequisites: EDU 119, EDU 144, EDU 145, EDU 146, EDU 151

Corequisites: None

This course is designed to allow students to demonstrate acquired skills in a three star (minimum) or NAEYC accredited or equivalent, quality early childhood environment. Emphasis is placed on designing, implementing and evaluating developmentally appropriate activities and environments for all children; supporting/engaging families; and modeling reflective and professional practices based on national and state guidelines. Upon completion, students should be able to apply NC Foundations for Early Learning and Development to demonstrate developmentally appropriate plans/assessments, appropriate guidance techniques and ethical/professional behaviors, including the use of appropriate technology, as indicated by assignments and onsite faculty assessments.

EGR 150 Introduction to Engineering

1	2	0	2
---	---	---	---

Prerequisites: MAT 035

Corequisites: None

This course is an overview of the engineering profession. Topics include goal setting and career assessment, ethics, public safety, the engineering method and design process, written and oral communication, interpersonal skills and team building, and computer applications. Upon completion, students should be able to understand the engineering process, the engineering profession, and utilize college resources to meet their educational goals.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A., A.E., and A.S. degree programs.

EGR 250 Statics/Strength of Materials

4	3	0	5
---	---	---	---

Prerequisites: MAT 171

Corequisites: None

This course includes vector analysis, equilibrium of force systems, friction, sectional properties, stress/strain, and deformation. Topics include resultants and components of forces, moments and couples, free-body diagrams, shear and moment diagrams, trusses, frames, beams, columns, connections, and combined stresses. Upon completion, students should be able to analyze simple structures.

	Work/			
	Class	Lab	Clinical	Credit
EGR 285 Design Project	0	4	0	2
Prerequisites: ELN 131, ELN 133, ELN 260				
Corequisites: None				
This course provides the opportunity to design an instructor-approved project using previously acquired skills. Emphasis is placed on selection, proposal, design, testing, and documentation of the approved project. Upon completion, students should be able to present and demonstrate projects.				
ELC 112 DC/AC Electricity	3	6	0	5
Prerequisites: MAT 035				
Corequisites: None				
This course introduces the fundamental concepts of and computations related to DC/AC electricity. Emphasis is placed on DC/AC circuits, components, operation of test equipment; and other related topics. Upon completion, students should be able to construct, verify, troubleshoot, and repair DC/AC circuits.				
ELC 117 Motors and Controls	2	6	0	4
Prerequisites: ELC 112 or ELC 131				
Corequisites: None				
This course introduces the fundamental concepts of motors and motor controls. Topics include ladder diagrams, pilot devices, contactors, motor starters, motors, and other control devices. Upon completion, students should be able to properly select, connect, and troubleshoot motors and control circuits.				
ELC 128 Intro to PLC	2	3	0	3
Prerequisites: ELC 112 or ELC 131				
Corequisites: None				
This course introduces the programmable logic controller (PLC) and its associated applications. Topics include ladder logic diagrams, input/output modules, power supplies, surge protection, selection/installation of controllers, and interfacing of controllers with equipment. Upon completion, students should be able to understand basic PLC systems and create simple programs.				
ELC 131 Circuit Analysis I	3	3	0	4
Prerequisites: MAT-035				
Corequisites: None				
This course introduces DC and AC electricity with an emphasis on circuit analysis, measurements, and operation of test equipment. Topics include DC and AC principles, circuit analysis laws and theorems, components, test equipment operation, circuit simulation, and other related topics. Upon completion, students should be able to interpret circuit schematics; design, construct, verify, and analyze DC/AC circuits; and properly use test equipment.				
ELC 213 Instrumentation	3	2	0	4
Prerequisites: ELC 128 or ELN 260				
Corequisites: None				

This course covers the fundamentals of instrumentation used in industry. Emphasis is placed on electric, electronic, and other instruments. Upon completion, students should be able to install, maintain, and calibrate instrumentation.

	Work/			
	Class	Lab	Clinical	Credit
ELN 131 Analog Electronics I	3	3	0	4
Prerequisites: ELC 131				
Corequisites: None				
This course introduces the characteristics and applications on semiconductor devices and circuits. Emphasis is placed on analysis, selection, biasing, and applications. Upon completion, students should be able to construct, analyze, verify, and troubleshoot analog circuits using appropriate techniques and test equipment.				
ELN 133 Digital Electronics	3	3	0	4
Prerequisites: ELC 112 or ELC 131				
Corequisites: None				
This course covers combinational and sequential logic circuits. Topics include number systems, Boolean algebra, logic families, medium scale integration (MSI) and large scale integration (LSI) circuits, analog to digital (AD) and digital to analog (DA) conversion, and other related topics. Upon completion, students should be able to construct, analyze, verify, and troubleshoot digital circuits using appropriate techniques and test equipment.				
ELN 229 Industrial Electronics	3	3	0	4
Prerequisites: ELC 112 or ELC 131				
Corequisites: None				
This course covers semiconductor devices used in industrial applications. Topics include the basic theory, application, and operating characteristics of semiconductor devices. Upon completion, students should be able to construct and/or troubleshoot these devices for proper operation in an industrial electronic circuit.				
ELN 231 Industrial Controls	2	3	0	3
Prerequisites: ELC 112 or ELC 131				
Corequisites: None				
This course introduces the fundamental concepts of control of rotating machinery and associated peripheral devices. Topics include rotating machine theory, ladder logic, electromechanical and solid-state relays, motor controls, pilot devices, three-phase power systems, and other related topics. Upon completion, students should be able to interpret schematics and demonstrate an understanding of electromechanical and electronic control of rotating machinery.				
ELN 232 Introduction to Microprocessors	3	3	0	4
Prerequisites: ELN 133				
Corequisites: None				
This course introduces microprocessor architecture and microcomputer systems including memory and input/output interfacing. Topics include low-level language programming, bus architecture, I/O systems, memory systems, interrupts, and other related topics. Upon completion, students				

should be able to interpret, analyze, verify, and troubleshoot fundamental microprocessor circuits and programs using appropriate techniques and test equipment.

		Work/			
		Class	Lab	Clinical	Credit
ELN 260	Programmable Logic Controllers	3	3	0	4
Prerequisites: ELC 112 or ELC 131					
Corequisites: None					
This course provides a detailed study of PLC applications, with a focus on design of industrial controls using the PLC. Topics include PLC components, memory organization, math instructions, documentation, input/output devices, and applying PLCs in industrial control systems. Upon completion, students should be able to select and program a PLC system to perform a wide variety of industrial control functions.					
EME 111	911 Communications & Operations I	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course is designed to introduce the student to the role of a telecommunicator and the duties and responsibilities performed by the first, first responder in the public safety system. Topics include an introduction to the telecommunicator profession, technology in an emergency communications center, ethics and values, basics of call taking, documenting, and dispatching in a Public Safety Answering Point (PSAP), effective communications, cultural awareness, critical thinking, and problem solving. Upon completion, students should be able to demonstrate an understanding of the role and function of telecommunicators within the 911 system; call processes and radio procedures for law enforcement, fire, and medical dispatch; and the role of telecommunicators within emergency management, incident command, and the Telecommunicator Emergency Response Taskforce (TERT).					
EME 112	911 Communications & Operations II	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course is designed to introduce the student to the various roles, functions, and governance models that impact a Public Safety Answering Point (PSAP). Topics include an introduction to human resources, employee relations, local government finance, federal and local legislation and oversight of a PSAP, cybersecurity policies and procedures, Next Generation technology and applications, policy and procedure writing, and grant writing. Upon completion, students should be able to demonstrate an understanding of human resources processes as a telecommunicator, basic budgeting and finance, general knowledge of cybersecurity practices, Next Generation technology and applications in the PSAP and an introduction to federal and state legislation relating to 911 and grant writing.					
EME 211	Advanced 911 Communications & Operations	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course is designed to provide advanced studies in 911 Communication and Operations for a 911 Telecommunicator. Topics include appropriate telecommunicator response to situations such					

as terrorism, active shooters/active assailants, missing or exploited persons, human trafficking, suicidal callers, domestic violence, and high-priority/low-frequency emergency events, and identification of strategies that support telecommunicator mental and physical wellbeing. Upon completion, students should be able to define and describe terrorism, active shooter, missing and exploited children and persons, human trafficking, suicide intervention involving callers, domestic violence, and critical incidents, and the telecommunicator's roles when these incidents are presented in the Public Safety Answering Point (PSAP).

	Work/ Class Lab Clinical Credit			
EMS 110 EMT	6	6	3	9
Prerequisites: None				
Corequisites: None				
This course introduces basic emergency medical care. Topics include preparatory, airway, patient assessment, medical emergencies, trauma, infants and children, and operations. Upon completion, students should be able to demonstrate the knowledge and skills necessary to achieve North Carolina State or National Registry EMT certification.				
EMS 122 EMS Clinical Practicum I	0	0	3	1
Prerequisites: BIO 163, EMS 110, ENG 111 or appropriate test score, and MAT 143 or appropriate test score				
Corequisites: None				
This course provides the introductory hospital clinical experience for the paramedic student. Emphasis is placed on mastering fundamental paramedic skills. Upon completion, students should be able to demonstrate competency with fundamental paramedic level skills.				
EMS 130 Pharmacology	3	3	0	4
Prerequisites: EMS 110, ENG 111 or appropriate test score, and MAT 143 or appropriate test score				
Corequisites: None				
This course introduces the fundamental principles of pharmacology and medication administration and is required for paramedic certification. Topics include medical terminology, pharmacological concepts, weights, measures, drug calculations, vascular access for fluids and medication administration and legislation. Upon completion, students should be able to accurately calculate drug dosages, properly administer medications, and demonstrate general knowledge of pharmacology.				
EMS 131 Advanced Airway Management	1	2	0	2
Prerequisites: EMS 110, ENG 111 or appropriate test score, and MAT 143 or appropriate test score				
Corequisites: None				
This course is designed to provide advanced airway management techniques and is required for paramedic certification. Topics must meet current guidelines for advanced airway management in the pre-hospital setting. Upon completion, students should be able to properly utilize all airway adjuncts and pharmacology associated with airway control and maintenance.				

		Work/ Class Lab Clinical Credit			
EMS 160	Cardiology I	2	3	0	3
Prerequisites: EMS 110, ENG 111 or appropriate test score, and MAT 143 or appropriate test score					
Corequisites: None					
This course introduces the study of cardiovascular emergencies and is required for paramedic certification. Topics include anatomy and physiology, pathophysiology, electrophysiology, and rhythm interpretation. Upon completion, students should be able to recognize and interpret rhythms.					
EMS 220	Cardiology II	2	3	0	3
Prerequisites: EMS 122, EMS 130, EMS 160					
Corequisites: None					
This course provides an in-depth study of cardiovascular emergencies and is required for paramedic certification. Topics include assessment and treatment of cardiac emergencies, cardiac pharmacology, and patient care. Upon completion, students should be able to manage the cardiac patient.					
EMS 221	EMS Clinical Practicum II	0	0	6	2
Prerequisites: EMS 122					
Corequisites: None					
This course provides clinical experiences in the hospital and/or field. Emphasis is placed on increasing the proficiency of students' skills and abilities in patient assessments and the delivery of care. Upon completion, students should be able to demonstrate continued progress in advanced-level patient care.					
EMS 231	EMS Clinical Practicum III	0	0	9	3
Prerequisites: EMS 221					
Corequisites: None					
This course provides clinical experiences in the hospital and/or field. Emphasis is placed on enhancing the students' skills and abilities in providing advanced-level care. Upon completion, students should be able to demonstrate continued progress in advanced-level patient care.					
EMS 235	EMS Management	2	0	0	2
Prerequisites: None					
Corequisites: None					
This course stresses the principles of managing a modern emergency medical service system. Topics include structure and function of municipal governments, EMS grantsmanship, finance, regulatory agencies, system management, legal issues, and other topics relevant to the EMS manager. Upon completion, students should be able to understand the principles of managing emergency medical service delivery systems.					
EMS 240	Patients with Special Challenges	1	2	0	2
Prerequisites: EMS 122, EMS 130					
Corequisites: None					

This course includes concepts of crisis intervention and techniques of interacting with patients with special challenges and is required for paramedic certification. Topics include appropriate intervention and interaction for neglected, abused, terminally ill, chronically ill, technology assisted, bariatric, physically challenged, mentally challenged, or assaulted patients as well as behavioral emergencies. Upon completion, students should be able to recognize and manage the care of patients with special challenges.

		Work/ Class Lab Clinical Credit			
EMS 241	EMS Clinical Practicum IV	0	0	12	4
Prerequisites: EMS 231					
Corequisites: None					
This course provides clinical experiences in the hospital and/or field. Emphasis is placed on mastering the skills/competencies required of the paramedic providing advanced-level care. Upon completion, students should be able to provide advanced-level patient care as an entry-level paramedic.					
EMS 250	Medical Emergencies	3	3	0	4
Prerequisites: EMS 122, EMS 130					
Corequisites: None					
This course provides an in-depth study of medical conditions frequently encountered in the prehospital setting and is required for paramedic certification. Topics include appropriate interventions/treatments for disorders/diseases/injuries affecting the following systems: respiratory, neurological, abdominal/gastrointestinal, endocrine, genitourinary, musculoskeletal, and immunological as well as toxicology, infectious diseases and diseases of the eyes, ears, nose and throat. Upon completion, students should be able to recognize, assess and manage the care of frequently encountered medical conditions based upon initial patient assessment.					
EMS 260	Trauma Emergencies	1	3	0	2
Prerequisites: EMS 122, EMS 130					
Corequisites: None					
This course provides in-depth study of trauma including pharmacological interventions for conditions frequently encountered in the prehospital setting and is required for paramedic certification. Topics include an overview of thoracic, abdominal, genitourinary, orthopedic, neurological, and multi-system trauma, soft tissue trauma of the head, neck, and face as well as environmental emergencies. Upon completion, students should be able to recognize and manage trauma situations based upon patient assessment and should adhere to standards of care.					
EMS 270	Life Span Emergencies	3	3	0	4
Prerequisites: EMS 122, EMS 130					
Corequisites: None					
This course covers medical/ethical/legal issues and the spectrum of age-specific emergencies from conception through death required for paramedic certification. Topics include gynecological, obstetrical, neonatal, pediatric, and geriatric emergencies and pharmacological therapeutics. Upon completion, students should be able to recognize and treat age-specific emergencies.					

		Work/			
		Class	Lab	Clinical	Credit
EMS 280	EMS Bridging Course	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course is designed to provide currently credentialed state or national Paramedic students with the most current education trends in Paramedic Practice. Emphasis is placed on transitions in healthcare. Upon completion, students should be able to integrate emerging trends in pre-hospital care.					
EMS 285	EMS Capstone	1	3	0	2
Prerequisites: EMS 220, EMS 250, EMS 260					
Corequisites: None					
This course provides an opportunity to demonstrate problem-solving skills as a team leader in simulated patient scenarios and is required for paramedic certification. Emphasis is placed on critical thinking, integration of didactic and psychomotor skills, and effective performance in simulated emergency situations. Upon completion, students should be able to recognize and appropriately respond to a variety of EMS-related events.					
ENG 025	College English Skills	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides the skills necessary for success in college English courses. Topics include reading and writing processes and strategies, such as critical thinking, text analysis, idea development, and application of writing conventions. Upon completion, students should be able to analyze readings and produce unified, coherent, well-developed paragraphs and essays using appropriate document design and standard written English while developing positive academic habits, learning strategies, and a growth mindset.					
ENG 102	Applied Communications II	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course is designed to enhance writing and, speaking skills for the workplace. Emphasis is, placed on generating short writings such as job, application documents, memoranda, and reports and, developing interpersonal communication skills with, employees and the public. Upon completion, students should be able to prepare effective, short, and job-related written and oral, communications.					
ENG 111	Writing and Inquiry	3	0	0	3
Prerequisites: ENG 025					
Corequisites: None					
This course is designed to develop the ability to produce clear writing in a variety of genres and formats using a recursive process. Emphasis includes inquiry, analysis, effective use of rhetorical strategies, thesis development, audience awareness, and revision. Upon completion, students should be able to produce unified, coherent, well-developed essays using standard written English.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for English</i>					

Composition in A.A. and A.S. degree programs. This course has been approved to meet the communications requirement in A.A.S. degree programs.

	Work/ Class Lab Clinical Credit			
ENG 112 Writing/Research in the Disciplines	3	0	0	3
Prerequisites: ENG 111 with a grade of “C” or better				
Corequisites: None				
This course, the second in a series of two, introduces research techniques, documentation styles, and writing strategies. Emphasis is placed on analyzing information and ideas and incorporating research findings into documented writing and research projects. Upon completion, students should be able to evaluate and synthesize information from primary and secondary sources using documentation appropriate to various disciplines.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for English Composition in A.A. and A.S. degree programs. This course has been approved to meet the communications requirement in A.A.S. degree programs.</i>				
ENG 125 Creative Writing I	3	0	0	3
Prerequisites: ENG 111 with a grade of “C” or better				
Corequisites: None				
This course is designed to provide students with the opportunity to practice the art of creative writing. Emphasis is placed on writing, fiction, poetry, and sketches. Upon completion, students should be able to craft and critique their own writing and critique the writing of others.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs. This course has been approved to meet the humanities/fine arts requirement in A.A.S. degree programs.</i>				
ENG 231 American Literature I	3	0	0	3
Prerequisites: ENG 112 or ENG 113 or ENG 114				
Corequisites: None				
This course covers selected works in American Literature from its beginnings to 1865. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to analyze and interpret literary works in their historical and cultural contexts.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for humanities/fine arts in A.A. and A.S. degree programs. This course has been approved to meet the humanities/fine arts requirement in A.A.S. degree programs.</i>				
ENG 232 American Literature II	3	0	0	3
Prerequisites: ENG 112 or ENG 113 or ENG 114				
Corequisites: None				
This course covers selected works in American literature from 1865 to the present. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to analyze and interpret literary works in their historical and cultural contexts.				

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for humanities/fine arts in A.A. and A.S. degree programs. This course has been approved to meet the humanities/fine arts requirement in A.A.S. degree programs.

	Work/ Class Lab Clinical Credit			
ENG 233 Major American Writers	3	0	0	3
Prerequisites: ENG 112 or ENG 113 or ENG 114				
Corequisites: None				
This course provides an intensive study of the works of several major American authors. Emphasis is placed on American history, culture, and the literary merits. Upon completion, students should be able to interpret, analyze, and evaluate the works studied.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for humanities/fine arts in A.A. and A.S. degree programs. This course has been approved to meet the humanities/fine arts requirement in A.A.S. degree programs.</i>				
ENG 241 British Literature I	3	0	0	3
Prerequisites: ENG 112 or ENG 113 or ENG 114				
Corequisites: None				
This course covers selected works in British literature from its beginnings to the Romantic Period. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to literary works in their historical and cultural contexts.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for humanities/fine arts in A.A. and A.S. degree programs. This course has been approved to meet the humanities/fine arts requirement in A.A.S. degree programs.</i>				
ENG 242 British Literature II	3	0	0	3
Prerequisites: ENG 112 or ENG 113 or ENG 114				
Corequisites: None				
This course covers selected works in British literature from the Romantic Period to the present. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to literary works in their historical and cultural contexts.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for humanities/fine arts in A.A. and A.S. degree programs. This course has been approved to meet the humanities/fine arts requirement in A.A.S. degree programs.</i>				
ENG 273 African-American Literature	3	0	0	3
Prerequisites: ENG 112 or ENG 113 or ENG 114				
Corequisites: None				
This course provides a survey of the development of African-American literature from its beginnings to the present. Emphasis is placed on historical and cultural context, themes, literary				

traditions, and backgrounds of the authors. Upon completion, students should be able to interpret, analyze, and respond to selected texts.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs. This course has been approved to meet the humanities/fine arts requirement in A.A.S. degree programs.

		Work/ Class Lab Clinical Credit			
EUS 110	Intro to Electric Utility Industry	3	3	0	4
Prerequisites: MAT 035 and ENG 025					
Corequisites: None					
This course provides the student with an overview of the electric (power) utility industry. Topics include electric utility regulation and its scope, regulatory agencies and codes, general safety, electric system overview, electric generation, electric transmission, and electric distribution. Upon completion, students should be able to understand the need for electric utilities, their structure, and regulatory requirements on electric utilities.					
EUS 130	Electric Utility Print Reading	3	2	0	4
Prerequisites: ELC 112 or ELC 131, and EUS 110					
Corequisites: None					
This course introduces the basic principles of reading electrical drawings used in the utility industry. Topics include functional diagrams, AC and DC control schematics, wiring diagrams, control wiring diagrams, and logic diagrams. Upon completion, the student should be able to explain the purpose and function of the various circuits and components in each type of electrical drawing.					
EUS 210	Large High Voltage Power Transformers I	2	3	0	3
Prerequisites: EUS 110					
Corequisites: None					
This course introduces the fundamentals of large power transformers used in the electrical utility industry with emphasis on function and criticality. Topics include understanding the various designs, load calculations, dissolved gas analysis, assembly, commissioning tests, available accessories, bushings, maintenance, and trouble shooting. Upon completion, students should be able to identify the various winding configurations and connections, interpret nameplate information, and perform various tests on transformers.					
EUS 215	Large High Voltage Power Transformers II	2	3	0	3
Prerequisites: EUS 210					
Corequisites: None					
This course covers complex electrical testing of power transformers. Topics include understanding of power factor testing, winding resistance testing and trouble shooting. Upon completion, students should be able to perform various tests on transformers.					
EUS 220	High Voltage Power Circuit Breakers	2	3	0	3
Prerequisites: ELC 117 or ELN 231, EUS 130					
Corequisites: None					

This course introduces the fundamentals of high voltage power circuit breakers used in the electrical utility industry with emphasis on function and criticality. Topics include understanding the various designs and interrupting mediums, how circuit breakers interrupt fault currents, Sulfur Hexafluoride gas (SF₆), breaker timing, and maintenance. Upon completion, students should be able to identify various types of circuit breakers, interpret nameplate information, and perform various tests on these devices.

**Work/
Class Lab Clinical Credit**

EUS 225 Electric Utility Safety & Human Performance 2 0 0 2

Prerequisites: EUS 110 and EUS 130

Corequisites: None

This course introduces students to the basic safe work practices and power system safety equipment which are used in utility substations and generating plants. Topics include personal safety for working on or around high voltage AC power systems up to 500 kV, procedures for clearing high voltage substation equipment, personal protective grounding and procedures for performing work in energized electric utility substations. Upon completion, students should be able to demonstrate the skills and knowledge to work on high voltage equipment/environment.

EUS 230 Electric Utility Protective Relaying I 2 3 0 3

Prerequisites: EUS 130

Corequisites: None

This course introduces protective relaying used in the electrical utility industry with emphasis on function and criticality. Topics include substations zones protection, transmission lines, switchyards, relays, and power line carrier components. Upon completion, students should be able to understand the purpose for various relay schemes and protective relays.

EUS 235 Electric Utility Protective Relaying II 2 3 0 3

Prerequisites: EUS 230

Corequisites: None

This course provides advanced studies of protective relaying and includes single and three-phase metering principles, meter construction, and component parts. Topics include instrument transformer theory and applications, sizing instrument transformers, wiring transformers, meter installations, and electronic meter functionality. Upon completion, students should be able to describe and test overcurrent schemes, transformer differential schemes, and transmission line protection schemes.

EUS 240 Substation Ancillary Systems 2 3 0 3

Prerequisites: EUS 130

Corequisites: None

This course introduces many of the supporting systems used in substations and generating plant switchyards to support the operation of the electric power grid. Topics include instrument transformers, capacitor banks, reactor banks, batteries, circuit switchers, bushings, disconnect switches, and ground grids. Upon completion, the student should be able to understand the design and purpose of each of these devices and systems.

		Work/ Class Lab Clinical Credit			
EUS 255	Electric Utility Troubleshooting	1	3	0	2
Prerequisites: EUS 215 and EUS 230					
Corequisites: EUS 235					
This course introduces a wide variety of techniques to troubleshoot electric utility substation and generating plant power system equipment. Topics include testing and troubleshooting high and medium voltage power circuit breakers, three phase high voltage power transformers, voltage regulators and circuit switchers. Upon completion, students should be able to use specialized test equipment used by electric utilities to maintain and troubleshoot power system equipment used by utility substation and generating plants.					
EUS 260	Cap & Case Studies in EUSRT	0	4	0	2
Prerequisites: EUS 215					
Corequisites: EUS 235					
This course provides an opportunity for students to utilize all facets of their educational experience to solve problems common to the electric utility industry. Topics include electric utility and industry case studies, project safety, planning and organization, communication, and project documentation. Upon completion, students should be able to demonstrate the ability to complete a capstone project, concluding with a formal report.					
GIS 110	Survey of GIS/GPS	1	0	0	1
Prerequisites: None					
Corequisites: None					
This course introduces the methods and techniques used in the Geographic Information System (GIS) and Global Positioning Systems (GPS) profession. Emphasis is placed on problem solution sequences and advisement, counseling, and technical methodology, including technical computer usage and technical graphics. Upon completion, students should be able to identify major fields using GIS/GPS technologies and apply their methodologies toward problem resolution.					
GIS 111	Intro to Geographic Info Systems	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the hardware and software components of a Geographic Information System and reviews GIS applications. Topics include data structures and basic functions, methods of data capture and sources of data, and the nature and characteristics of spatial data and objects. Upon completion, students should be able to identify GIS hardware components, typical operations, products/applications, and differences between database models and between raster and vector systems.					
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>					
GRO 120	Intro to Gerontology	3	0	0	3
Prerequisites: None					
Corequisites: None					

This course introduces the psychological, social, and biological aspects of aging. Emphasis is placed common mental, social, and physical changes that occur during the aging process. Upon completion, students should be able to recognize the aging process and its psychological, social, and biological aspects.

		Work/ Class Lab Clinical Credit			
HBI 110	Issues and Trends in HBI	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course is a survey of current and emerging technology applications and data standards in the healthcare industry. Topics include the history, implementation, use, management, and impact of information technology in healthcare settings. Upon completion, students should have an understanding of the current trends and issues in healthcare informatics.					
HEA 120	Community Health	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides information about contemporary community health and school hygiene issues. Topics include health education and current information about health trends. Upon completion students should be able to recognize and devise strategies to prevent today's community health problems.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>					
HIS 111	World Civilizations I	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces world history from the dawn of civilization to the early modern era. Topics include Eurasian, African, American, and Greco-Roman civilizations and Christian, Islamic and Byzantine cultures. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in pre-modern world civilizations.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for social/behavioral sciences in A.A. and A.S. degree programs. This course has been approved to meet the social/behavioral sciences requirement in A.A.S. degree programs.</i>					
HIS 112	World Civilizations II	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces world history from the early modern era to the present. Topics include the cultures of Africa, Europe, India, China, Japan, and the Americas. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in modern world civilizations.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for social/behavioral science in A.A. and A.S. degree programs. This course has been approved to meet the social/behavioral sciences requirement in A.A.S. degree programs.</i>					

		Work/ Class Lab Clinical Credit			
HIS 121	Western Civilization I	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces western civilization from pre-history to the early modern era. Topics include ancient Greece, Rome, and Christian institutions of the Middle Ages and emergence of national monarchies in western Europe. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in early western civilization.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for social/behavioral science in A.A., A.S., and A.A.S. degree programs.</i>					
HIS 131	American History I	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course is a survey of American history from pre-history through the Civil War era. Topics include the migrations to the Americas, the colonial and revolutionary periods, the development of the Republic, and the Civil War. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in early American history.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for social/behavioral sciences in A.A. and A.S. degree programs. This course has been approved to meet the social/behavioral sciences requirement in A.A.S. degree programs.</i>					
HIS 132	American History II	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course is a survey of American history from the Civil War era to the present. Topics include industrialization, immigration, the Great Depression, the major American wars, the Cold War, and social conflict. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in American history since the Civil War.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for social/behavioral sciences in A.A. and A.S. degree programs. This course has been approved to meet the social/behavioral sciences requirement in A.A.S. degree programs.</i>					
HMT 110	Intro to Healthcare Management	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the functions, practices, organizational structures, and professional issues in healthcare management. Emphasis is placed on planning, controlling, directing, and communicating within health and human services organizations. Upon completion, students should be able to apply the concepts of management within a healthcare service environment.					

		Work/ Class Lab Clinical Credit			
HMT 210	Medical Insurance	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the concepts of medical insurance. Topics include types and characteristics of third-party payers, coding concepts, payment systems, and manual/electronic claims form preparation. Upon completion, students should be able to process third-party claims forms.					
HMT 211	Long-Term Care Administration	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the administration of long-term care facilities and services. Emphasis is placed on nursing home care, home health care, hospice, skilled nursing facilities, and other long-term care services. Upon completion, students should be able to distinguish between the different long-term care offerings, criteria for use, and benefits of the patient, resident, and participant.					
HMT 212	Management of Healthcare Organizations	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course examines current issues affecting the management of healthcare delivery systems. Topics include current problems, changes, and challenges in the healthcare environment. Upon completion, students should be able to identify current health care issues and their impact on healthcare management.					
HMT 215	Legal Aspect of Healthcare Administration	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides a practical examination of healthcare law from the administrative perspective. Emphasis is placed on healthcare law with a working understanding of ways to improve quality and the legal delivery of healthcare. Upon completion, students should be able to understand and apply healthcare laws as they relate to the financing, delivery, privacy, and malpractice of healthcare organizations.					
HMT 220	Healthcare Financial Management	4	0	0	4
Prerequisites: ACC 120, HMT 110					
Corequisites: None					
This course covers the methods and techniques utilized in the financial management of healthcare programs. Topics include cost determination, pricing of services, financial statement analysis, forecasting/projections, third-party billing, reimbursement, Medicare, Medicaid, and budgeting. Upon completion, students should be able to interpret and apply the principles of financial management in a healthcare environment.					
HMT 225	Practice Management Simulation	2	2	0	3
Prerequisites: None					
Corequisites: None					

This course introduces medical systems used to process and analyze information in the automated office. Emphasis is placed on daily processing of patient services, management reporting used to monitor productivity, and interactive database reporting and analysis. Upon completion, students should be able to process daily services, generate and interpret management reports and utilize key indicators for monitoring practice productivity.

		Work/			
		Class	Lab	Clinical	Credit
HSC 110	Orientation to Health Careers	1	0	0	1
Prerequisites: None					
Corequisites: BIO 165, BIO 166, CIS 110, ENG 111, ENG 112, HSC 140, HUM 115, NAS 101, NAS 102, PSY 150, SOC 210					
This course is a survey of health care professions. Topics include professional duties and responsibilities, working environments, and career choices. Upon completion, students should be able to demonstrate an understanding of the health care professions and be prepared to make informed career choices. Pre-Nursing requirements and expectations will be covered in full detail.					
HSC 140	Transcultural Healthcare	2	0	0	2
Prerequisites: None					
Corequisites: None					
This course is designed to introduce students to healthcare issues related to care of diverse populations. Topics include historical and theoretical foundations of transcultural healthcare, delivering services across the lifespan and caring for diverse persons in various healthcare settings. Upon completion, students should be able to provide culturally competent healthcare to individuals, families, groups, communities and institutions.					
HSE 110	Introduction to Human Services	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the human services field, including the history, agencies, roles, and careers. Topics include personal/professional characteristics, diverse populations, community resources, disciplines in the field, systems, ethical standards, and major theoretical and treatment approaches. Upon completion, students should be able to identify the knowledge, skills, and roles of the human services worker.					
HSE 112	Group Process I	1	2	0	2
Prerequisites: None					
Corequisites: None					
This course introduces interpersonal concepts and group dynamics. Emphasis is placed on self-awareness facilitated by experiential learning in small groups with analysis of personal experiences and the behavior of others. Upon completion, students should be able to show competence in identifying and explaining how people are influenced by their interactions in group settings.					

		Work/ Class Lab Clinical Credit			
HSE 123	Interviewing Techniques for Human Services	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course covers the purpose, structure, focus, and techniques utilized in effective interviewing. Emphasis is placed on observing, attending, listening, responding, summarizing and documenting with instructor supervision. Upon completion, students should be able to perform the basic interviewing skills needed to facilitate the helping relationship.					
HSE 125	Counseling	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course covers the major approaches to psychotherapy and counseling, including theory, characteristics, and techniques. Emphasis is placed on facilitation of self-exploration, problem solving, decision making, and personal growth. Upon completion, students should be able to understand various theories of counseling and demonstrate counseling techniques.					
HSE 127	Conflict Resolution	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course introduces conflict resolution and mediation theory and practice. Emphasis is placed on exploring, evaluating, and negotiating solutions to conflict. Upon completion, students should be able to define compromise and demonstrate competence in facilitating resolution.					
HSE 155	Community Resources Management	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers the working relationships between human services agencies and the community. Emphasis is placed on identification and observation of community resources which contribute to the achievement of the human services mission. Upon completion, students should be able to identify community resources, organize public support, and determine appropriate sources of funding.					
HSE 210	Diversity, Ethics and Trends	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course is designed to provide students with an in-depth understanding of the role of diversity and ethical considerations within the human services profession. Emphasis is placed on the knowledge and skills in the evolving landscape of human services. Upon completion, students should be able to apply ethical decision-making, demonstrate an understanding of diverse perspectives, and identify current trends in the human services field.					
HSE 212	Group Dynamics	3	0	0	3
Prerequisites: None					
Corequisites: None					

This course introduces the concepts of group processes and group dynamics. Emphasis is placed on essential tools for understanding, participating in, and contributing to group processes. Upon completion, students should be able to identify and explain how people are influenced by their interactions in group settings and facilitate various groups.

		Work/			
		Class	Lab	Clinical	Credit
HSE 220 Case Management		2	2	0	3
Prerequisites: None					
Corequisites: None					
This course covers the variety of tasks associated with professional case management. Topics include needs assessment, service planning, referral procedures, documentation, and follow-up and integration of services. Upon completion, students should be able to effectively manage the care of the whole person from initial contact through termination of services.					
HSE 223 Counseling Theories and Skills		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides an in-depth exploration of foundational theories and practical techniques essential for those working in diverse human services settings. Emphasis is placed on self-awareness, problem-solving, decision-making, and personal growth. Upon completion, students should be able to apply these theories to real-life scenarios, and develop professional skills crucial for fostering supportive relationships in various settings.					
HSE 225 Crisis and Intervention Principles		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the types of crises and the principles of intervention. Emphasis is placed on identifying culturally competent techniques for intervening in various crisis situations. Upon completion, students should be able to assess crisis situations and respond effectively.					
HSE 227 Children & Adolescents in Crisis		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers the crises affecting children and adolescents in contemporary society. Emphasis is placed on abuse and neglect, mental health challenges, suicide problematic family dynamics, poverty, and violence. Upon completion, students should be able to identify and discuss intervention strategies and available services for the major crises affecting children and adolescents.					
HSE 242 Family Systems		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the concepts of family structure as a system and includes the impact of contemporary society on the family. Topics include systems theory, family structure, blended families, divorce, LGBTQIA+ families, adoption, and the elderly. Upon completion, students					

should be able to demonstrate and understanding of families as a system and the impact of change on family structure.

		Work/ Class Lab Clinical Credit			
HSE 250	Financial Services	2	0	0	2
Prerequisites: None					
Corequisites: None					
This course introduces students to agencies that provide financial assistance. Emphasis is placed on qualifying applicants for a variety of financial assistance programs offered by human services agencies. Upon completion, students should be able to make a factual and objective assessment of a client's economic situation to qualify them for financial assistance.					
HSE 251	Activities Planning	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course introduces skills and techniques used in recreation and leisure activities to enhance the lives of special populations. Emphasis is placed on music, art, and recreational activities. Upon completion, students should be able to define, plan, and adapt recreational activities for selected groups and individuals.					
HSE 255	Health Problems & Prevention	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course surveys a range of public health problems and issues, including the development of prevention strategies. Topics include maternal health, HIV/AIDS, infectious diseases, professional burnout, substance use/misuse, sexually transmitted diseases, and social determinants of health. Upon completion, students should be able to identify health issues and demonstrate prevention strategies.					
HUM 110	Technology and Society	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course considers technological change from historical, artistic, and philosophical perspectives and its effect on human needs and concerns. Emphasis is placed on the causes and consequences of technological change. Upon completion, students should be able to critically evaluate the implications of technology.					
<i>Note: This course has been approved for transfer under the CAA as a general education course in Humanities/Fine Arts. This course has been approved for transfer under the ICAA as a general education course in Humanities/Fine Arts.</i>					
HUM 115	Critical Thinking	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the use of critical thinking skills in the context of human conflict. Emphasis is placed on evaluating information, problem solving, approaching cross-cultural perspectives, and					

resolving controversies and dilemmas. Upon completion, students should be able to demonstrate orally and in writing the use of critical thinking skills in the analysis of appropriate texts.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for humanities/fine arts in A.A., A.S., and A.A.S. degree programs.

		Work/ Class Lab Clinical Credit			
HUM 120 Cultural Studies		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the distinctive features of a particular culture. Topics include art, history, music, literature, politics, philosophy, and religion. Upon completion, students should be able to appreciate the unique character of the study culture.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for humanities/fine arts in A.A., A.S., and A.A.S. degree programs.</i>					
HYD 110 Hydraulics/Pneumatics I		2	3	0	3
Prerequisites: MAT 035					
Corequisites: None					
This course introduces the basic components and functions of hydraulic and pneumatic systems. Topics include standard symbols, pumps, control valves, control assemblies, actuators, FRL, maintenance procedures, and switching and control devices. Upon completion, students should be able to understand the operation of a fluid power system, including design, application, and troubleshooting.					
ISC 112 Industrial Safety		2	0	0	2
Prerequisites: None					
Corequisites: None					
This course introduces the principles of industrial safety. Emphasis is placed on industrial safety and OSHA regulations. Upon completion, students should be able to demonstrate knowledge of a safe working environment and OSHA compliance.					
ISC 132 Manufacturing Quality Control		2	3	0	3
Prerequisites: None					
Corequisites: None					
This course introduces quality concepts and techniques used in industry. Topics include elementary statistics and probability, process control, process capability, and quality improvement tools. Upon completion, students should be able to demonstrate an understanding of the concepts and principles of quality and apply them to the work environment.					
MAT 025 Concepts of Essential Math/Statistics		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides an opportunity to customize foundational math content and statistical concepts specific to real-world applications. Topics include decimals, percentages, ratios,					

proportions, solving basic equations, geometrical concepts, dimensional analysis, financial applications and elements of statistics and probability. Upon completion, students should be able to successfully demonstrate the use of mathematics, technology and statistical concepts to solve practical problems while developing positive academic habits, learning strategies and growth mindset.

	Work/ Class Lab Clinical Credit			
MAT 035 Concepts of Algebra	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course covers algebraic concepts with an emphasis on application and analysis. Topics include rational/radical expressions and equations, solving equations and inequalities, concepts of functions, factoring, and exponents. Upon completion, students should be able to successfully demonstrate mastery of algebraic concepts through application and analysis while developing positive academic habits, learning strategies and growth mindset.				
MAT 110 Math Measurement and Literacy	2	2	0	3
Prerequisites: None				
Corequisites: None				
This course provides an activity-based approach that develops measurement skills and mathematical literacy using technology to solve problems for non-math intensive programs. Topics include unit conversions and estimation within a variety of measurement systems; ratio and proportion; basic geometric concepts; financial literacy; and statistics including measures of central tendency, dispersion, and charting of data. Upon completion, students should be able to demonstrate the use of mathematics and technology to solve practical problems, and to analyze and communicate results.				
MAT 143 Quantitative Literacy	2	2	0	3
Prerequisites: MAT 025				
Corequisites: None				
This course is designed to engage students in complex and realistic situations involving the mathematical phenomena of quantity, change and relationship, and uncertainty through project- and activity-based assessment. Emphasis is placed on authentic contexts which will introduce the concepts of numeracy, proportional reasoning, dimensional analysis, rates of growth, personal finance, consumer statistics, practical probabilities, and mathematics for citizenship. Upon completion, students should be able to utilize quantitative information as consumers and to make personal, professional, and civic decisions by decoding, interpreting, using, and communicating quantitative information found in modern media and encountered in everyday life.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for mathematics in the A.A. degree program. This course has been approved to meet the mathematics requirement in A.A.S. degree programs.</i>				
MAT 152 Statistical Methods I	3	2	0	4
Prerequisites: MAT 025				
Corequisites: None				

This course provides a project-based approach to introductory statistics with an emphasis on using real-world data and statistical literacy. Topics include descriptive statistics, correlation and regression, basic probability, discrete and continuous probability distributions, confidence intervals and hypothesis testing. Upon completion, students should be able to use appropriate technology to describe important characteristics of a data set, draw inferences about a population from sample data, and interpret and communicate results.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for mathematics in the A.A. degree program. This course has been approved to meet the mathematics requirement in A.A.S. degree programs.

	Work/			
	Class	Lab	Clinical	Credit

MAT 171	Precalculus Algebra	3	2	0	4
----------------	----------------------------	----------	----------	----------	----------

Prerequisites: MAT 035

Corequisites: None

This course is designed to develop topics which are fundamental to the study of Calculus. Emphasis is placed on solving equations and inequalities, solving systems of equations and inequalities, and analysis of functions (absolute value, radical, polynomial, rational, exponential, and logarithmic) in multiple representations. Upon completion, students should be able to select and use appropriate models and techniques for finding solutions to algebra-related problems with and without technology.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for mathematics in A.A. and A.S. degree programs. This course has been approved to meet the mathematics requirement in A.A.S. degree programs.

MAT 172	Precalculus Trigonometry	3	2	0	4
----------------	---------------------------------	----------	----------	----------	----------

Prerequisites: MAT 171 with a grade of "C" or better.

Corequisites: None

This course is designed to develop an understanding of topics which are fundamental to the study of Calculus. Emphasis is placed on the analysis of trigonometric functions in multiple representations, right and oblique triangles, vectors, polar coordinators, conic sections, and parametric equations. Upon completion, students should be able to select and use appropriate models and techniques for finding solutions to trigonometry-related problems with and without technology.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for mathematics in the A.S. degree program. This course has been approved to meet the mathematics requirement in A.A.S. degree programs.

MAT 263	Brief Calculus	3	2	0	4
----------------	-----------------------	----------	----------	----------	----------

Prerequisites: MAT 171 with a grade of "C" or better

Corequisites: None

This course is designed to introduce concepts of differentiation and integration and their applications to solving problems. Topics include graphing, differentiation, and integration with emphasis on applications drawn from business, economics, and biological and behavioral sciences.

Upon completion, students should be able to demonstrate an understanding of the use of basic calculus and technology to solve problems and to analyze and communicate results.

Note: This course has been approved for transfer under the CAA as a general education course in Mathematics. This course has been approved for transfer under the ICAA as a general education course in Mathematics.

	Work/ Class Lab Clinical Credit			
MAT 271 Calculus I	3	2	0	4
Prerequisites: MAT 172 with a grade of “C” or better				
Corequisites: None				
This course is designed to develop the topics of differential and integral calculus. Emphasis is placed on limits, continuity, derivatives and integrals of algebraic and transcendental functions of one variable. Upon completion, students should be able to select and use appropriate models and techniques for finding solutions to derivative-related problems with and without technology.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for mathematics in the A.S. degree program. This course has been approved to meet the mathematics requirement in A.A.S. degree programs.</i>				
MAT 272 Calculus II	3	2	0	4
Prerequisites: MAT 271 with a grade of “C” or better				
Corequisites: None				
This course provides a rigorous treatment of integration and is the second calculus course in a three-course sequence. Topics include applications of definite integrals, techniques of integration, indeterminate forms, improper integrals, infinite series, conic sections, parametric equations, polar coordinates, and differential equations. Upon completion, students should be able to use integration and approximation techniques to solve application problems.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for mathematics in A.A., A.S. and A.A.S. degree programs.</i>				
MAT 273 Calculus III	3	2	0	4
Prerequisites: MAT 272 with a grade of “C” or better				
Corequisites: None				
This course is designed to develop the topics of multivariate calculus. Emphasis is placed on multivariate functions, partial derivatives, multiple integration, solid analytical geometry, vector valued functions, and line and surface integrals. Upon completion, students should be able to select and use appropriate models and techniques for finding the solution to multivariate-related problems with and without technology				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for mathematics in A.A., A.S. and A.A.S. degree programs.</i>				
MAT 285 Differential Equations	2	2	0	3
Prerequisites: MAT 272 with a grade of “C” or better				
Corequisites: None				

This course provides an introduction to topics involving ordinary differential equations. Emphasis is placed on the development of abstract concepts and applications for first-order and linear higher-order differential equations, systems of differential equations, numerical methods, series solutions, eigenvalues and eigenvectors, and LaPlace transforms. Upon completion, students should be able to demonstrate understanding of the theoretical concepts and select and use appropriate models and techniques for finding solutions to differential equations-related problems with and without technology.

Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.

	Work/			
	Class	Lab	Clinical	Credit
MEC 110 Introduction to CAD/CAM	1	2	0	2
Prerequisites: None				
Corequisites: None				
This course introduces CAD/CAM. Emphasis is placed on transferring part geometry from CAD to CAM for the development of a CNC-ready program. Upon completion, students should be able to use CAD/CAM software to produce a CNC program.				
MEC 130 Mechanisms	2	2	0	3
Prerequisites: MAT 035				
Corequisites: None				
This course introduces the purpose and action of various mechanical devices. Topics include cams, cables, gear trains, differentials, screws, belts, pulleys, shafts, levers, lubricants, and other devices. Upon completion, students should be able to analyze, maintain, and troubleshoot the components of mechanical systems.				
MED 121 Medical Terminology I	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces prefixes, suffixes, and word roots used in the language of medicine. Topics include medical vocabulary and the terms that relate to the anatomy, physiology, pathological conditions, and treatment of selected systems. Upon completion, students should be able to pronounce, spell, and define medical terms as related to selected body systems and their pathological disorders.				
MED 122 Medical Terminology II	3	0	0	3
Prerequisites: MED 121				
Corequisites: None				
This course is the second in a series of medical terminology courses. Topics include medical vocabulary and the terms that relate to the anatomy, physiology, pathological conditions, and treatment of selected systems. Upon completion, students should be able to pronounce, spell, and define medical terms as related to selected body systems and their pathological disorders.				

	Work/ Class Lab Clinical Credit			
MHA 140 Introduction to Mental Health	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course provides a comprehensive overview of mental health and wellness and the roles, duties, and ethical aspects of providing mental health services. Topics include the history of mental health services, common mental health challenges, professional qualifications, and current trends. Upon completion students will be able to discuss the impact of mental health, examine various treatment settings, and analyze the requirements for providing mental health services in public, private, nonprofit, and community environments.				
MHA 150 Mental Health Interventions	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course provides exposure to different mental health treatment and intervention modalities. Topics include professional and self-help forms of intervention. Upon completion, students will be able to apply culturally competent mental health intervention principles to individuals and groups in a variety of treatment settings.				
MHA 238 Psychopathology	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course examines the development and use of DSM/ICD in the mental health setting to establish a common language. Emphasis is placed on history, terminology, and assessment practices associated with the DSMIV/ICD in the treatment of psychological disorders. Upon completion, students should be able to explain the core vocabulary of treatment approaches and their applications.				
MHA 240 Advocacy	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course covers the roles and duties of the individual and community advocate. Topics include treatment planning, needs assessment, referral procedures, and follow-up and integration of services. Upon completion, students should be able to effectively advocate for the care of the whole person and community.				
MKT 120 Principles of Marketing	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces principles and problems of marketing goods and services. Topics include promotion, placement, and pricing strategies for products. Upon completion, students should be able to apply marketing principles in organizational decision making.				
MKT 220 Advertising and Sales Promotion	3	0	0	3
Prerequisites: None				
Corequisites: None				

This course covers the elements of advertising and sales promotion in the business environment. Topics include advertising and sales promotion appeals, selection of media, use of advertising and sales promotion as a marketing tool, and means of testing effectiveness. Upon completion, students should be able to demonstrate an understanding of the concepts covered through application.

	Work/ Class Lab Clinical Credit			
MKT 223 Customer Experience	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course stresses the importance of customer relations in the business world. Emphasis is placed on learning how to respond to complex customer requirements and to efficiently handle stressful situations. Upon completion, students should be able to demonstrate the ability to handle customer relations.				
MKT 225 Marketing Research	3	0	0	3
Prerequisites: MKT 120				
Corequisites: None				
This course provides information for decision making by providing guidance in developing, analyzing, and using data. Emphasis is placed on marketing research as a tool in decision making. Upon completion, students should be able to design and conduct a marketing research project and interpret the results.				
MKT 227 Marketing Applications	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course extends the study of diverse marketing strategies. Emphasis is placed on case studies and small-group projects involving research or planning. Upon completion, students should be able to effectively participate in the formulation of a marketing strategy.				
MKT 232 Social Media Marketing	2	2	0	3
Prerequisites: None				
Corequisites: None				
This course is designed to build students' social media marketing skills by utilizing projects that give students hands on experience implementing social media marketing strategies. Topics include integrating different social media technologies into a marketing plan, creating social media marketing campaigns, and applying appropriate social media tools. Upon completion, students should be able to use social media technologies to create and improve marketing efforts for businesses.				
MNT 240 Industrial Equip Troubleshooting	1	3	0	2
Prerequisites: ELC 112 or ELC 131				
Corequisites: ELC 128 or ELN 260				
This course covers the various service procedures, tools, instruments, and equipment necessary to analyze and repair typical industrial equipment. Emphasis is placed on electro-mechanical and fluid power equipment troubleshooting, calibration, and repair, including common techniques and				

procedures. Upon completion, students should be able to troubleshoot and repair industrial equipment.

	Work/ Class Lab Clinical Credit			
MUS 110 Music Appreciation	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course is a basic survey of the music of the Western world. Emphasis is placed on the elements of music, terminology, composers, form, and style within a historical perspective. Upon completion, students should be able to demonstrate skills in basic listening and understanding of the art of music.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for humanities/fine arts in A.A. and A.S. degree programs. This course has been approved to meet the humanities/fine arts requirement in A.A.S. degree programs.</i>				
MUS 111 Fundamentals of Music	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course is an introductory course for students with little or no music background. Emphasis is placed on music notation, rhythmic patterns, scales, key signature, intervals, and chords. Upon completion, students should be able to demonstrate an understanding of the rudiments of music.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
MUS 112 Introduction to Jazz	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the origins and musical components of jazz and the contributions of its major artists. Emphasis is placed on the development of discriminating listening habits, as well as the investigation of the styles and structural forms of the jazz idiom. Upon completion, students should be able to demonstrate skills in listening and understanding this form of American music.				
<i>Note: This course has been approved for transfer under the CAA as a general education course in Humanities/Fine Arts. This course has been approved for transfer under the ICAA as a general education course in Humanities/Fine Arts.</i>				
MUS 131 Chorus I	0	2	0	1
Prerequisites: None				
Corequisites: None				
This course provides an opportunity to gain experience singing in a chorus. Emphasis is placed on vocal techniques and the study and performance of a variety of styles and periods of choral literature. Upon completion, students should be able to demonstrate skills needed to participate in choral singing leading to performance.				

Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.

	Work/ Class Lab Clinical Credit			
MUS 132 Chorus II	0	2	0	1
Prerequisites: MUS 131				
Corequisites: None				
This course provides a continuation of studies begun in MUS 131. Emphasis is placed on vocal techniques and the study and performance of a variety of styles and periods of choral literature. Upon completion, students should be able to demonstrate skills needed to participate in choral singing leading to performance.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
MUS 210 History of Rock Music	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course is a survey of Rock music from the early 1950's to the present. Emphasis is placed on musical groups, soloists, and styles related to the evolution of this idiom and on related historical and social events. Upon completion, students should be able to identify specific styles and to explain the influence of selected performers within their respective eras.				
<i>Note: This course has been approved for transfer under the CAA as a general education course in Humanities/Fine Arts. This course has been approved for transfer under the ICAA as a general education course in Humanities/Fine Arts.</i>				
MUS 211 History of Country Music	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the varied origins of country music and the commercialization of this art form. Emphasis is placed on historical, sociocultural, and stylistic factors related to country music and musicians. Upon completion, students should be able to identify specific styles and explain the influence of pop culture on the development of country music.				
<i>Note: This course has been approved for transfer under the CAA as a general education course in Humanities/Fine Arts. This course has been approved for transfer under the ICAA as a general education course in Humanities/Fine Arts.</i>				
NET 125 Introduction to Networks	2	3	0	3
Prerequisites: CTI 120				
Corequisites: None				
This course offers a detailed exploration of the architecture, structure, functions, components, and operating models of the Internet and other computer networks. Topics include the essentials of IP addressing, Ethernet basics, various media types, and network operations. Upon completion, students should be able to build/troubleshoot simple Local Area Networks (LANs), develop effective IP addressing schemes, and configure routers and switches.				

		Work/			
		Class	Lab	Clinical	Credit
NOS 120	Linux Single User	2	3	0	3
Prerequisites: CTS 120 or NOS 130					
Corequisites: None					
This course provides students with GUI and command line skills for using a Linux machine. Topics include Linux file system and access permissions, desktop or shell environments, command line editors, display servers, expression pattern matching, I/O redirection, and networking. Upon completion, students should be able to demonstrate competency in customizing a Linux system.					
NOS 130	Windows Single User	2	2	0	3
Prerequisites: ENG 025					
Corequisites: None					
This course introduces operating system concepts for single-user systems. Topics include hardware management, file and memory management, system configuration/optimization, and utilities. Upon completion, students should be able to perform operating systems functions at the support level in a single-user environment.					
NOS 230	Windows Administration I	2	2	0	3
Prerequisites: NOS 130					
Corequisites: None					
This course covers the installation and configuration of a Windows Server operating system. Emphasis is placed on the basic configuration of core network services, Active Directory and group policies. Upon completion, students should be able to install and configure a Windows Server operating system.					
NUR 101	Practical Nursing I	7	6	6	11
Prerequisites: Admission to the Practical Nursing program.					
Corequisites: BIO 165					
This course introduces the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts within each domain including assessment, clinical decision making, professional behaviors, caring interventions, biophysical and psychosocial concepts, communication, collaboration, teaching/learning, safety, ethical principles, legal issues, informatics, and evidence-based practice. Upon completion, students should be able to provide safe nursing care across the lifespan incorporating the concepts identified in this course.					
<i>Note: This is a diploma-level course.</i>					
NUR 102	Practical Nursing II	7	0	9	10
Prerequisites: NUR 101					
Corequisites: BIO 166					
This course is designed to further develop the concepts within the three domains of the individual, nursing, and healthcare. Emphasis is placed on the concepts within each domain including clinical decision making, caring interventions, biophysical and psychosocial concepts, communication, collaboration, teaching and learning, accountability, safety, informatics, and evidence-based practice. Upon completion, students should be able to provide safe nursing care across the lifespan incorporating the concepts identified in this course.					
<i>Note: This is a diploma-level course.</i>

NUR 103 Practical Nursing III

6	0	9	9
---	---	---	---

Prerequisites: NUR 102

Corequisites: None

This course is designed to assimilate the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on biophysical and psychosocial concepts, professional behaviors, healthcare systems, health policy, and quality improvement. Upon completion, students should be able to demonstrate the knowledge, skills, and attitudes necessary to provide safe, quality, and individualized entry level nursing care.

*Note: This is a diploma-level course.***NUR 111 Intro to Health Concepts**

4	6	6	8
---	---	---	---

Prerequisites: BIO 165, BIO 166, ENG 111, ENG 112, HUM 115, MAT 143, PSY 150, SOC 210, and Admission to the Associate Degree Nursing program

Corequisites: None

This course introduces the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts within each domain including medication administration, assessment, nutrition, ethics, interdisciplinary teams, informatics, evidence-based practice, individual-centered care, and quality improvement. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

NUR 112 Health-Illness Concepts

3	0	6	5
---	---	---	---

Prerequisites: NUR 111

Corequisites: NUR 114

This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of acid-base, metabolism, cellular regulation, oxygenation, infection, stress/coping, health-wellness-illness, communication, caring interventions, managing care, safety, quality improvement, and informatics. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

NUR 113 Family Health Concepts

3	0	6	5
---	---	---	---

Prerequisites: Take one set: BIO 163 or BIO 165 and BIO 166. Take all: BIO 275, ENG 111, ENG 112, HUM 115, MAT 143, NUR 111, NUR 112, NUR 114, PSY 150, PSY 241

Corequisites: None

This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of oxygenation, sexuality, reproduction, grief/loss, mood/affect. Behaviors, development. Family, health-wellness-illness, communication, caring interventions, managing care, safety, and advocacy. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

	Work/ Class Lab Clinical Credit			
NUR 114 Holistic Health Concepts	3	0	6	5
Prerequisites: NUR 111				
Corequisites: NUR 112				
This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of cellular regulation, perfusion, inflammation, sensory perception, stress/coping, mood/affect, cognition, self, violence, health-wellness-illness, professional behaviors, caring interventions, and safety. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.				
NUR 211 Health Care Concepts	3	0	6	5
Prerequisites: NUR 111, NUR 112, NUR 113, NUR 114				
Corequisites: NUR 212				
This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of cellular regulation, perfusion, infection, immunity, mobility, comfort, behaviors, health-wellness-illness, clinical decision-making, caring interventions, managing care, and safety. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.				
NUR 212 Health Systems Concepts	3	0	6	5
Prerequisites: NUR 111, NUR 112, NUR 113, NUR 114				
Corequisites: NUR 211				
This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of grief/loss, violence, health-wellness-illness, collaboration, managing care, safety, advocacy, legal issues, policy, healthcare systems, ethics, accountability, and evidence-based practice. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.				
NUR 213 Complex Health Concepts	4	3	15	10
Prerequisites: NUR 111, NUR 112, NUR 113, NUR 114, NUR 211, and NUR 212				
Corequisites: None				
This course is designed to assimilate the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of fluid/electrolytes, metabolism, perfusion, mobility, stress/coping, violence, health-wellness-illness, professional behaviors, caring interventions, managing care, healthcare systems, and quality improvement. Upon completion, students should be able to demonstrate the knowledge, skills, and attitudes necessary to provide quality, individualized, entry level nursing care.				
NUR 214 Nursing Transition Concepts	3	0	3	4
Prerequisites: BIO 165 and BIO 166 or BIO 163; ENG 111, and PSY 150				
Corequisites: BIO 275, ENG 112, HUM 115, MAT 143, PSY 241, and SOC 210				
This course is designed to introduce concepts within the three domains of the individual, healthcare, and nursing as the LPN transitions to the ADN role. Emphasis is placed on the concepts within each domain including evidenced-based practice, quality improvement, communication, safety, interdisciplinary team, clinical decision-making, informatics, assessment, caring, and				

health-wellness-illness. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

	Work/ Class Lab Clinical Credit			
NUR 215 Paramedic/RN Bridge Concepts	3	3	6	6
Prerequisites: BIO 165 and BIO 166 or BIO 163; ENG 111, and PSY 150				
Corequisites: BIO 275, ENG 112, HUM 115, MAT 143, PSY 241, and SOC 210				
This course is designed to introduce concepts within the three domains of the individual, healthcare, and nursing as the Associate Degree in Emergency Medical Science Paramedic transitions to the nursing role. Emphasis is placed on the concepts within each domain including evidenced-based practice, quality improvement, communication, safety, interdisciplinary team, collaboration, clinical decision-making, professional behaviors, informatics, assessment, perfusion, oxygenation, elimination, and cellular regulation. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.				
OST 131 Keyboarding	1	2	0	2
Prerequisites: None				
Corequisites: None				
This course covers basic keyboarding skills. Emphasis is placed on the touch system, correct techniques, and development of speed and accuracy. Upon completion, students should be able to key at an acceptable speed and accuracy level using the touch system. This course also includes setting and using tabs, formatting business letters, and formatting interoffice memorandums.				
PAD 151 Intro to Public Administration	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course includes an overview of the role of the public administrator in government and an examination of the development and implementation of public policy. Topics include public personnel administration and management, decision making, public affairs, ethics, organizational theories, budgetary functions within governmental agencies, and other governmental issues. Upon completion, students should be able to explain the functions of government in society and in the lives of people composing that society.				
PAD 152 Ethics in Government	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the ethical issues and problems within the public administration field. Emphasis is placed on building analytical skills, stimulating moral imagination, and recognizing the discretionary power of the administrator's role. Upon completion, students should be able to understand the moral dimensions of public administrative decision making.				
PAD 251 Public Finance & Budgeting	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course provides an overview of the public finance and budgeting processes used in the allocation of public resources to meet differing public interests. Topics include the political				

environment, government expenditures, revenues, taxation, budgetary process theories and techniques, and the relation of government finance to the economy. Upon completion, students should be able to recognize impacts of government revenue and expenditure policies and understand the role of budgeting in executing governmental policy.

		Work/			
		Class	Lab	Clinical	Credit
PAD 252 Public Policy Analysis		3	0	0	3
Prerequisites: None					
Corequisites: None					
This course is a study of methods and techniques used to determine the effectiveness of public programs. Emphasis is placed on the concept of ecology and environmental impact, informal groups and information networks, and the relationship between public and private sectors. Upon completion, students should be able to analyze case studies with the use of political analysis techniques.					
PCI 172 SCADA Systems		3	3	0	4
Prerequisites: None					
Corequisites: None					
This course is a survey of SCADA systems found in the industrial setting. Topics include single and/or multiple machine operator interfaces utilizing hardware and software systems running SCADA or HMI software for system monitoring and control. Upon completion, students should be able to demonstrate an understanding of the utilization and implementation of custom and commercial SCADA or HMI software.					
PED 110 Fitness and Wellness for Life		1	2	0	2
Prerequisites: None					
Corequisites: None					
This course is designed to investigate and apply the basic concepts and principles of lifetime physical fitness and other health-related factors. Emphasis is placed on wellness through the study of nutrition, weight control, stress management, and consumer facts on exercise and fitness. Upon completion, students should be able to plan a personal, lifelong fitness program based on individual needs, abilities, and interests.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>					
PED 120 Walking for Fitness		0	3	0	1
Prerequisites: None					
Corequisites: None					
This course introduces fitness through walking. Emphasis is placed on stretching, conditioning exercises, proper clothing, fluid needs, and injury prevention. Upon completion, students should be able to participate in a recreational walking program.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>					

		Work/ Class Lab Clinical Credit			
PED 121	Walk, Jog, Run	0	3	0	1
Prerequisites: None					
Corequisites: None					
This course covers the basic concepts involved in safely and effectively improving cardiovascular fitness. Emphasis is placed on walking, jogging, or running as a means of achieving fitness. Upon completion, students should be able to understand and appreciate the benefits derived from these activities.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the pre-major/elective requirement in A.A. and A.S. degree programs.</i>					
PED 138	Archery	0	2	0	1
Prerequisites: None					
Corequisites: None					
This course introduces basic archery safety and skills. Topics include proper techniques of stance, bracing, drawing, and releasing as well as terminology and scoring. Upon completion, students should be able to participate safely in target archery.					
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>					
PED 142	Lifetime Sports	0	2	0	1
Prerequisites: None					
Corequisites: None					
This course is designed to give an overview of a variety of sports activities. Emphasis is placed on the skills and rules necessary to participate in a variety of lifetime sports. Upon completion, students should be able to demonstrate an awareness of the importance of participating in lifetime sports activities.					
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>					
PED 143	Volleyball-Beginning	0	2	0	1
Prerequisites: None					
Corequisites: None					
This course covers the fundamentals of volleyball. Emphasis is placed on the basics of serving, passing, setting, spiking, blocking, and the rules and etiquette of volleyball. Upon completion, students should be able to participate in recreational volleyball.					
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>					
PED 147	Soccer	0	2	0	1
Prerequisites: None					
Corequisites: None					

This course introduces the basics of soccer. Emphasis is placed on rules, strategies, and fundamental skills. Upon completion, students should be able to participate in recreational soccer. *Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.*

	Work/ Class Lab Clinical Credit			
PED 157 Pickleball	0	2	0	1
Prerequisites: None				
Corequisites: None				
This course covers the fundamentals of pickleball. Emphasis is placed on the basics of serving, ground strokes (drives, drops, dinks, punches, and lobs), overhead strokes (smashes and slams), and the rules and strategies of singles and doubles play. Upon completion, students should be able to apply these skills in pickleball playing situations.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
PED 162 Angling	0	2	0	1
Prerequisites: None				
Corequisites: None				
This course introduces the sport of angling. Emphasis is placed on fishing with the use of artificial lures. Upon completion, students should be able to cast and retrieve using baitcaster and spinning reels and identify the various types of artificial lures.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
PED 172 Outdoor Living	1	2	0	2
Prerequisites: None				
Corequisites: None				
This course is designed to acquaint the beginning camper with outdoor skills. Topics include camping techniques such as cooking and preserving food, safety, and setting up camp. Upon completion, students should be able to set up camp sites in field experiences using proper procedures.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
PED 174 Wilderness Pursuits	0	2	0	1
Prerequisites: None				
Corequisites: None				
This course covers the skills necessary to prepare for and participate in a wilderness trip. Emphasis is placed on planning, preparing, and participating in a wilderness pack trip. Upon completion, students should be able to safely participate in overnight wilderness pack trips.				

Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.

	Work/ Class Lab Clinical Credit			
PED 219 Disc Golf	0	2	0	1
Prerequisites: None				
Corequisites: None				
This course introduces the fundamentals of disc golf. Emphasis is placed on basic throwing techniques, putting, distance driving, scoring, and single and doubles play. Upon completion, students should be able to perform the skills required in playing situations.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
PED 277 Ultimate Frisbee	0	2	0	1
Prerequisites: None				
Corequisites: None				
This course introduces the fundamentals of ultimate frisbee. Emphasis is placed on basic throwing techniques, offense vs defense, movement of the disc, change of possession, fouls, self-refereeing, and scoring. Upon completion, students should be able to perform the skills required in playing situations.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
PHI 215 Philosophical Issues	3	0	0	3
Prerequisites: ENG 111				
Corequisites: None				
This course introduces fundamental issues in philosophy considering the views of classical and contemporary philosophers. Emphasis is placed on knowledge and belief, appearance and reality, determinism and free will, faith and reason, and justice and inequality. Upon completion, students should be able to identify, analyze, and critically evaluate the philosophical components of an issue.				
<i>Note: This course has been approved for transfer under the CAA as a premajor and/or elective course requirement. This course has been approved for transfer under the ICAA as a premajor and/or elective course requirement.</i>				
PHI 240 Introduction to Ethics	3	0	0	3
Prerequisites: ENG 111				
Corequisites: None				
This course introduces theories about the nature and foundations of moral judgments and applications to contemporary moral issues. Emphasis is placed on moral theories such as consequentialism, deontology, and virtue ethics. Upon completion, student should be able to apply various ethical theories to moral issues such as abortion, capital punishment, poverty, war, terrorism, the treatment of animals, and issues arising from new technologies.				

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for humanities/fine arts in A.A. and A.S. degree programs. This course has been approved to meet the humanities/fine arts requirement in A.A.S. degree programs.

	Work/ Class Lab Clinical Credit			
PHY 110 Conceptual Physics	3	0	0	3
Prerequisites: None				
Corequisites: PHY 110A				
This course provides a conceptually-based exposure to the fundamental principles and processes of the physical world. Topics include basic concepts of motion, forces, energy, heat, electricity, magnetism, and the structure of matter and the universe. Upon completion, students should be able to describe examples and applications of the principles studied.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in A.A. and A.S. degree programs. This course has been approved to meet the natural sciences requirement for A.A.S. degree programs.</i>				
PHY 110A Conceptual Physics Lab	0	2	0	1
Prerequisites: None				
Corequisites: PHY 110				
This course is a laboratory for PHY 110. Emphasis is placed on laboratory experiences that enhance materials presented in PHY 110. Upon completion, students should be able to apply the laboratory experiences to the concepts presented in PHY 110.				
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in A.A. and A.S. degree programs. This course has been approved to meet the natural sciences requirement for A.A.S. degree programs.</i>				
PHY 131 Physics-Mechanics	3	2	0	4
Prerequisites: MAT 121 or MAT 171				
Corequisites: None				
This algebra/trigonometry-based course introduces fundamental physical concepts as applied to engineering technology fields. Topics include systems of units, problem-solving methods, graphical analysis, vectors, motion, forces, Newton's laws of motions, work, energy, power, momentum, and properties of matter. Upon completion, students should be able to apply the principles studied to applications in engineering technology fields.				
PHY 151 College Physics I	3	2	0	4
Prerequisites: MAT 171 or MAT 271				
Corequisites: None				
This course uses algebra- and trigonometry-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include units and measurement, vectors, linear kinematics and dynamics, energy, power, momentum, fluid mechanics, and heat. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered.				

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in the A.S. degree program. This course has been approved to meet the natural sciences requirement for A.A.S. degree programs.

		Work/ Class Lab Clinical Credit				
PHY 152 College Physics II		3	2	0	4	
Prerequisites: PHY 151						
Corequisites: None						
This course uses algebra- and trigonometry-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include electrostatic forces, electric fields, electric potentials, direct-current circuits, magnetostatic forces, magnetic fields, electromagnetic induction, alternating-current circuits, and light. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered.						
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in the A.S. degree program. This course has been approved to meet the natural sciences requirement for A.A.S. degree programs.</i>						
PHY 251 General Physics I		3	3	0	4	
Prerequisites: MAT 271						
Corequisites: None						
This course uses calculus-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include units and measurement, vector operations, linear kinematics and dynamics, energy, power, momentum, rotational mechanics, periodic motion, fluid mechanics, and heat. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered.						
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in the A.S. degree program. This course has been approved to meet the natural sciences requirement for A.A.S. degree programs.</i>						
PHY 252 General Physics II		3	3	0	4	
Prerequisites: MAT 272, PHY 251						
Corequisites: None						
This course uses calculus-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include electrostatic forces, electric fields, electric potentials, direct-current circuits, magnetostatic forces, magnetic fields, electromagnetic induction, alternating-current circuits, and light. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered.						
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for natural sciences in the A.S. degree program. PMT 110	Introduction to Project Management	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces project management fundamentals and principles for organizing, planning, implementing, and controlling non-routine activities to achieve schedule, budget and performance objectives. Topics include project life cycles; work breakdown structures; responsibility matrixes; as well as planning and control methods such as PERT/CPM and Gantt charts. Upon completion, students should be able to demonstrate knowledge, strategies, and techniques needed to create and execute plans for project development and management.					
PMT 210	Project Management Issues	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course is designed to explore various development and management techniques and tools of integrated project schedules and plans. Emphasis is placed on project control methods from a scheduling perspective, including critical path networking, float analysis, and schedule performance predictability and accomplishment. Upon completion, students should have a clear understanding of accepted techniques for schedule development and management.					
PMT 215	Project Management Leadership	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides an overview of the importance of project teams and human resource management in the planning, scheduling, and controlling of multi-project programs. Topics include the role of projects in organizations; alternative organizational systems; program management methodologies; team management and leadership; legal/ethical issues; and conflict identification/resolution. Upon completion, students should be able to identify and exhibit the behaviors needed for effective project management and team leadership.					
POL 120	American Government	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course is a study of the origins, development, structure, and functions of American government. Topics include the constitutional framework, federalism, the three branches of government including the bureaucracy, civil rights and liberties, political participation and behavior, and policy process. Upon completion, students should be able to demonstrate an understanding of the basic concepts and participatory processes of the American political system.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for social/behavioral sciences in A.A. and A.S. degree programs. This course has been approved to meet the social/behavioral sciences requirement in A.A.S. degree programs.</i>					
PSY 150	General Psychology	3	0	0	3
Prerequisites: None					
Corequisites: None					

This course provides an overview of the scientific study of human behavior. Topics include history, methodology, biopsychology, sensation, perception, learning, motivation, cognition, abnormal behavior, personality theory, social psychology, and other relevant topics. Upon completion, students should be able to demonstrate a basic knowledge of the science of psychology.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for social/behavioral sciences in A.A. and A.S. degree programs. This course has been approved to meet the social/behavioral sciences requirement in A.A.S. degree programs.

	Work/

PSY 241 Developmental Psychology	3	0	0	3
---	----------	----------	----------	----------

Prerequisites: PSY 150

Corequisites: None

This course is a study of human growth and development. Emphasis is placed on major theories and perspectives as they relate to the physical, cognitive, and psychosocial aspects of development from conception to death. Upon completion, students should be able to demonstrate knowledge of development across the life span.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for social/behavioral sciences in A.A., A.S., and A.A.S. degree programs.

PSY 281 Abnormal Psychology	3	0	0	3
------------------------------------	----------	----------	----------	----------

Prerequisites: PSY 150

Corequisites: None

This course provides an examination of the various psychological disorders, as well as theoretical, clinical, and experimental perspectives of the study of psychopathology. Emphasis is placed on terminology, classification, etiology, assessment, and treatment of the major disorders. Upon completion, students should be able to distinguish between normal and abnormal behavioral patterns as well as demonstrate knowledge of etiology, symptoms, and therapeutic techniques.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for social/behavioral science in A.A., A.S., and A.A.S. degree programs.

REL 110 World Religions	3	0	0	3
--------------------------------	----------	----------	----------	----------

Prerequisites: None

Corequisites: None

This course introduces the world's major religious traditions. Topics include Primal religions, Hinduism, Buddhism, Islam, Judaism, and Christianity. Upon completion, students should be able to identify the origins, history, beliefs, and practices of the religions studied.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for humanities/fine arts in A.A., A.S., and A.A.S. degree programs.

		Work/			
		Class	Lab	Clinical	Credit
REL 211	Introduction to Old Testament	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course is a survey of the literature of the Hebrews with readings from the law, prophets, and other writings. Emphasis is placed on the use of literary, historical, archeological, and cultural analysis. Upon completion, students should be able to use the tools of critical analysis to read and understand Old Testament literature.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for humanities/fine arts in A.A., A.S., and A.A.S. degree programs.</i>					
REL 212	Introduction to New Testament	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course is a survey of the literature of first-century Christianity with readings from the gospels, Acts, and the Pauline and pastoral letters. Topics include the literary structure, audience, and religious perspective of the writings, as well as the historical and cultural context of the early Christian community. Upon completion, students should be able to use the tools of critical analysis to read and understand New Testament literature.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for humanities/fine arts in A.A., A.S., and A.A.S. degree programs.</i>					
SAB 110	Intro to Addiction & Recovery	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides an overview of the core concepts in addiction and recovery. Topics include the history of substance use, effects on society members, treatment of addiction, and preventive measures. Upon completion, students should be able to demonstrate knowledge of the etiology of substance abuse, addiction, prevention, treatment, and recovery.					
SAB 120	Intake and Assessment	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers processes for rapport building and procedures used to identify and evaluate individuals' strengths and weaknesses. Topics include diagnostic evaluation and placement, effective interviewing and communication techniques, and use of assessment tools. Upon completion, students should be able to establish rapport with individuals, recognize disorders, and obtain information for referrals and placement.					
SAB 125	Addiction & Recovery Case Management	2	2	0	3
Prerequisites: None					
Corequisites: None					
This course covers activities which bring services, agencies, resources, or people together within a planned framework of action. Emphasis is placed on coordinated services for client care. Upon					

completion, students should be able to develop a service plan, work with various resources, and measure individuals' progress toward goals.

	Work/ Class Lab Clinical Credit			
SAB 135 Addictive Processes	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course covers the physical, emotional, psychological, and cultural aspects of the addictive process. Emphasis is placed on disorders related to addictions to, alcohol, drugs, food, sex, work, gambling, internet, and relationships. Upon completion, students should be able to identify the effects, prevention strategies, and treatment methods associated with addictive disorders.				
SAB 210 Addiction & Recovery Counseling	2	2	0	3
Prerequisites: None				
Corequisites: None				
This course provides theory and skills acquisition by utilizing intervention strategies designed to obtain therapeutic information, support recovery, and prevent relapse. Topics include counseling individuals and dysfunctional families, screening instruments, counseling techniques and approaches, recovery and relapse, and special populations. Upon completion, students should be able to discuss issues critical to recovery, identify intervention models, and initiate a procedure culminating in cognitive/behavioral change.				
SAB 240 Diversity, Ethics, & Trends in Addiction & Recovery	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces systems of diversity, ethics, and trends in addiction and recovery. Topics include confidentiality, assessment of personal values, professional responsibilities, competencies, and ethics relative to multicultural service provision. Upon completion, students should be able to apply and discuss multiple diversity and ethical scenarios applicable to addiction and recovery services.				
SEC 110 Security Concepts	2	3	0	3
Prerequisites: CTI 120				
Corequisites: None				
This course introduces the concepts and issues related to securing information systems and the development of policies to implement information security controls. Topics include the historical view of networking and security, security issues, trends, security resources, and the role of policy, people, and processes in information security. Upon completion, students should be able to identify information security risks, create an information security policy, and identify processes to implement and enforce policy.				
SEC 160 Security Administration I	2	2	0	3
Prerequisites: SEC 110				
Corequisites: None				

This course provides an overview of security administration with an emphasis on designing secure network architectures. Topics include networking technologies, TCP/IP fundamentals, network protocols, traffic analysis, monitoring strategies, and established security best practices. Upon completion, students should be able to use advanced network analysis tools to monitor network traffic and develop security measures to safeguard against various threats.

		Work/			
		Class	Lab	Clinical	Credit
SOC 210	Introduction to Sociology	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course introduces the scientific study of human society, culture, and social interactions. Topics include socialization, research methods, diversity and inequality, cooperation and conflict, social change, social institutions, and organizations. Upon completion, students should be able to demonstrate knowledge of sociological concepts as they apply to the interplay among individuals, groups, and societies.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the Universal General Education Transfer Component requirement for social/behavioral sciences in A.A. and A.S. degree programs. This course has been approved to meet the social/behavioral sciences requirement in A.A.S. degree programs.</i>					
SOC 213	Sociology of the Family	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course covers the institution of the family and other intimate relationships. Emphasis is placed on mate selection, gender roles, sexuality, communication, power and conflict, parenthood, diverse lifestyles, divorce and remarriage, and economic issues. Upon completion, students should be able to analyze the family as a social institution and the social forces which influence its development and change.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for social/behavioral sciences in A.A., A.S., and A.A.S. degree programs.</i>					
SOC 220	Social Problems	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course provides an in-depth study of current social problems. Emphasis is placed on causes, consequences, and possible solutions to problems associated with families, schools, workplaces, communities, and the environment. Upon completion, students should be able to recognize, define, analyze, and propose solutions to these problems.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for social/behavioral sciences in A.A., A.S., and A.A.S. degree programs.</i>					
SOC 225	Social Diversity	3	0	0	3
Prerequisites: None					
Corequisites: None					

This course provides a comparison of diverse roles, interests, opportunities, contributions, and experiences in social life. Topics include race, ethnicity, gender, sexual orientation, class, and religion. Upon completion, students should be able to analyze how cultural and ethnic differences evolve and how they affect personality development, values, and tolerance.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for social/behavioral sciences in A.A., A.S., and A.A.S. degree programs.

SOC 240 Social Psychology

3	0	0	3
----------	----------	----------	----------

Prerequisites: None

Corequisites: None

This course examines the influence of culture and social groups on individual behavior and personality. Emphasis is placed on the process of socialization, communication, conformity, deviance, interpersonal attraction, intimacy, race and ethnicity, small group experiences, and social movements. Upon completion, students should be able to identify and analyze cultural and social forces that influence the individual in a society.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for social/behavioral sciences in A.A., A.S., and A.A.S. degree programs.

SPA 111 Elementary Spanish I

3	0	0	3
----------	----------	----------	----------

Prerequisites: None

Corequisites: None

This course introduces the fundamental elements of the Spanish language within a cultural context. Emphasis is placed on the development of basic listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written Spanish and demonstrate cultural awareness.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for humanities/fine arts in A.A. and A.S. degree programs.

SPA 112 Elementary Spanish II

3	0	0	3
----------	----------	----------	----------

Prerequisites: SPA 111

Corequisites: None

This course is continuation of SPA 111 focusing on the fundamental elements of the Spanish language within a cultural context. Emphasis is placed on the progressive development of listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written Spanish and demonstrate further cultural awareness.

Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for humanities/fine arts in A.A. and A.S. degree programs.

		Work/			
		Class	Lab	Clinical	Credit
SPA 211	Intermediate Spanish I	3	0	0	3
Prerequisites: SPA 112					
Corequisites: None					
This course provides a review and expansion of the essential skills of the Spanish language. Emphasis is placed on the study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate effectively, accurately, and creatively about the past, present, and future.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for humanities/fine arts in A.A. and A.S. degree programs. This course is approved to meet the humanities/fine arts requirement in A.A.S. degree programs.</i>					
SPA 212	Intermediate Spanish II	3	0	0	3
Prerequisites: SPA 211					
Corequisites: None					
This course provides a continuation of SPA 211. Emphasis is placed on the continuing study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate spontaneously and accurately with increasing complexity and sophistication.					
<i>Note: In accordance with the Comprehensive Articulation Agreement, this course has been approved to satisfy the general education requirement for humanities/fine arts in A.A. and A.S. degree programs. This course is approved to meet the humanities/fine arts requirement in A.A.S. degree programs.</i>					
SWK 110	Introduction to Social Work	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course examines the historical development, values, orientation, and professional standards of social work and focuses on the terminology and broader systems of social welfare. Emphasis is placed on the various fields of practice including those agencies whose primary function is financial assistance, corrections, mental and behavioral health, and protective services. Upon completion, students should be able to demonstrate an understanding of the knowledge, values, and skills of the social work professional.					
SWK 113	Cultural Competency & Diversity	3	0	0	3
Prerequisites: None					
Corequisites: None					
This course examines and promotes understanding, sensitivity, awareness, and knowledge of various cultures and diversity. Emphasis is placed on professional responsibilities, duties, and skills critical to multicultural social services practice. Upon completion, students should be able to integrate and expand knowledge, skills, and cultural awareness relevant to diverse populations.					
SWK 115	Community Resources	2	2	0	3
Prerequisites: None					
Corequisites: None					

This course introduces community resources essential to social work practice. Emphasis is placed on awareness of and interaction with community service personnel and stakeholders. Upon completion, students should be able to demonstrate the ability to assess critical community needs, identify resources and follow through with a plan of action for resolution.

	Work/ Class Lab Clinical Credit			
SWK 214 Social Work Law	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the major provisions of social services law, current trends, legislative developments, and court procedures. Emphasis is placed on the interpretation of the laws and court decisions related to various social services populations. Upon completion, students should be able to have a general understanding of these laws and how they apply to ethical practices within the field of social services.				
SWK 220 Ethical Consideration in Social Work	3	0	0	3
Prerequisites: None				
Corequisites: None				
This course introduces the professional standards, values, and issues in social services. Topics include confidentiality, assessment of personal values, professional responsibilities, competencies, and ethics. Upon completion, students should be able to understand and discuss multiple ethical issues applicable to social work and apply various decision-making models to current issues.				
WBL 110 World of Work	1	0	0	1
Prerequisites: None				
Corequisites: None				
This course covers basic knowledge necessary for gaining and maintaining employment. Topics include job search skills, work ethic, meeting employer expectations, workplace safety, and human relations. Upon completion, students should be able to successfully make the transition from school to work.				
WBL 110A World of Work Lab	0	2	0	1
Prerequisites: None				
Corequisites: WBL 110				
This course provides a laboratory experience that covers the knowledge necessary for gaining and maintaining employment. Topics include job search and job interview skills, employment expectations, and employment preparation. Upon completion, students should be able to demonstrate how to successfully make the transition from postsecondary education to work.				
WBL 111 Work-Based Learning I	0	0	10	1
Prerequisites: 9 or 14 SHC in the major core courses depending on program				
Corequisites: WBL 115				
This course provides work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies.				

		Work/ Class Lab Clinical Credit			
WBL 115	Work-Based Learning Seminar I	1	0	0	1
Prerequisites: 9 or 14 SHC in the major core courses depending on program					
Corequisites: WBL 111 or WBL 112					
This course provides an opportunity to discuss fieldwork experiences with peers and faculty. Emphasis is placed on discussing application of concepts and principles from related course content to the fieldwork placement. Upon completion, students should be able to demonstrate the knowledge, skills, and attitudes required in fieldwork experiences					
WEB 140	Web Development Tools	2	3	0	3
Prerequisites: CTI 110					
Corequisites: None					
This course provides an introduction to web development tools. Topics include creating websites using web development tools and web standards. Upon completion, students should be able to create small web sites and upload files to a web server.					
WEB 141	Mobile Interface Design	2	2	0	3
Prerequisites: CTI 110					
Corequisites: None					
This course covers current design standards and emerging approaches related to the design and development of user interfaces for mobile devices. Emphasis is placed on research and evaluation of standard and emerging practices for effective interface and user experience design. Upon completion, students should be able to design effective and usable interfaces for mobile devices.					
WEB 250	Database Driven Websites	2	3	0	3
Prerequisites: CTI 110					
Corequisites: DBA 110 and WEB 140 or DBA 120					
This course introduces dynamic (database-driven) website development. Topics include the use of basic database CRUD statements (create, read, update and delete) incorporated into web applications, as well as in software architecture principles. Upon completion, students should be able to design and develop database driven web applications according to industry standards.
