History

Chartered in 1964 by the North Carolina Department of Community Colleges, Richmond Technical Institute (RTI) was established to serve the citizens of Richmond and Scotland Counties. RTI provided a wide range of technical, vocational, and continuing education programs. Beginning with the Lee Building in 1967 and the Lindsey-Petris Building in 1971, the main campus was established in Hamlet, with auxiliary sites located throughout the service area.

The next step in the institution's evolution occurred in 1980, when Richmond Technical Institute became Richmond Technical College. This name change was more than symbolic, as it indicated the emerging institution's academic direction and mission. In 1981, the College acquired the James Nursing Building in Hamlet as home of the growing nursing program and continued the expansion of main campus facilities for new credit programs.

In 1987, Richmond Technical College was approved by the North Carolina General Assembly to become Richmond Community College (RCC), allowing for college transfer programs to be offered. As its mission became more comprehensive, the college expanded to better serve its communities. A learning resources center and a technology center were built on the main campus, while two buildings were acquired in Laurinburg to meet the needs of Scotland County. The focus of RCC's mission on community service was reinforced with the 1999 completion of the Cole Auditorium, which allowed the college to bring performing arts and cultural events to the service area. Increased demand for area healthcare professionals spurred the need for the Grimsley Health Science Building. This facility, built in 2006, allowed the College's large Basic Skills program to be relocated to the James Building.

An increased demand for programs in Scotland County prompted the construction of the F. Dianne Honeycutt Center in downtown Laurinburg. The facility, opened in 2010, is a multipurpose campus housing a variety of Curriculum and Workforce & Economic Development classes.

The latest addition to the RCC's main campus was the expansion and renovation of the John E. Forte Building in 2014. This state-of-the-art facility is home to the college's engineering, welding and machining programs. Part of these renovations also included updates to the Forte Annex building, which houses classrooms for the Electric Utility Substation and Relay Technology program and a working substation. RCC was the first college or university in the nation to offer a two-year degree program that prepares students for relay technician jobs in the utility industry.

In 2015, the college initiated a move to abbreviate its name to "RichmondCC" in order to distinguish itself from the many other "RCC" institutions within the N.C. Community College System.

In 2017, the N.C. State Board of Community Colleges approved RichmondCC's application for multi-campus status in Laurinburg. The College will incorporate two adjacent facilities to the Honeycutt Center to accommodate the expanded programming and services offered in Scotland County.

In 2018, the College held a "wall breaking" ceremony in downtown Rockingham for the Kenneth and Claudia Robinette Building, housing the Leon Levine School of Business and Information Technology. The Robinette Building will replace what has been historically known as the R.W. Goodman Building on the corner of Franklin and South Hancock streets.

Also in 2018, the College began offering the Electric Lineman program through the Workforce & Economic Development division, bringing short-term training for high-demand careers in the electric power industry to the region.

In 2019, RichmondCC broke ground on renovations to the front of the Lee Building, creating new space for Financial Aid, Student Services and the Career & Transfer Center. The new entrance to the Lee Building will serve as a one-stop shop for students and visitors to the campus. The College also began construction on a student cafeteria, which will be added to the Student Lounge area of the Lindsey-Petris Building overlooking the lake.

Also in 2019, the College held an open house for the newly expanded Scotland County Campus that includes three buildings: the Honeycutt Center, the Morgan Center and the Covington Street Building. The Scotland Early College High School was moved to the Covington Street Building, and an Industrial Mechanics classroom was created in the Morgan Center.

In 2020, construction was completed on the front of the Lee Building, creating a new "front door" for RichmondCC and providing more office space for counselors and financial aid staff. The new section opened to students July 2020.

In January 2021, the Kenneth and Claudia Robinette Building, housing the Leon Levine School of Business and Information Technology, opened to students and employees for the start of the spring semester. The glass and brick building provided additional classrooms and meeting spaces for Curriculum and Workforce & Economic Development courses, as well as faculty offices.

In February 2021, the RichmondCC Café on the Hamlet Campus opened to employees and students, offering for the first time a fully equipped cafeteria. The Cafe was built between the Lindsey-Petris Building and the Conder Building, with a view overlooking the RichmondCC Lake.
